Has this ever happened to you? You're home over the summer and you know your report card is going to come sometime during the week in the mail. You rush home from work every evening, hoping to snatch it before your parents. If you don't make it, you've got all your excuses ready. C'mon, admit it, you could have pulled an all-nighter but it was pitcher night at R & R's. Besides, it was a three hundred level course and there was no way you'd get above a C on it anyway...
Getting to classes can be such a pain, when you decide to go that is. Thousands shuffle past each other, racing to get to class on time. It's worse than a Chicago traffic jam. Some students engineer the best route to walk, others enjoy the Quad--long-haired radicals toss the frisbee for their dogs and girls in shorts lay out and take in some rays. Some students study under a tree, while others zip by on the bike lanes. When you have a minute, you stop and listen to Max condemning his audience or watch jugglers twirl knives over their heads. The Quad seem to be a magnet for U of I students...
Getting around on campus is an art in itself, an art which has taken a couple years to master. You laugh remembering the time you walked onto a bike path as a freshman and forced the oncoming cyclist to fly over the curb. The addition of mopeds made getting around both a heaven and a hell for students. Students could zip to class in a matter of minutes much to the dismay of car drivers, pedestrians, and campus policeman. Finally, yield signs were added to the bike paths to help prevent students from being senselessly run over...
Even more than classes though, you remember the good times. Visions of sporting the orange and blue, chanting I-L-L-I-N-I, and sneaking your boda past the security guards at Saturday afternoon football games. You got tired of the wave, but continued to illegally pass people up. Halftime was highlighted by swaying to the Illini Marching Band's rendition of the Alma Mater and yelling CHIEF. It didn't matter that your war paint was smeared down your face by the time the game ended.
Being able to drink underaged at college is an honor which is always treasured. Gully's, Cochrane's, Murphy's, C.O.'s, Kam's, Bradley's, R & R's—you've gone there for happy hour, quarter beers, dancing, and Long Island iced tea pitchers. After a tough week of studying (?) and the weekend rolls around, you're ready to loosen up and take advantage of all the drinking establishments that campus has to offer. No more memorizing ID's...
Many businesses provide books, clothing, bars, restaurants, and banking - all in a one block area. This "campustown" is a gathering place for all students in the community. On nights when you can’t think of anything to do you wander down Green Street to see what’s happening. Townies cruise around in circles, and people stand in line at the Coed to catch a midnight movie. After the bars close, students head for Taco John’s or Burger King for a late night snack.

All in all, college life isn’t bad. Granted, you’re here for four (sometimes five) years to study and educate yourself. But you’re only in class for a couple hours a day, the rest of the time is basically yours to do with what you will. C’mon, admit it. It doesn’t get much better...
It was a time of sodness

It seems students are always in a hurry; hurrying at 8:59 a.m. to get to a 9 a.m. class on the other side of campus; hurrying to the tv rooms of the Union to get a good seat for the lunchtime soaps; hurrying to get to the Undergrad before it closes. (Ok, bad example, but you get the point). Well, sometimes it’s good to stop and take a look at things you “see” every day but still don’t really notice.

I did just that one of my first days back on campus in the fall of ’86. I decided to take a long early morning stroll along the Quad. It was a stroll unlike any other. The gentle morning sun glistening on the orange plastic fencing, the soft buzzing sound of bulldozers tearing away at the ground, and the sweet aroma of mud and machine exhaust fumes made me feel like I was back home in The City. But wait a minute! This is Champaign-Urbana. What happened to the birds, the squirrels, and the grass? Who stole the Quad?

It turns out that the University was installing new telecommunication lines and an underground irrigation system. What was expected to take just a few months took over a year to complete. It was an agonizing, horrifying year, one that was simply too much for us to handle, and the toll shone on everyone’s faces. Some students walked to class in a zombie-like fashion, staring only straight ahead. Most looked toward the area where the Quad used to be and, with longing in their eyes, remembered the fun they had had there.

What happened to the birds, the squirrels, and the grass? Who stole the Quad?

It was a very long and sad year for us. It held little consolation to think of what good was to come from the new phone lines. Could it make up for all the scars it was leaving behind?

Incoming freshmen who had heard so much about the Quad were roused awakened by the unsightly site. Sentimental seniors wanting to play on last game of Frisbee, or eat one last lunch, or take one last nap on the Quad’s blanket of grass, had only memories to comfort them. We wanted our Quad back, we needed our Quad back. But we wouldn’t get our wish until the following fall semester.

None of us will ever forget “The Year Without the Quad”, and the tales our suffering will be carried on to future generations of Illini. Our pain was very real, but we’re stronger for it. Now when we go to class and see the glorious green grass of the Quad, we stop to take a moment to reflect on the past, rejoice in the present, and appreciate the wonders of nature. This is, of course, unless it’s 8:59 a.m.
Susie wears her long blond hair in a ponytail that Sandy would chop off if she could only get the scissors close enough. Sandy wears her curly dark brown hair short and Susie wonders how she ever gets guys to look at her with hair like that. Susie is a textiles major who can name any fabric she sees, even from amazing distances. Sandy is an electrical engineering major who thinks clothes are far less important than physics. Susie is an only child from Chicago and Sandy, from Lewton, is the middle child of seven.

Susie spends a typical Sunday evening hopping quarter beers at Kim's, scoping the guys, and catching up on the weekend gossip. Sandy prefers to stay home on Sunday nights to study her fath 132, just in case there might be a quiz the following Tuesday. In the corner of Susie's mirror there is a sticker proclaiming her love for her sorority. In Sandy's desk is a plaque from a science fair which reads, “Physics is fun!”

“I can't see my books through this loud of hairspray!” Sandy whines. “How do you expect me to make any calls when you're always on the phone with your mother?” Susie screams.

Though these two girls seem to have similarities between them, they do have one unfortunate thing in common: they are roommates. Roommate election is probably the most risky and fateful lottery a person enters in his or her life. You are expected to "share and share alike" a very confining space with a person you don't even know and, more often than not, don't even like. Many a freshman has written these words home to Mom: "My roommate is from hell." Be patient. Your roommate is not from hell.

For instance, Sandy would be doing Susie a big favor if she could keep some of her books on a shelf rather than on top of Susie's sweater boxes. That way, Susie won't have to dump Sandy's books all over the floor every time she changes sweaters, which is often. Sandy, on the other hand, could humor Susie by making an effort to learn the Greek alphabet. That way, when one of Susie's boyfriends call, Sandy could refer to the house by its letters, rather than blandly saying, "She's at the house." It's merely an act of give and take.

I remember when the three girls moved into the triple next door to me last year. The "triple" has traditionally represented a particularly hellish living experience. I knew from the moment I walked in to introduce myself that the room would soon be a three-ring circus. Meg had carefully made her bed with peach silk sheets and a matching comforter. On Kim's bed was a blue and orange afghan that her grandmother had hand-knit for her. Becky chose to sleep on the floor beside her bed, which served only as a holder for her camouflage sleeping bag. As I predicted, there were days and nights of flying hairspray cans and torn French books. On one night, Meg even went so far as to drag her silk sheets into the hallway because she couldn't take the circus any longer.

After a few months, however, they managed to get used to each other's ways, study (or non-study) habits, music, and pet peeves. Last I heard, they were living together again this year in an apartment. Meg told me that Becky moved a tent into her room instead of a bed. Meg, Kim, and Becky were just different enough to give each other space and privacy as well. All it took was a little compromise and effort.

The odd couple of Sandy and Susie probably won't have a "happily ever after" ending. Lucky for both of them, Susie will be taking her hairspray and Madonna tapes to the sorority house next semester. Sandy will be U-Hauling her books over to ISR, where she will be closer to the buildings north of Green Street for spring semester. For those lucky few who ended up with a best friend as well as a roommate, count your blessings and thank the computer for making the match. For those of you with "roommates from hell", do your best to part friends. You'll never see her at Kim's and she'll never see you north of Green!

story by Carol McHugh
layout by Heidi Martisius
The changes were not so drastic that one couldn't recognize Green Street when he or she returned to campus last fall, but a closer look revealed that many small facelifts had taken place over the summer months. If you're like me, you couldn't wait to head over to Cochrane's for quarter beers on the first Thursday of the season. After all, "Real Illini" agree that Thursday marks the start of the weekend. What you were greeted with when you arrived at the door, however, was a one dollar cover charge, unless you were a lady, and no quarter beers. Your heart sank, your hands shook, and you broke into a cold sweat of fear and disappointment. Timidly, you stepped back to reread the sign. Yes, it still read "Cochrane's", so you went in.

Over the summer, Cochrane's became a spacious, well-lit, appealing place, similar to the way it was, but better. The bar underwent major remodeling including the removal of the center staircase and all booths, leaving room for a dance floor double the size of the old one, and additional table space. The owners of the bar also purchased new video and audio equipment which Kurt Kibler, manager of the bar and senior in civil engineering says is the best on campus. Along with remodeling its floors and walls, Cochrane's remodelled its image. Wednesday's "Little Kings" were replaced by $1 Coronas and "Ladies Night" had replaced what was once Thursday's quarter beers.

