INTRODUCTORY NOTE TO VOLUME II

Ten years have elapsed since the publication of the first volume, "Libraries," of this Guide to Materials for American History in the Libraries and Archives of Paris, and thirty-five years since the inception of the French "mission" of the Carnegie Institution of Washington. Volume II is devoted to the materials in the archives of the Ministry of Foreign Affairs, obviously one of the most important of the Parisian depositories with respect to materials for American history. A third volume, dealing with the archives of the Ministry of War, the Hydrographic Service, and the Ministry of the Marine, is nearly complete and can, it is hoped, be issued during 1944. Later volumes will contain reports on the National Archives, on the archives of the Ministry of the Colonies, on various minor depositories, and also a list of "Acts of Sovereign Power relating to America" compiled from series in numerous depositories.

The tragic events of the last three years have made it necessary to confine the contents of the present volume to notes already taken, and consequently in this and in succeeding volumes will be found some gaps that are regrettable but that cannot now be filled. The Guide as finally published will therefore represent the results of the "mission" as they stood in 1939.

During the last decade the general editor of the Guide has been completely occupied with other duties and labors, and it would have been impossible to continue the preparation of the volumes if it had not been for the invaluable assistance
of the principal author of the present volume, Dr. John J. Meng, at present professor of political science in Queens College, Flushing, New York, but at the time when his collaboration was commenced a member of the faculty of The Catholic University of America. Dr. Meng, whose reputation for careful scholarship has been established by his works on the history of the diplomatic relations between the United States and France, was already familiar with the archives of the Ministry of Foreign Affairs and was singularly qualified to take the great mass of notes and data accumulated during the "mission" and to reduce them to the scale and order in which they are here presented. In consultations between Dr. Meng and the general editor a plan of presentation has been worked out which succeeds, it is hoped, in emphasizing material of importance and in describing in more summary fashion material that is repetitious or that represents routine operations.

The archives of the Ministry of Foreign Affairs are well described in the following paragraphs by Dr. Meng.

Materials for American history abound in the archives of the Ministry of Foreign Affairs; they are scattered throughout a tremendous mass of diplomatic documents covering every phase of French foreign relations from 1500 to the present day. Although this depository is one of the largest of French archival collections, its organization is one of the least complicated. This is due in part to the early adoption by the Foreign Office archivists of a policy of classification that was both comprehensive and simplified, and to the consistent adherence to this policy for more than one hundred and fifty years.

The historical archives antedating 1848 are open to qualified investigators: documents prior to 1789 may be consulted without restriction; notes taken from those dated between 1789 and 1848 are subject to review by the archival authorities. In addition, it has been possible to obtain special permission from the Commission of Diplomatic Archives to consult records dated as late as 1870, subject to rather close supervision.

The archives are organized in three major series: Correspondance politique, Mémoires et Documents, and Correspondance des consuls. Each series is in turn subdivided into fonds.
identified by the names of the states or areas to which the constituent documents refer. The fonds are grouped in alphabetical order, the individual documents within each being arranged chronologically and for the most part bound into consecutively numbered volumes.

The primary series, Correspondance politique, consists of the correspondence of diplomatic agents abroad with the ministry in France, and of the correspondence of the ministry with foreign agents accredited to France. All types of documents are included in this section—drafts and originals of instructions to and reports from French representatives, as well as drafts of communications to the representatives of other states and originals of the letters of these representatives to the French ministry. In this series are also numerous and varied enclosures that accompanied the principal documents.

It is important to note that supplementary to this large group of papers is a significant collection known as Correspondance politique, Supplément. Arranged under the same rubrics as the principal series, the Supplément contains documents properly a part of that series that came to the Foreign Office after the papers with which they belong chronologically had been collected into bound volumes. Among them are papers given or sold to the government by the families of deceased diplomatic agents, documents purchased at various times by the government in the open market, and obsolete files transferred to the ministry from French embassies, legations, and residences abroad. The Supplément contains many duplicates of documents in the main series, yet no historical investigator can afford to neglect it, since among such duplicate materials are frequently found unique copies of important papers.

The second major division of the archives, Mémoires et Documents, contains a wide variety of memorials and accompanying papers prepared by or submitted to the ministry and referring directly or indirectly to the foreign relations of the state. These documents are classified according to the same system as is the Correspondance politique: subdivisions are identified by the names of states, while individual documents within each classification are arranged chronologically in consecutively numbered volumes. One important variation arises from the fact that among the Mémoires et Documents is a large series of volumes filed under the designation France, which fonds does not appear in the Correspondance politique.

The third and last section of the archives is the Correspondance des consuls, which includes instructions to and reports from French consular agents in various parts of the world. As is the case with the Correspondance politique, the consular correspondence contains a large amount of subsidiary material originally enclosed with the major documents of the series. The series is classified by names of states, with a subclassification by names of specific consular jurisdictions within each state. The final arrangement of documents for each jurisdiction is chronological.