"We're not trying to portray an upity image," Kibler said. Cochrane's main goal was to become a much "nicer, cleaner place than it was," he said. The one dollar cover charge, which is in effect from Wednesday through Saturday, is another result of the new image, one which prompted other campus bars to do the same. While one now has to pay to get into Cochrane's, it's worth the dollar to enjoy a clean space with plenty of room to dance.

If you like tacos, you probably learned very quickly to like ice cream and frozen yogurt just as well. "Delights", a Green Street traditional favorite, moved across the street and teamed up with the owners of "Taco John's". The move came about as result of lease problems, owner/manager Bruce Hink said. The original "Delights" had been subletting its building from a hot dog stand on a five-year lease with an option to renew. Though Hink was not aware, the owners of the hot dog stand neglected to renew the lease, which ended in June. This left Hink with no building in which to create his delights. Moving into "Taco John's" proved to be an advantageous choice, Hink said. "If anything, the space is more efficient than over there," he added, pointing across the street to his old building. "Taco John's" offered "Delights" a much larger seating area than it had at its old location and Hink said that due to his experience as an employee of Garcia's, he was able to make the best of the space he was given.

If you're more interested in healthy food than ice cream, than you we
probably happy to notice that "Strawberry Fields" moved from west Main to the much more convenient location of Green Street in campustown. "Strawberry Fields", which specializes in natural food, produce, and fresh-baked bread, made few changes with its move. Mark Alan, the store manager, said they ordered new equipment or the store and ordered some new products the old store did not have. He noted that the new location made it more possible for the store to appeal to ownerspeople as well as students.

Coming back to campus last fall after a long, typical summer was enough to change your pace, but the several face-lifts that took place on campus put a spark into the daily routine of walking on Green Street. Who knows? Maybe when you go back home in May your own hometown will have spiced itself up a bit!

Proud to be an Illini!

From hats to toilet seats, the Illini ego can be displayed in countless ways. In fact, campus stores win points for originality for where they manage to put the word "Illini" and the colors orange and blue.

The most popular Illini merchandise are jackets and sweatshirts. It is almost unheard of to have "Illini" written on sweats and jackets in any colors other than orange and blue. Although it may not be the most flattering color combination, orange and blue is just obnoxious enough to scream "University of Illinois" loud enough to be heard from miles away.

Illini socks, Illini umbrellas, Illini Mom and Dad merchandise, as well as any combination of the words "Fighting", "Illini", "Illinois", "of", and "University" has been tried and sold.

An innovative idea, Illini underwear was successful from the start. Boxer shorts, though not very practical for public wear, make great pajamas. Navy blue silk panties sporting the phrases "Illini Backfield in Motion" or "Illini Fanny" are also big sellers among true Illini fans.

Speaking of words across one's fanny, the most popular form of Illinois sweatpants are those that simply say "Illinois" across the rear. Illini of both sexes proudly adorn themselves in these sweats that truly symbolize their immovable pride in their alma mater.

In short, you can get just about anything tailored to Illini standards: your garbage can, your license plate holder, even your flatware. However, many of these popular items are snatched up by sentimental alumni, so be a smart student and get your Illini toilet seat now, before the price goes up!
My first week on the Champaign Police force had proved to be quiet and relaxing. The despicable street scum must have heard of my transfer from the City of Angels, Los Angeles, California. No criminal could possibly imagine perpetrating a crime and not feeling the wrath of our lady Justice. Not while Joe Friday is in town.

The Chief in L.A. told me the transfer was in my best interest. "Taking my job too seriously?" What peace officer would not respond to such a crime--the innocent child was endangered by the carelessness of his parents. Penal Code section 59A paragraph 6: "Every child must be secured with a safety belt when traveling in a moving vehicle."

After I incarcerated the criminals and impounded their vehicle the Chief dismissed the charges and released the parents returning their stroller.

Saturday September 19, 1987, 10:57 AM. Detective Friday responded to a 1097: suspicious activity occurring." I proceeded to the vicinity of 1st and Peabody where I encountered...
heavy traffic and unruly crowds. Parking my scooter, I approached a large grass field where several vehicles were parked. I immediately suspected a crime of national proportion since the crowd obviously belonged to the same gang, wearing their colors, orange and blue. My mind raced: counterfeiting, international espionage? I now realized why the Chief transferred me, in order to head the investigation for this national incident.

Upon locating the person in charge, I thoroughly questioned her. The suspect, Linda Horvie, claimed that this was "Tailgreat '87," an annual tradition at the University of Illinois since 1984. She continued to reveal her well-thought story, unmoved by my steady gaze. Apparently the crime organization was using the cover of this tailgate party. Sily obtained the code name, disguised as the theme, "That's A Great Idea." The accomplices, the general public, local businesses, and students, competed for prizes. Each was assigned to one of 130 spaces which was to be used to conduct activities. The organization was divided into five categories.

The first, the "Traditional Illini," involved conventional tailgating. The members of this group displayed their Fighting Illini spirit with vehicles, food, and clothing decorated with orange and blue. Two groups were identified as "New Year's Eve in Pasadena" and the "Illini Hot Tub Club." The next category, "It's Showtime," provided entertainment for the unsuspecting public. Skits, dancing, games, and performances of all kinds made up this category. "Saturday Afternoon Live" and "Illini Shop of Horrors" were two suspicious aliases. "Illini Poker Party" and "Wheel of Fortune" were two groups who entered "Cut-Rate Tailgate." This third category was for groups low on funds. The judges looked for enthusiasm and the best use of low budget materials. This category, along with the first two, competed for Illini road-trip packages or dinners at some of Champaign-Urbana's fine restaurants.

Business groups such as the Champaign National Bank and Corps of Engineers entered this fourth category, "Business as Usual." Grand prizes of a party for 100 in the bubble and 100 Illini basketball game tickets were given to the best entries.

The last category was for Illini students only. A trip to an Illini post-season Bowl Game and season basketball team tickets were at stake. A group known as AGR's and Tri-Deltas put together a luau, equipped with sand volleyball, in order to win the season tickets. While a secret intelligence group ILIF (Illini Institute of Futuristic Football) headed by Steve Blanke, a Biochem graduate student, won the Bowl trip.

The two best Tailgreat groups of all categories won a trip to Hawaii with the Illini basketball team or a trip to a post-season Bowl game. "Saturday Morning Grapevine," where people dressed as raisins, was the skit headed by Joanne Anderson. It won the Hawaii trip. A bowling alley was set up, "Striking Out for the Rose Bowl," and Stuart Meacham and his group won the Bowl trip.

Indeed this crime ring is very intricate and the facts are difficult to obtain. I decided to go under cover and proceeded to dress as a raisin. The "Grapevine" has accepted me as one of them. I've discovered that they are going to take a trip to Hawaii. That must be where Mr. Big is located. Nothing gets past the keen mind of this detective. Luckily, the Chief put Joe Friday on what could be "the case of the century."

Left The "Illini Hot Tub Club" relaxes before the big game. Above left "Saturday Morning Grapevine" dances their way to Hawaii. Above right All ages love to get involved in Tailgreat.

Here’s to Dad

There are two times during the year when you will permit your father to wear orange pants. One is during the school year when he is far away and you are safe in Champaign. The other is Dad’s Day.

Father’s Day, traditionally celebrated the third Sunday in June, is celebrated a bit less formally here on campus in the fall. It’s a chance for U of I students to how their dads what a real Illini weekend is all about (or not all about if you changed our routine and went to Atius-Sachem’s Dad’s Night Out” instead of Kam’s that Friday night).

Dad’s Day fell on September 12 this year and coincided with the Illinois vs. Arizona State football game. At the end of the weekend, most of the fathers preferred to talk about the Illinois Opera Theatre’s production of “Guys and Dolls” rather than the game. Nevertheless, they still wore their orange pants during the trip home.

Despite the 21-7 loss, the Fighting Illini gave last year’s Rosebowl winners a good game, and the Marching Illini put on extra fantastic pre-game and half-time shows, which included the ever-popular Marching Illini Dancing Dads.

Henry Findyz of Chicago was especially caught up in the event after being crowned “King Dad” by Chief Illiniwek Michael Rose. Mr. Findyz claimed his title after his daughter, Anne Findyz, a senior in LAS, nominated him for the position.

Dad’s Day weekend has become as much of an entertaining tradition as orange pants themselves, and this year was no different. If you didn’t get around to inviting Dad this year, don’t make the same mistake again. There’s no doubt that you will have as much fun as he will!

Left A true blue Illini Dad below What do you do with Dad when he visits? Take him golfing?

I can remember my first day here at "the Big U." I was excited, nervous, and terrified all at the same time. My first "assignment" was: On-Campus Registration; Location: the Armory. I quickly pulled out my handy-dandy U of I map and soon discovered that the Armory is located on Armory Avenue (good deal!). With timetable, two sharpened No. 2 pencils, and i.d. in hand, I headed toward the Armory at 9 a.m.

Once inside, I got in line with the others who were also waiting to be interrogated by the Armory S.S. Even though I had my own schedule and my own i.d., I found myself repeating my social security number over and over again in my head.

My first stop was the Chem 101 station. All I wanted to do was switch from a 1 p.m. section to a 10 a.m. section. Simple, right? Except for the fact that 10,000 other freshmen were waiting in line to do the same thing! Well, maybe not 10,000, but I had never seen such an incredibly long line before in my life! (Little did I know, this was only the beginning.)

I decided to tough it out and moved to the end of the line. Three hours later I was at the front of the line, only to see a small note written in the corner of the blackboard saying, "All Sections Closed." I felt like I was at Six Flags waiting in line for one of the best rides in the park, getting to the front of the line, only to find that the ride had been shut down.

Dejected but still determined, I tried my luck with RHET 105, hoping that that line would be shorter. Nice try. It seemed like any class I wanted to change had at least an hour wait; Econ 101, PE, CS 105, etc. At 5:00 p.m., not having changed even a single class, I left the Armory.

When I got home, I saw my friends in line for the cafeteria and decided to join them. Needless to say, there was a long wait. It was pizza night. While standing around in line, we got onto the subject of all the lines we stood in that day. My roommate said she waited over half an hour just to pay for her books, and that she had heard someone talking about how long the book return lines are every year. (At that point, I planned to put off buying books for at least two weeks!)

Later that evening, my friends and I went out to "drown the frustrations of the day." The line outside the bar was about half a block long. But oddly enough, as the night wore on and we went from bar to bar, I just didn't seem to mind the lines as much. Funny how things work out in the end.

Above Many students seem to spend much of their weekends standing in line at the bars. Upper right The check cashing line seems endless on Friday afternoons. Lower right Some students waited for over an hour to get a lottery ticket for the U2 concert.

An Illini A-Chief-Ment

Homecoming seems to bring out the orange wardrobe in all good Illini fans, and this year was no different. It's a time when students and alumni as well are especially proud of their Illini roots.

Homecoming week began this year on Sunday, Oct. 25, with five and 10 kilometer runs sponsored by the Illini Pride Student Athletic Board. Runners of all ages participated in the event.

The Homecoming spirit increased on Wednesday with a pizza party on the patio of the Union. The celebration featured an outdoor showing of "Halloween" in front of Foellinger Auditorium, sponsored by Atius-Sachem.

Illini Pride's "sports day on the quad", featuring a series of presentations from the university's non-revenue sports teams, took place on Thursday afternoon.

The major Homecoming activities began Friday evening with the Homecoming parade, featuring several floats and other units. First prize went to Triangle and Delta Phi Epsilon for their float, "The Sky is the Limit." At the pep rally, which took place in front of Foellinger Auditorium after the parade, Anuradha Natarajan, senior in LAS, and Larry Geis, senior in commerce, were crowned Homecoming king and queen. Coach Mike White and his football team made an appearance with a video of highlights from past games. The Illini cheerleaders and the Illiniettes also performed. Also present was Lester Leutwiler, the original Chief Illiniwek. After the pep rally was the Illini Union Board's presentation of "The Wiz".

Saturday began with a pre-game tent party at the west tennis courts near Memorial Stadium. The tent party featured several distinguished alumni such as Max Abramovitz, the architect who designed the Assembly Hall and Krannert Center for the Performing Arts, a 1929 graduate; Barton Cummings, a member of the Advertising Hall of Fame, a 1935 graduate; and James Reston, a two-time Pulitzer Prize winner and recently retired New York Times columnist, a 1932 graduate. Many others were present as well.

The highlight of the weekend was the Homecoming game in which the Fighting Illini outscored the Minnesota Golden Gophers 27-17. Quarterbacks Peter Freund and Scott Mohr combined for three touchdown passes, and placekicker Doug Higgins kicked two field goals, including one for 52 yards.

Homecoming was, indeed, a celebration of many colors, well, actually only two colors, combining the spirits of old and new Illini. This combination of Illini pride and tradition made Homecoming 1987, "Illini A-Chief-Ment" a truly unique experience.

Student Life
What's Happening?

Where can you find out what's going on around campus? Besides the usual places, there's one source of information most students never really consider even though people see it several times a day. The source is the chain of bulletin boards located throughout campus on almost every floor of every university building.

Flyers posted on bulletin boards range in size, color, and topic. Typical subjects include announcements of meetings for various organizations, apartment sublets, fraternity parties, and trips to foreign countries. Other subjects announced on the boards include concert tickets either wanted or for sale, tutoring offers, upcoming rallies and campus speeches, company presentations and interview schedules, Illini Union Board events, appearances by local bands, and more.

A campus ride board is located on the second floor of the Union, which, along with those in residence halls, tries to bring people needing rides together with people wanting passengers. There is also a similar bulletin board for people needing apartments and those trying to sublease.

On the fourth floor of the Student Services Building, there are glass-enclosed bulletin boards filled with jobs currently available to students. The jobs are classified as either sales, conventional (office) work, yardwork, babysitting, or general restaurant work.

For several years, the lower level of the Undergrad Library has had a "question board" located inside and just to the right of the doors. If students have questions on any topic, they can write their questions on pieces of paper and post them on the board. Later, graduate assistants go about finding the answers to these questions through various library resources. When the answers are found, they are posted on the question board along with the original questions.

At the University of Illinois, information is everywhere. It's just a matter of knowing where to look to find it.

Halloween is orange. It’s the perfect Illini holiday.

Students at U of I gear up for Halloween days ahead of time, like little kids anticipating bags full of candy. Rather than bags of candy, however, students anticipate the greatest, largest, and wildest party of the year and make plans to be there with several friends from other campuses.

Residents and store owners, especially those on Wright, Sixth, Daniels, and John streets, anticipate bother, annoyance, and probable damage. They needn’t have worried this year, however, as the celebration, unlike those of past years, was quite amiable rather than violent, and more relaxed rather than rowdie. The costumes, however, were another story.

If you dressed as a California raisin, you blew it on the originality scale. Clerical costumes, such as nuns, priests, and popes were also quite popular. Also present were the old standards, those costumes common to almost every Halloween party: guys dressed as girls, Gumby’s, and the traditional witches, clowns, and ghosts.

Officers from the state, Champaign, Urbana, the University, and the county combined to keep the celebration under control. Officers agreed that problems were minimal in comparison to past years.

Of course not. Who would want to ruin the world’s greatest, largest, and wildest party of the year?

You’d Better Shop Around

It was great to move out of the residence halls. No more community bathrooms, no more neurotic roommates, no more “leg of surprise” for Friday night dinner. Maybe they thought we were too happy from Happy Hour to notice, but “leg of surprise” posed a serious threat to one’s post-Happy Hour digestion. Who couldn’t notice that?

One of the best things about moving into a house or apartment is creating your own food. No more guesswork in the dorms. No, it’s time to do your own cooking. It’s time to burn your own bacon instead of letting the dorm cooks do it for you.

There’s an unfortunate law of experimental cooking, however, which insists that you shop before you cook. Shopping, incidentally, is a great way to meet some interesting people. They’re out there, roaming the aisles of Jewel, cramping their carts with cans and boxes undeniably indicative of their personalities.

“We met at the grocery store,” you may tell little Junior someday about your spouse. “We both grabbed for the last box of Grape Nuts. We ended up sharing it,” you say with a dippy smile on your face.

Sad and strange, but certain. You could meet the love of your life over a box of Grape Nuts. It’s not Romeo and Juliet, but what’s wrong with Aunt Jemima and Uncle Ben?

Watch what people buy and how they shop. First, there’s “Gourmet Greg,” who spends an entire evening in the foreign food aisle planning international meals for every night of the month. That same person, however, will probably forget something essential, like milk. How can you possibly make an egg roll without milk?

“We both grabbed for the last box of Grape Nuts. We ended up sharing it...”

Over in the frozen food section is “Microwave Mike”, who is busy conjuring up meals that will equal Greg’s in originality, but will take him less that five minutes to cook. Microwave French fries, microwave French bread, and microwave quiche all add up to an international meal, via le microwave. If you can’t shop alone, shop with “Coupon Carrie.” She never forgets anything. She was one of those kids who loved to go shopping with Mom. Mom taught her that it is very important to have each of the four food groups equally represented in her shopping cart. Carrie has a system. She strolls confidently up and down the aisles, tapping items into her calculator, keeping a watchful eye open for those tricky unadvertised sales, and clutching her briefcase full of coupons. As you may have guessed, Carrie is pretty annoying. However, she knows what she’s doing and chances are, you don’t.

“Junk-food Joanie’s” cart is splitting at the seams. She has to bring her boyfriend with her so he can push the cart. He also helps her reach for the five most elevated bags of pretzels on the stack. Joanie lives on Oreo cookies dipped in ready-made fudge frosting, but supplements her diet by eating her roommate’s vitamin C. She’s the one you hear asking the checker, “Can you pack it all in one bag? I’m walking.”

Now we know why our mothers hated grocery shopping. Now we know why our mothers insisted that a 16 year-old bagger had devil horns growing out of his head. Shopping is a nuisance. We overspend. (“That will be three hundred dollars and eighty-six cents, please!”) We forget things (“I forgot to get noodles for the spaghetti!”) And worst of all, we may even start to yearn for Friday’s “leg of surprise.” After all, who feels like shopping after happy hour?

Guys and Dolls

A nightclub stripper named Miss Adelaide has been engaged for 14 years. In order to win a bet, Sky Masterson, a professional gambler, has to take a Salvation Army mission worker to Havana for dinner.

Where are these scenarios taking place? On the stage of the Festival Theatre at the Krannert Center for the Performing Arts. The play is Frank Loesser’s “Guys and Dolls”, adopted from a short story by Damon Runyon.