These are the archives proper as made accessible to investigators under such regulations as may be imposed by the authorities in charge. There exists at the Foreign Office an additional small collection of materials generally not open
to the public. Since the earliest days of modern French diplomacy it has been the practice of the Ministry of Foreign Affairs to set up a confidential dossier for each official in its employ, in which, identified only by the names of the officials concerned, were filed various documents of a private nature. Normally included were birth certificates, copies of various official commissions, data on salaries, pensions, and honors, recommendations, complaints, and papers illustrative of the services rendered France in various capacities by the individual officials. The general rule of the Foreign Office with regard to these dossiers, irrespective of date, has been to treat them as completely confidential and entirely closed to investigators. Occasionally specific items of information will be obtained from them by the archives staff for the convenience of historians and others. In very rare instances investigators have been allowed personally to consult one or more specific dossiers of ancient date concerned with individuals who were members of families now extinct.

Official inventories for part of the archives of the Ministry have been published between 1883 and 1919 as follows:

Inventaire sommaire des Archives du Departement des Affaires Etrangères

The volume describing the Correspondance politique, Etats Unis, has long been in proof and it has been possible to make use of it, but it has not yet been published.
A very large amount of material from the archives of the Ministry of Foreign Affairs has been copied, chiefly for the Library of Congress, and important selections of documents have also been published. A full account of such collections of copies and of published documents will be found in the indispensable Guide to the Diplomatic History of the United States 1775-1921 by Samuel Flagg Bemis and Grace Gardner Griffin, published by the Library of Congress (U. S. Government Printing Office, 1935), which the user of this volume should have always at hand.

Reference should also be had to the General Preface in Volume I of the present Guide, in which the chief printed collections of documents are noted.

All the notes taken in Paris on which this volume is based have been deposited with the Library of Congress, in the Division of Manuscripts, and are available to those who wish to seek information beyond what is offered in these pages, as are also the original notes on the material in the libraries of Paris, described in Volume I.

While the principal author of this volume is, as has already been noted, Dr. John J. Meng, for he has actually written the text as it now stands, it is only fair to associate with Dr. Meng and the general editor, Monsieur Abel Doysié, whose faithful and intelligent services provided a large part of the original notes on which the following pages are based.

Finally, grateful acknowledgment is due to Mrs. W. H. Harrison, Editor of the Division of Historical Research of the Carnegie Institution of Washington, who supervised the editing
and the preparation of the manuscript for the press, and who has been exceedingly helpful in dealing with the numerous difficult problems of arrangement and presentation.

1806, May 28. Talleyrand to Vandeuil, U.S. wishes to reopen negotiation with Spain, but desires Spain to make first move; spoliation claims of U.S. not well-founded; U.S. pretention to Florida as part of La. likewise unfounded;
France considered La. boundary as being Mississippi and Iberville, Florida had been specifically refused France by Spain; U.S. should renounce this claim, but might negotiate for acquisition of part of Florida between rivers Mississippi and Perdido; such a convention would settle uncertain boundary of La.; these boundaries appear never to have been traced; most proper boundary would seem to be that between French and Spanish settlements prior to 1762 (ff. 489-492).

Duflot returned to France in Mar., 1842. Mention is made in a ministerial despatch (f. 43) of a letter from Duflot of Mar. 22, 1841, and of a report of Dec. 29, 1840, that contain detailed accounts of the places he visited. 1780, Nov. 1. Considerations on origin, conduct, and result of existing war; divided into seven chapters with subdivisions; recapitulation at end; at outbreak of rebellion in America France found herself in most advantageous position for attack, with Britain unable to defend herself properly; of various policies which France might have adopted she chose that one which promised least advantage at greatest expenditure; having chosen this policy, she did
nothing to escape dangers it entailed; having been in position to take offensive with great superiority, she instead allowed herself to be reduced to a position of equality, and eventually placed on defensive; France rejected most effective means of recovering superiority in favor of half-way measures and vague plans (ff. 31-117).

The second is an undated memoir by Du Theil descriptive of the same events, outlining the negotiations of Rouillé and Torcy in 1709 (f. 171).

This is the second volume of Du Theil's history of treaty of Utrecht, of which volume 56 preceding is the first.

The French consular archives prior to 1837 of the Foreign Office are deposited in the Archives Nationales in Paris rather than at the ministry on the Quai d'Orsay. They nevertheless remain essentially a part of the Foreign Office materials.

Volumes and cartons constituting the Correspondance des Consuls are arranged alphabetically under the names of states with which France maintained relations. Subdivisions of these various major series bear the names of specific consular jurisdictions, also arranged alphabetically. Individual items within each subdivision are classified chronologically.

The materials inventoried below represent an arbitrary selection from the series Etats-Unis only. Circumstances beyond the control of the editors have made it impossible to obtain access to other series.