The play, performed by the Illinois Opera Theatre, ran for four shows September 11-12 and 18-19 as well as four shows in July.

Nathan Detroit has put off his impending marriage to Miss Adelaide for 14 years in order to continue what his followers call “the oldest established, permanent floating crap game in New York.” However, the marriage becomes a reality when Nathan’s followers are questioned by the police detective, and the gamblers use Nathan and Adelaide’s impending marriage as an excuse for getting together. Actually, they were waiting for Nathan to tell them where his crap game was going to be held.

To promote his latest crap game, Nathan bets big-time gambler, Sky Masterson, $1,000 that he can’t take the next girl he sees to Havana, Cuba. Sergeant Sarah Brown, a reformer at the Save a Soul Mission in Times Square, happens to be that next girl.

The chances of these two unlikely couples ending up together are slim, but in the end, love and the desire for marriage and respectability prevail.

After betting Nathan’s followers for their souls, and keeping the Save a Soul Mission in business, Sky marries Sarah and forgives his life of sin to join her as a worker at the mission. Nathan and Adelaide are on their way to the altar as the curtain falls.

The stars of “Guys and Dolls” in its Krannert performances were Steve Carlson as Sky Masterson, Kelly Ellenwood as Sarah Brown, Greg Whalen as Nathan Detroit, and Stacy Simons as Miss Adelaide.

The play was directed by Dwight Bowes and choreographed by J.C. Sealy. The musical conductor was Dr. Joe Grant.

The cast played to a near-capacity crowd of approximately 900 at each of the eight performances, making “Guys and Dolls” a very successful “musical fable of Broadway”.

above Sarah Brown and the Save-a-Soul missionaries try to convert another sinner. Upper right: Sky Masterson tries to convince Sarah to go out for dinner--in Havana. Right: Miss Adelaide and Nathan enjoy drinks after the show far right: “The oldest established permanent floating crap game in New York.”

Cloud 9

"Cloud 9" used farcical methods to comment on serious and disturbing social issues. Written by Caryl Churchill and directed by Cynthia White, the play deals with the problem of sexual oppression during two different time periods in two different settings.

Act One is set in Africa in 1880, a time and setting perfect for demonstrating the extreme gender differences created by society and the taboos surrounding sexual awareness. The plot revolves around a family consisting of a father, mother, son, infant daughter and mother-in-law; its slave; a female neighbor; and a visiting male friend. The plot unfolds to show the confusion of several of the characters regarding their sexual identities and one character's denial of his ethnic heritage.

The second act finds the characters in London in 1980. The characters, however, have aged only 25 years. It is quickly realized, through action as well as conversation, that the questions and confusions of 1880 have changed very little in 100 years. The difference is that they are more easily and overtly approached, and people are not nearly as ashamed of their sexual identities.

The confusion of the characters came through not only in the plot and script, but also through the structure of the play itself. For instance, in the first act, the mother was played by a man. In the second act, that same man played a male homosexual. In the first act, the son, who discovered his homosexual tendencies at a young age, was played by a grown woman. The same woman who in the second half played the infant daughter, is now a wife and mother just becoming aware of her lesbian inclination. The Black slave was played by a white man, and the peasant governness and affluent neighbor were played by the same actress, who took over the role as the mother in the second act. The four actors and three actresses gave superior performances in their challenging portrayals of several roles.

This pattern of multiple roles for the actors and actresses was originally attributed to lack of performers for the parts. The very confusion this created, though, yields support for the theme of the play. That is, individuals should be aware of their sexual identities, regardless of whether it violates the norms society has created. This serious message is difficult to convey because of its sensitivity. By making the audience laugh, however, Churchill and the performers lightened the message so the audience would be able to view it in its basic nature.

Above Clive (Bruce D. Orendorf) secretly charms his mistress, Mrs. Sanders (Kim Werkman). Upper right Maud (Lin Mundell), the mother figure of the first act, surveys the confusion of her family. Far upper right Clive takes good care of his infant daughter, Victoria (as herself). Lower right Betty (Bob Borwick) gets dipped into a romantic kiss by her secret lover, Harry (David Clements).
The Marriage of Figaro

Wolfgang Amadeus Mozart's opera, The Marriage of Figaro, written in 1786, is based on the play by Beaumarchais in 1778. Written on the brink of the French Revolution, the play was banned for several years because of its political nature. Lorenzo da Ponte, the text writer for Figaro, edited the text of the opera in order to remove the controversial material so it could be performed in Vienna.

Since that time, The Marriage of Figaro has grown in popularity, and today it is performed throughout the world. On November 13-14 and 20-21, The Marriage of Figaro was put on by the Illinois Opera Theatre in the Festival Theatre at the Krannert Center for the Performing Arts.

Figaro, the Count's valet, is preparing to marry Susanna, the servant of the Countess. The Count has abolished his feudal right to be with Susanna on her wedding night, but he wishes to make an exception in this particular case. The Countess is upset over the state of her marriage and her husband's infidelity, so she devises a plan with Susanna in order to catch her husband red-handed. In the end, Susanna and Figaro are married and the Count pleads for his wife's forgiveness, which the Countess grants him.

The opera involves many more characters such as Cherubino, the young page who is infatuated with the Countess; Antonio, the gardener; Barbarina, the gardener's daughter; and Marcellina, a woman to whom Figaro owes money but turns out to be Figaro's mother. The plot is rather complicated, but the music succeeds in making the opera extraordinary, giving the characters their own distinct personalities.

With Mozart's unmatched talent for bringing his characters to life through music and his ability to make ordinary events magical, it is no wonder that even though it has been nearly 20 years since his death, his operas are performed more frequently than ever.
U2 may have rocked the rafters at Assembly Hall, the Other Guys might have kept 'em laughin' at Foellinger Auditorium, but on January 29, a lesser-known group, the Andreas Trio, brought a different kind of entertainment to the Krannert Center for the Performing Arts. Playing a variety of selections from composers such as Franz Joseph Haydn, Franz Schubert and Maurice Ravel, the trio delighted the audience who had gathered inside Krannert's Foellinger Great Hall.

The trio is made up of music professors who, in addition to having played at Krannert once before, have played in other cities. The group formed about three years ago, when the three members were having supper together and began playing various selections of German music.

"We've played together ever since," said Peter Schaffer, the trio's violinist. Schaffer is accompanied by Tsuyoshi Tsutsumi, cellist, and Ian Hobson, pianist. All three also perform in individual concerts.

Schaffer said the trio is becoming better known, especially since their recent acquisition of a name. The trio named themselves after the first name of Schaffer's violin. The Andreas Trio hopes to continue performing at least once and possibly twice a year at Krannert as well as playing outside performances.

Krannert Center
Whether you're catching a show at the Colwell Playhouse or eating cheesecake at the Intermezzo, a trip to the Krannert Center for the Performing Arts is always enlightening. KCPA is a place where one can go to experience the culture and creativity that not only exists, but was born on this campus. The many concerts, plays, operas, and cultural events that come to life inside Krannert's many walls reflect the depth and breadth of student talent.

The shows are primarily run and performed by U of I students. However, many of the past performances have proven that KCPA shows go beyond the level of student acting and directing. For example, KCPA is one of the few places to have experimented with Kabuki theater, a form of Japanese theater that involves heavily made-up actors, prominent scene designs and annunciated speech patterns.

In addition to the many cultural events, KCPA can be a fun place to hang out between classes. The Promenade Gift Shop can keep you busy looking at or buying the various souvenirs and novelty items. If it's calories you're after, Intermezzo carries virtually every type of pastry known to mankind.

Aside from the commercial uses, KCPA can be a neat place to wander or sit in solitude. The beautiful architecture and solemn atmosphere is conducive to both studying and daydreaming. For those people who treasure a quiet place to get away from it all, the rooftop of KCPA is a little known hideaway.

It's Just a Walk in the Park

If country within a city came in the form of parks, Champaign-Urbana would have over 865 acres of country within its boundaries.

The Champaign Park District operates 36 park totaling 465 acres and the Urbana Park District operates 20 parks which total over 400 acres.

Centennial Park, which is one of the major parks in Champaign, has a swimming pool and waterslide, along with a children’s farm, tennis courts, ball fields, soccer fields, horseshoes, and sledding areas. It also has playgrounds, picnic tables, grills and shelters.

Other major parks in Champaign include Dodds Park, Hessel Park, Morrissey Park, Spaulding Park, which also has a swimming pool, and West Side Park. Kaufman Lake in west Champaign offers fishing and non-motor boating. Closer to campus is Scott Park, located on the corner of Springfield Avenue and Third Street. It boasts a fitness area and self-leading trail.

In Urbana, one can find the 63-acre Busey Woods, which has nature trails, and Blair Park with its lighted tennis courts and shuffleboard areas. Other major Urbana parks are Carle Park in the east campus area, the 130-acre Meadowbrook Park, Woodland Park and Crystal Lake Park.

Crystal Lake Park was recently renovated and now includes a swimming pool, nature center, lake house and deck, and cafe. Paddleboats, canoes, rowboats, and tandem bicycles can be rented in the summer as well as ice skates and cross-country skis in the winter. Crystal Lake is stocked with bluegills, catfish, and bass and has a boat dock and fishing piers. The park also has a fitness trail, playgrounds, picnic areas, ball fields, and a volleyball area.

Out-of-town parks include Allerton Park, which has formal gardens, hiking, statuary, and cross-country skiing. Allerton Park, a part of the University of Illinois, is known for its scenic beauty in the winter when the snow covers the statues and sculptured shrubbery.

Lake of the Woods in Mahomet has swimming and boating areas and also a covered bridge. Kickapoo State Park is about 30 miles east of Champaign-Urbana and is home to some of the more scenic lakes formed by strip-mining in Illinois’ early coal mining days. Kickapoo also offers horseback rides, canoes, rowboats, and fishing.

The parks in Champaign, Urbana and the area surrounding them are great places to get away from the fast-paced life on campus and relax in the quiet of a country setting.

"Flintstones, Meet the Flintstones. They’re a modern stone-age family. From the town of Bedrock, it’s a place right out of history." Have you ever caught yourself humming this familiar tune while sitting in a class or walking through the Quad? Maybe that’s because it’s a favorite of some of the students who assist in playing the chimes in the Altgeld bell tower.

Chimes Concerts are held from 11:50 to noon and 12:50 to 1 p.m. Monday through Friday. Special concerts can be arranged throughout the year. In the past, concerts have been held for Quad Day, Homecoming Week, and the night before Graduation.

Albert E. Marien has been the main man behind the chimes for the last thirty years. He was first invited to play concerts when he came to the the university in 1958 as a Professor of Commerce. He has, since then, served as a volunteer chimesmaster and continues to do so despite his retirement. He tries to do at least 2 concerts per week.

Sue Wood, head associate chimes player, has been playing since 1971. She also serves as a carillonneur at University Lutheran Church on campus. She plays at least three concerts a week and fills in whenever necessary. Marien and Wood are assisted by volunteer students. At present, three students are giving their time to chimes playing.

In addition to the theme from Flintstones, the chimes players play a mixture of U of I and Big Ten songs, folk music, church songs, and excerpts from classics. “Hail to the Orange” is played at every concert. Each of the players has his or her own favorite songs. According to Wood, “You can usually tell who’s up here by the songs being played.”

Though only one person is needed to play a concert, the students sometimes play duets. The chimes keyboard ranges from a low D to an upper G. The players, in a room directly below the tower, control the bells by pressing on large keys with the palms of their hands. The ringing of the chimes at certain intervals is controlled automatically inside the tower. Marien said the tower has an “open door policy”. He encourages anyone to climb up the stairs and listen whenever a concert is being performed.

Afternoon Serenade
Saving Lives

Saving a human life, one of the most important things a person can do, doesn’t always require a degree in medicine. Any healthy person can do it, not only once but several times a year, simply by donating blood.

Yet when most people are asked to donate blood, their faces scrunch up as pictures of Freddie Kreuger and Jason trying to stick a 10-foot needle in someone’s arm come to mind. They remember rumors they’ve heard about catching AIDS from donating blood. People often think they don’t have the time, or since their blood is a common type it’s not needed as much as rare blood types. All of these are misconceptions.

Donating blood is a relatively fast and painless experience, with the actual giving of blood lasting only 5-10 minutes. The other 35 minutes or so beforehand is spent registering the donor, pre-screening, medical screening, and then afterwards, the refreshment period. Blood is taken by trained professionals, and the hypodermic needles are small and sterile. No Freddie, Jasons, or 10-foot needles.

According to Therese Villegas, one of the co-directors of the Volunteer Illini Projects’ blood program, VIP has had a blood program since 1968. About once a month, VIP sponsors a blood drive at the Union, working with, and switching every month between the Champaign County Blood Bank (CCBB) and the American Red Cross of Peoria. The 150 or more VIP volunteers put up posters for the drives, help register the donors, and take care of donors after they have given blood.

Julia Hagle, donor relations director at the CCBB, said the University of Illinois has the strongest blood donating program nationwide. Last year, students donated 4,637 units of blood.

The CCBB takes precautions against diseases in blood donations for both the patients receiving the blood and the donors. Due to the numerous tests performed on the donated blood and the pre-screening of donors, the risk of a patient getting AIDS from receiving donated blood is about 1 in 100,000. Even the risks of a person being in a car accident or having a heart attack are higher than that.

Some people believe there is no real demand for their blood if it’s a common blood type. However, since their blood type is so common, it is always in demand. About 37.4% of the United States population have O-positive blood and 35.7% have A-positive blood type. That accounts for almost three-fourths of the entire nation having “common” blood types, resulting in the large demand.

Besides VIP, the CCBB blood drives are sponsored throughout the year by residence halls, fraternities, sororities, and other organizations. Donors can also donate at the CCBB, located on West University Avenue in Urbana.

Although the CCBB’s primary concern is to help meet the blood needs in Champaign-Urbana, they also try to “put resources in the area the resources came from.” Since a large number of U of I students are from the Chicago area, the CCBB is involved in the Chicago area’s Life Source program and helps with its blood needs as much as possible.

Giving blood can be very important to the lives of others. One single pint of blood can be broken down into component parts of red cells, plasma, platelets, and Factor-VIII protein, and can be used to help different patients with different needs.

So the next time you’re thinking about donating blood, don’t be fooled by misconceptions. Five minutes of minor discomfort for you can lead to years of life for someone else. Isn’t it worth it?

story by Michelle Andrich

Student Life 53
Did You Know There are Museums

Believe it or not, the University of Illinois has museums and galleries on campus for those people interested in "getting lost in a little culture" for an hour or so.

The World Heritage Museum is located in room 484 of Lincoln Hall. It features different permanent and semi-permanent exhibits throughout the school year. In the fall, the museum featured an exhibit called "In Search of Ancient Egypt" which included a variety of artifacts and copies of sculptures from the period. An exhibit called the "The Spirit of Islam", which showed an overview of Islamic life from Mohammad to the present, was also featured.

In the spring, the museum displayed an Olympics exhibit which dated back to the first Olympic games held in 776 B.C. The museum also featured a diorama exhibit called "Man’s Venture into Culture" which traced the history of man back to caveman times.

According to Carol Kanauss, the museum’s director, many people who have classes in Lincoln Hall every day don’t even know that the museum is there, or that it has been since 1911.

The museum is open from 9 a.m. to 4 p.m. on Monday through Friday and from 2 p.m. to 5 p.m. on Sunday for all those interested in ancient culture.

Moving from the ancient to the extinct, the Museum of Natural History, located on the third and fourth floors of the Natural History Building, has many different types of exhibits to offer. The museum features several permanent displays of the histories and major discoveries in the fields of anthropology, botany, geology, and zoology. This fall it featured a temporary display called "Our Ancestors in Africa" which chronicled some of the major anthropological discoveries of the day. The museum is open from 9 a.m. to 4 p.m. daily.

Interested in “getting lost in a little culture”?

The John Philip Sousa Museum is located on the second floor of the Harding Band Building. The museum features personal memorabilia from Sousa’s life, most of which was donated to the University. Sousa was known as a March King in his days of conducting. He donated one-third of his music to the U of I band.

The Illini Union Art Gallery, located on the main level of the Union, features the work of various artists throughout the year. The shows are primarily the work of non-university students although two shows a year are reserved for students. A student photography competition in the fall and an oil and acrylic studies competition in the spring are held every year, and the winning entries are displayed in the gallery. The Illini Union advertises in art magazines for artists to display their work and a gallery committee chooses among the entries for the regular shows.

The Krannert Art Museum displays the works of art students and faculty members, including their paintings, drawings, and sculptures. Most of the work is modern art. Students can call the Krannert Art Museum to find out about special exhibits.

on Campus?
T
here are more than 144 disabled
students at the University of Illinois
who are in school for the same reason
as everyone else--to take on chal-

lenges.

Whether their disabilities confine
them to wheelchairs or impair their vi-
sion or hearing, these students are far
from handicapped.

Disabled students are active on
campus in everything from intercol-
legiate sports to serving on various
committees of Delta Sigma Omicron
(Disabled Students Organization),
which has over 30 members.

One of the sports some disabled
students enjoy is wheelchair basket-
ball. There is a men's team, known as
the Gizz, and a women's team, the Ms
Kids. Both compete against teams
from other universities. Men's wheel-
chair basketball started at the univer-
sity in 1948, and the women's team was
formed in 1973. The game is played,
with some minor adjustments, accord-
ing to NCAA basketball rules.

Other disabled student sports in-
clude football, swimming, track and
field, field, ping pong, and archery.

For the disabled student, being ac-
tive isn't just restricted to sports. The
Disabled Student Organization mem-
bers participate in fundraisers such as
the annual spring Wheel-A-Thon, bake
sales, and obtaining corporate con-
tributions, all to help support the club,
its activities, and the sports teams.

Members also serve on D.S.O. com-
mittees such as the architectural bar-
rier committee which is a sounding
board for students who have come
across inaccessible buildings. This
committee then goes through the
appropriate channels to try to amend
the access problem.

Inaccessibility, however, is not a
problem of the university residence
halls and especially not of the Beck-
with Living Center, located on the cor-
ner of Second and John Streets. This
center is a university residence hall for
18 students with severe physical dis-
abilities and has a staff on hand at all
times to help the students.

According to Dana Young, senior
and president of D.S.O., the students
here have been warm, receptive, and
helpful. Help, however, should not be
confused with pity. Opening a door for
a disabled person is helpful and
appreciated. "But," Young says, "no
one wants pity." Young feels it's his
responsibility to make others more
comfortable with him and his situation,
because the main point everyone
seems to forget is, as he puts it, "Basi-
cally, we're all the same on the inside."

above The rehabilitation center has many diffe-
rent kinds of equipment available for physical
therapy. upper left On the Quad, lower left Spe-
cially equipped buses transport students around
campus.

Half-time Highlights

For those students who don't know the difference between a safety and a field goal, the halftime show may be the most exciting part of a football game.

Block I provides some of the entertainment during halftime with card stunts and cheers performed by 1100 enthusiastic students. The Block I section is located in the lower stands near the 50 yard line. The 26 members of the Block I committee stand on the field directly below the block and direct the stunts and cheers.

Block I is coordinated and run by the Illini Union Board, whose members then appoint the committee. Committee members are responsible for distributing materials before the game and for planning and coordinating many of the halftime stunts. Some of the card stunts feature characters like Gumby, Max Headroom, Opus and Mr. Bill. In addition to the card stunts, which usually begin five minutes before halftime and end five minutes after, Block I coordinates different cheers throughout the games.

Penny Deligiannis, chairperson for the Block I committee and a first year graduate student in speech communications, called 1987 "the year of Block I."

"I think this season has really been going great," she said.

Deligiannis said she was pleased with the students' responses and with many of the new ideas the Block I committee had during the 1987 football season. Nine of the 10-15 cheers performed were new, and students in Block I were encouraged to try other new stunts like "tiny bubbles in the Block." The committee also made plans to include over 10,000 fans seated in the horseshoe in a giant card stunt for the Illinois v. Michigan game, the last game of the season.

The 1100 fans in Block I are given pom pons, capes and instructions on how to use the eight different colored cards they receive. Every stunt is numbered, and as the numbers are called off, students hold up the corresponding cards.

The Block I committee works along with the band to make sure the card stunts correspond with the songs played during halftime. Some stunts even make use of the names and mascots of the opposing teams.

Students in Block I have differing reactions about the experience.

"You get to meet a lot of fun people and you have the best seats in the stadium," said Paula Henderson, junior in applied life studies.

"I'm a real football fan, so I hate when the cheering gets in the way of watching the game," said Paul Medendorp, junior in engineering.

"But I think it's neat that even though they might complain about it, everyone always participates."

layout by Debbie DiMaggio
What can you think of that’s low in calories, sodium, and cholesterol, high in nutrition, and yet still tastes great? You probably don’t think such a thing exists, but it does. The answer is frozen yogurt.

Although the word yogurt is frightening to some, and is defined by Webster’s Dictionary as “fermented milk food”, it is really not as bad as it sounds, and frozen yogurt is even better. It’s as cool, smooth, tasty, and creamy as ice cream, but has about half the calories and 80 percent less fat.

Last year was very feverish for the frozen yogurt industry. As some frozen yogurt places left Champaign-Urbana, others emerged. TCBY—the Country’s Best Yogurt, located in Lando Place Mall, is in its second year on the University of Illinois campus. TCBY offers 28 flavors of frozen yogurt including chocolate, vanilla, and strawberry shortcake, with a variety of toppings. They serve the yogurt in different forms, from the traditional frozen yogurt in a waffle cone to shakes, crepes, pies, sundaes, and even Belgian waffles.

One ounce of frozen yogurt has only 29-41 calories.

Also, if you are calorie-conscious, you don’t have to worry about having that extra scoop. One ounce of frozen yogurt has only 29-41 calories, and even the Belgian waffle has only 397 calories. But most importantly, while frozen yogurt has vitamins, nutrients, and calcium, it still tastes delicious. (When’s the last time you said that about your spinach?)

Ice cream parlors around town such as Baskin-Robbins and Delight’s have noticed the potential of this new craze, and have begun offering their own versions of frozen yogurt treats. Even Yoplait is marketing a soft-serve frozen yogurt in our nation’s grocery stores.

Frozen yogurt is ice cream’s newest and strongest competitor. Best of all, beside its nutritional and caloric advantages, frozen yogurt has, as TCBY claims, “all the pleasure and none of the guilt.”
Although most places on campus are within walking distance, there are many times when students don't have the time or energy to walk, especially when a whole world of products and services is as close as the telephone.

Feeling a little bit hungry? Just open the Yellow Pages and an entire menu of feasts awaits your phone call. By far, the most popular delivered item is the famous Italian delicacy, "za". There are over a dozen pizza places around campus that deliver. Some have free delivery, but others charge for the service. Still others require a minimum order before they will deliver. Some places pride themselves on fast delivery, and even guarantee it. Others have delivery times as long as 45 minutes to an hour, but claim that the quality of their pizza is well worth the wait.

If your taste buds are asking for something a bit more exotic, try Zorba's gyros, Blimpie's subs, Jimmy John's gourmet sandwiches, or any of the wide array of Giordano's Italian dishes, from lasagna and spaghetti to mostaccioli, tortellini, and ravioli. Delivery services don't stop with restaurants. Looking for the right gift for that special someone? You don't have to spend countless hours going from store to store. Simply pick up your phone and send someone a singing telegram, or bouquets of flowers or balloons.

Is your room buried under piles and piles of dirty clothes? Don't send them to Mom via UPS, just call Suds City laundromat. They are willing not only to wash your clothes, but for just 10 cents per pound over the cost of their drop-off service, they will pick up, wash, dry, press, fold, and deliver your laundry, just like that. No more laundry blues or hassles. One call is all it takes.

So the next time it's cold and dreary outside and you really don't feel like walking, or if you don't have time to waste cooking, shopping, or doing laundry, don't worry. Just open the Yellow Pages and, as the saying goes, "let your fingers do the walking."

Below Campus wouldn't be the same without the many delivery services. Upper right Garcia's even delivers by the slice. Right flowers are popular, especially around Valentine's Day. Far right You can even get your laundry sent out to be done!
Do The Walking

END A BOWL OF GOOD WISHES

photo by Michelle Roller
Work, work, work. It's not just classes. It's not just the exhausting task of having to be at Happy Hour by 3 every Friday. It's real work, a real job. Whether students are working for extra-curricular activity or to pay their own tuition installment, the diversity of jobs available on campus is encouraging to any student who plans to make a little extra money.

The most popular job on campus is Domino's, its most popular pastime: eating, or more precisely: pizza. The pizza places on campus, such as Domino's, Garcia's, and Pizza World, provide many jobs for students including delivery persons, pizza makers, waiting, waitresses and cashiers. Although these jobs may sound easy, try working a Domino's on a football Saturday, just try to order a pizza from Garcia's during finals week. You'll find out the pressure at these places is comparable to the pressure of finals week itself--too much to do, too little time.

The work hours at a fast-food place definitely leave something to be desired. If an employee has seniority, which in most cases constitutes a semester of experience or more, he or she probably gets pretty good hours that won't completely destroy a weekend. If you're new on the line, however, count on working the 9 p.m. to 3 a.m. shift for your first several weekends. Somebody has to do it, and it's usually the new guy.

Other jobs on campus include jobs with the university, such as assisting a professor or filing papers in the financial aid office. Food service is a convenient job for those living in the dorms. Creative jobs are available up and down Green Street such as painting tee-shirts or lettering picture frames. If you like retail work, Marketplace Mall is filled with stores with various sales opportunities.

Having a job can be a great experience. It takes your mind off school for a while and pays you for it. In most cases it only pays minimum wage, but even this helps out with the phone bill. One of the best advantages of having a job is the opportunity it provides for meeting people. You immediately have something in common with coworkers and, chances are, complaining about work together will eventually lead to other forms of social activity. On a campus this large, you have a great chance of finding a job you could both learn about and enjoy at the same time.

It's December tenth—the day before the last day of classes. Your term paper, you remember the term paper, don't you? The one that was assigned in September? Well, it's due tomorrow.

What do you do? It's six o'clock, so you decide to fix supper first. You don't want to waste too much time because you have to get to the library, so you prepare macaroni and cheese. You spend an hour eating dinner and watching "Cheers" and "WKRP in Cincinnati" reruns.

It is now 7 p.m. and you're ready to walk out the door to go to the library. Just as your hand touches the doorknob, your mom calls. You have no choice but to talk to her. You certainly can't tell her that you have to research and write a paper in one night because you've been too lazy to do it all semester. After an hour of hearing that the dog misses you and your dad and brother are driving your mother crazy, you tell her that you really have to get off the phone.

Your roommates leave with you; they're off to the nearest bar for some pre-final partying. You resist temptation and get to the library at 8:30. You search for the Periodical Guide with the date you need. Luck is with you and you find it in 10 minutes. You copy eight sources because you know you'll probably find only four of them. Four sources are sufficient for this five-page term paper.

You begin your search for these invaluable sources. You wander through the maze of periodicals, hoping that no inconsiderate student has torn the pages out that you need. Your first stop is at the Newsweek section where you find the date you need. As your heart races, you flip through the pages to see if the entire article is there. A feeling of triumph washes over you. You have found your first source.

Things are going well. This paper should be done in no time. You head over to the "T" aisle to pick up the next source. You stand there with six other students, grabbing the dates you need. You nab one only to find that the entire article you want is ripped out. Not to fear though, TIME is on microfiche.

You're not too happy about that. Why should you have to pay the outrageous price of 25 cents per page to photocopy the microfiche just because someone stole the original pages? Since you don't have time to wait for someone to photocopy it anyway, you read it and take notes. This is even better because you are forced to start thinking about your paper topic.

You find your last two sources with no problem. You take out your handy list of photocopying card and make the sources permanently yours. You can actually take them home.

Now it's time to rack your brain. You have to come up with a sophisticated, concise, rhetorical essay. But you need some stimulation. It's almost 10:30 and you're getting tired from this high-stress project. Depending on your style, you will either go to the Daily...
Paper Was Due

Grind or I-HOP to drown yourself in coffee. You may even stop in at 7-eleven for a package of No-Doz. Finally, after several hundred milligrams of caffeine begin coursing through your veins you begin to feel perky. Now you can think.

With your roommates gone, you have the blessing of silence. You pick up your pen and words magically appear on the paper. A half-hour passes; you finish one page. An hour passes; your hand begins to cramp. Time for a break. By this time your happy roommates have come home. For entertainment, you go visit with them before they go to bed. They already know you will be typing long into the tree hours of the morning, so they don’t kill you if they hear it. It’s 1 a.m. Your all-nighter has begun.

You resume writing again, damming yourself for procrastinating. You really ought to have read that McKinley handout on overcoming procrastination. Laughingly, you remember your father’s joke about the man who was going to join a procrastinators club, but never got around to it.

It’s three a.m. You have enough pages written to satisfy the five-page minimum requirement. Like a good student you read it over, correcting unintelligible sentences. You’re satisfied, or at least as satisfied as you could be at 3:30 in the morning.

It’s time to type. It’s a good thing you have some Mountain Dew in the refrigerator to keep you going. If you are lucky, you can type fast with no mistakes and be done in one hour or less. But you want accuracy. You don’t want your paper to look like it was typed at four in the morning which, of course, it was, but you don’t want your prof to know that.

By the time you finish typing, it’s close to 6 a.m. You can either go to bed for two hours or take a shower, eat breakfast and watch TV until your nine o’clock class. Staying up is the safer route. If you do go to bed, you may never wake up, therefore blowing an entire night’s work.

At 9:00, you set your masterpiece on the professor’s desk. Relief and a sense of accomplishment wash over you as you nestle into your seat, waiting for the bell to ring so you can go back home to bed.

Love Connection

There are a lot of couples out there in the Quad. Are they brothers and sisters? Friends? Are they dating? Are they engaged? Have they just met?

Men and women relate to each other in a variety of ways. Most college students find themselves classified as either a "dater" or as a person involved in a long-term relationship. An informal survey revealed that there are various pros and cons to both. As noted in the Chicago Tribune's "Tales From the Front" feature, which is dedicated to stories about relationships, each person has his or her opinion on the subject based on personal experience. As predictable as it may seem, an all-encompassing generalization shows that most males prefer dating and most females prefer long-term relationships, though there are exceptions in both cases.

"I prefer dating right now," says Tom Diskin, junior in LAS. "I'm too young to be ed down." Diskin's roommate, Bob Haluk, senior in LAS, agrees. "If we go out more than once, great. If we don't, no big deal."

Dating is a good thing because it allows you to meet all kinds of people and experience many different things, says Margaret Wilson, junior in LAS, who happens to be engaged to be married. "Guys will spend more money on you if you're just 'dating,'" Wilson added, providing an economic view to the subject.

There are those who prefer the security of a long-term relationship, males and females alike, as long as the relationship is not stifling. "Once you get used to something, it's hard to get used to something else," says Laura Putz, junior in engineering. "Dating only lets you skim the surface of a person," adds Putz. "Long-term, you really get to know somebody."

Steve Caracci, junior in engineering, has similar views. "Dating is a big hassle," Caracci says. "You always have to be on your best behavior." Caracci said he believes everyone should experience at least one long-term relationship because it is a positive learning experience.

Wilson said she feels comfortable in her long-term relationship. She says, "He is always concerned about my well-being when others are not. He always has my best interest at heart."

One problem many "long-termers" find in common is dividing time among friends and boyfriend or girlfriend. Long-termers don't want to lose their friends by giving all of their time to their "significant other." Often, long-term relationships cause people to become overly-conscious of who is getting the most attention in their lives. The most successful long-term relationships are those in which both the male and the female make an effort to spend time with friends as well as each other, and not feel insulted because of it.

College is the right time to decide which you prefer. At what other time in your life will you have 34,000 people of your own age group within such a small area from which to choose? Your own experiences will dictate your own pros and cons. You decide.

Dear John,

Class is such a bore! What's up?
Can you say “Boredom”?

“Can you meet me for breakfast tomorrow at 9?” Angie said.
“Sure. Meet me on the steps outside of Foellinger,” Colleen replied.
“Okay. I’ll bring the donuts.”
“Great. I’ll bring the O.J.”
“After breakfast I have to finish my &TW rough draft, so don’t bug me, kay?” warned Angie.
“No problem,” said Colleen, “I’ll be sleeping.”
It’s a standard case study. Angie and Colleen have just completed plans or what might actually be the most productive hour of their respective days. Angie will get her rough draft done, Colleen will catch up on her sleep. Econ 101 lecture. It’s a daily average.
A lot of us have taken Econ 101, some of us unfortunates have taken it twice. It’s not the nature of the class, it’s the nature of the lecture.
For those of us who have not-so-bond memories of Econ 101 (“Egads!”), it’s easy to single out that one course. But let’s be fair. There are other lectures of comparative fame: Speech Com 178, Poli Sci 100, and many others. These classes all demonstrate quality note-taking time being deliberately misused. Shame on you.

Studies show that University students who appear most rested are enrolled in at least one large lecture.

Studies show that University students who appear most rested are enrolled in at least one large lecture. (Please remember that “enrolled” is a very loose term.) Most girls with carefully groomed nails likewise admit attendance to one or more large lectures. These girls tend to take their own section in the back of the balcony so the polish fumes will not disturb their sleeping classmates. Many long-distance relationships owe their success to large lectures, which give boyfriends and girlfriends 50 minutes to write letters. And how many people would actually read the “Daily Illini” if it weren’t for the compulsion of a boring lecture?

Professors, don’t take offense. After the first hour, we wise up. We find we don’t need the extra sleep. We’ve bitten all our nails off anyway, our long-distance lovers found new loves, and the DI just isn’t worth it. Besides, we failed the hourly.

It’s amazing, but it’s true. That professor might actually be yammering about something you need to know for an E-X-A-M. And you’re not going to find what he’s saying in the personal column. So listen up! And if you can’t do that, at least bring your professor a donut.

"Lost on Jeopardy, baby." These musical and somewhat humorous words by Weird Al Yankovic sum up America's idiotic passion for a pastime which has been around as long as television-game show watching.

Why does America love the art of game show mystique so much? Maybe it's because it gives them that same glorious feeling one gets from being an armchair quarterback or a back seat driver.

"Don't buy another vowel, you idiot!"
"I could have named that tune five notes ago."

Yes, it's that heavenly feeling of beating the contestant to the prize. "If I'd been the contestant instead of this lamebrain, I'd have won the trip to Europe and the BMW." I've actually seen a dorm lounge full of college students brave the nerve-wracking Jeopardy theme music just to show off their knowledge of Lithuanian folk music and Ancient Lebanese pottery.

Another reason for America's interest in game shows might be because it's a chance to see normal, everyday Americans make fools of themselves on national television. One can only wonder if game shows audition contestants on the basis of their ability to jump up and down, scream bloody murder and molest the game show's host. Having a large family willing to run up on stage is also an added bonus.

Think back and remember all the countless people who have sold their souls and their reputations to the game show idol. Let's give a round of applause to every geek, troll or mutant who ever appeared on Let's Make a Deal, the Gong Show or the Newlywed Game. Does everyone remember that ever-famous episode of the Price is Right when Bob Barker told some female contestant to "COME ON DOWN" and both she and her "Don't buy another vowel, you idiot!"

halter top compiled?

However, the true heroes of the game show tradition have to be those infamous hosts of past and present, those nimble-tongued men and women who breeze through their ritualized lines every single episode: "Put your hand on the buzzer and when you think you know the answer..."

Using sarcasm or sap, these performers have won their way into our hearts and made us contemplate such questions as "Why has Pat Sajak allowed Vanna to go on living?" and "Who the heck does that know-it-all Alex Trebek think he is anyway?"

Pat, Vanna and Alex head the cast of the hit game shows of 1988, hit meaning the networks actually have the confidence to show them twice a day. Nevertheless, no one will forget those stars from the past; Richard Dawson, who left Hogan's Heroes to become the kissing bandit of the networks; Monty Hall, who now runs a training camp for used-car salesmen; and Chuck Berris, who finally gonged his cheap tuxedo and vanished from the face of the earth. To all these heroes of the past, America owes its love and gratitude for the many cliches they have brought to our culture.

"Once you buy a vowel it's yours to keep."
"I'll take African deserts for 500."
"...or you can have what's behind Door 2."
"Where's the strangest place you've ever made whoopee?"

Thanks guys!

above Could it be "TALENT SCOUT"? I don't know, better buy a vowel. upper right Playin pictionary is the new tad at parties.

College students are known for their ability to eat anything, anywhere and at any time of the day or night. Typically, the menu calls for pizza at 2 a.m. or tacos after the bars close. But for those students who are the more adventurous types, there are bigger and better things available.

The Champaign-Urbana community may not be famous for its culinary delights but it certainly does have a lot to choose from. A U of I student wanting to give his or her tastebuds a break from the hazards of dorm food or worse—a roommate’s cooking, can scan the yellow pages and find a variety of restaurants serving different ethnic foods.

For those with a taste for Greek food, Zorba’s Greek restaurant serves the ever-famous gyros: beef sandwiches flavored with lamb and spices, served with tomatoes, onions and sour cream. Before the entree, diners can whet their appetites by ordering saganiki—a flaming cheese appetizer made with sheep’s cheese, dipped in a shot of rum and set aflame. After the meal, there’s baklava, a very sweet pastry made with honey and nuts.

For those with a little knowledge and understanding of the Middle East, Beit Nana serves authentic Middle Eastern deli foods and sweets. Beit Nana’s sandwiches feature falafel—a combination of chick peas, parsley and spices; or hummos, a combination of chick peas and a sauce made from sesame seeds.

Campus Eggroll combines both the Chinese and the Vietnamese cultures, serving egg rolls, fried rice, and sweet and sour pork, as well as Vietnamese noodle soup.

People with cars can go to Market Place for strawberry marguaritas and chimichangas at Chi-Chi’s Restaurant. Along with free complimentary tortilla chips and hot or mild sauce, diners can choose from a variety of Mexican dishes.

Whatever the taste—Greek, Middle Eastern, or Mexican, students can always find something new to eat in Champaign-Urbana.

ow do I love thee? Let the retailers count the ways. February 14th; what used to be a day of opening your heart to someone has fast become a day of opening your wallet. It is no longer enough to verbally express your feelings to someone. Now love is expressed through chocolate and red roses, long stemmed, of course.

But if candy and roses are not your style, Champaign-Urbana has a lot more to offer. Just a few prime examples are: singing telegrams delivered by either Cupid or a person wearing a tux; heart-shaped cookies and pizzas, candy, balloon bouquets, and ice cream cakes; red teddy bears; Valentine t-shirts and sweatshirts; buttons that say “1 Valentine”; and red plush heart-shaped pillows.

For very practical gift-giving, there are Valentine coffee mugs, vases, picture frames, candleholders, cookie cutters, pencil erasers, ice trays, and even red heart padlocks. If you are looking for an especially unique gift that your Valentine will never be able to forget, there’s the ever-popular Valentine’s Day crepe paper.

If you are kind of shy and would rather give your Valentine a special secret message you’ve written yourself, you can have it printed in the DI’s Valentine personals for the world to see.

For live entertainment, U of I’s Concert Choir delivers singing Valentines anywhere, almost anytime. If you want your boyfriend’s/girlfriend’s/best friend’s red face to stand out in any crowd or classroom, have the choir sing one of their popular requests—“Let Me Call You Sweetheart” or “Baby Face”.

If you strive for originality, you can send a Condom-O-Gram to that special someone. McKinley Health Advocates deliver these messages.  

Cards are always popular on Valentine’s Day, as on most other holidays, and range from caring to funny to mushy to perverse. And if you look hard enough, you can even find those little fold-up cards we used to pass out in grade school. Grade school was also a time when we made big red hearts out of construction paper for our parents. Fortunately for Hallmark, those days of homemade cards are long gone.

Valentine’s Day is a day for sharing and caring. The important thing is not whether we buy chocolates or roses, but instead, whether we can make that Valentine’s Day feeling last the whole year through.
Long Stem Roses
Admit it, Charlie Brown...

What's worse than opening your mailbox and finding a phone bill? Opening your mailbox and finding nothing. At least the phone bill has your name on it. It means someone at the phone company cared enough to send you a message, even if it is an invoice. Some students would rather face four exams in one day than an empty mailbox. Okay, maybe it's not that bad, but the Charlie Browns of the world experience periods of deep depression. These people find themselves reaching far into their mailboxes and pulling out only fistfuls of air.

Why is mail so important to students? Well, even though life in Champaign-Urbana is fun-filled, it's nice to be reminded there is life on other planets. Even if these planets may be Chicago, Peoria, or Springfield.

Getting mail from home and from friends at other schools makes you feel popular, even if the letters come as a result of your having sent threatening "Write to me or I'll drop out of school" messages.

Notes from Grandma are especially enjoyable, particularly when they contain a gift intended to help out with the phone bill. Grandma somehow tends to pick up the majority of the family gossip, which is another reason why her letters are so amusing.

Maybe you have little nieces and nephews who send you pictures they drew in preschool. Could it be a dog? A zebra? The White House? Who knows? You'll hang it up on your wall anyway.

Keeping in touch with your friends at home or at other schools is especially important. You don't want to go home for Christmas break to find out that your best friend got married! Make sure they write you a letter first. That way, you'll know to send a card.

The key to receiving letters is simple: You have to write them first. Obvious? Of course, but how many times last semester did you whine because you didn't get any mail? Compare this to the number of letters you wrote. See the difference? The reason it is so important that you get mail is equally simple: Admit it, Charlie Brown, you miss your friends and family!

---

upper left Altgeld Hall is just one of the many mailbox locations. lower left Students can buy stamps at the Altgeld post office located conveniently on the Quad. upper right Students pen anxiously into their mailboxes hoping for mail.

Mike Hayes isn’t just your typical U of I freshman majoring in chemistry and living in the dorms.

In September, when most freshmen know and are known by so few, Hayes was the talk of the campus. His name frequently appeared in newspapers and was mentioned on several radio stations. His story was even featured in People Magazine.

Why? Because Hayes isn’t your typical U of I freshman.

Unlike many other college students, he won’t have to stand in line at the Financial Aid Office or sling fries at the local Steak ‘N Shake to pay for his education. Unlike the parents of many other college students, his parents won’t have to sell the family car or take out a second mortgage on the house.

Why?

Because in the summer before his freshman year while Hayes was at home worrying about how he would pay for his education, he had an idea. Not just any idea, this one was a brainstorm, one that earned him about $27,500!

As unbelievable as it might sound, Hayes’ idea wasn’t to rob a bank or sell his soul to the devil. He simply wrote a letter to a newspaper columnist asking him to have his readers send donations to help pay for his education, not large donations, just one penny. Hayes thought that if enough readers sent him pennies he would have enough to pay for his four-year college education.

Sounds pretty crazy, huh? Well as he saying goes, it was just crazy enough to work.

Hayes proposed his idea to Bob Greene, a columnist for the Chicago Tribune, who saw its potential. On September 6, 1987, Greene’s column featured Hayes’ request and within three days Hayes had received over 7,000 letters in response.

Hayes said he doesn’t think the idea would work for anyone else because he had already cornered the market. Hayes also said he only received about 1,400 worth of actual pennies because most of the people sent him larger donations, including three or four letters that contained $100 checks.

“I guess people just identified with my situation,” he said.

For whatever the reason, Hayes’ idea worked. Now he can just worry about passing his chemistry finals for the next four years without giving another thought about how to pay for them.
Home Away From Home

New Student Week involves a lot more than just picking classes and getting to know new roommates. It also involves the task of making the room seem more liveable, more up to personal expectations, and more like a home. Even though many students use the same types of materials to decorate, two rooms hardly look exactly alike.

The first step in redecorating is rearranging the furniture and making room for the added “essentials”. Making lofts or bunkbeds, clears an entire wall of space the perfect size for a stereo, TV, VCR, beanbag chair, refrigerator, computer, and maybe even a crate for textbooks. Besides, whatever there isn’t room for can get shoved into a closet!

The next step is filling the walls with pictures and posters. The pictures usually include Mom, Dad, sister or brother, boyfriend/girlfriend, Fido, high school Prom, and lots of friends. Posters, on the other hand, aren’t so easy to generalize. They range anywhere from Garfield posters to Flintstone posters (the latest craze) to promotional posters ripped-off from liquor stores (Bartles and Jaymes, Spuds McKenzie).

According to Steve Aldridge, manager of Logo’s Bookstore, it is difficult to second guess or predict trends in poster themes, because they go in cycles. This year students seem to be getting back to art posters and away from celebrities and travel posters. Other themes are still popular, however, such as animals, cars, scenery, and jet airplanes (possibly due to the success of the movie “Top Gun”). Size is also an important factor this year. “Big-as-life” posters are doing very well after being unpopular for a few years.

Although posters are the number one decorating items sold at Logo’s, gift wrap paper, surprisingly enough, is gaining popularity as a decorating tool. Crayola paper, as it is known, comes in a basic series of colors just like the crayons and can be used to cover walls or bulletin boards. One great advantage of Crayola paper over wallpaper is that since it’s non-adhesive paper, it won’t damage the walls.

Plants and pets (if allowed) are other ways to brighten up a room. Plants come in a variety of sizes, shapes, and colors and don’t take a lot of work to maintain. While fish need more care than plants do, an aquarium of various fish can often add that special touch.

It’s impossible to describe all the different choices for decorating a room, but from the first step to the last, it is the resident who decides how his or her room (or side of the room) is going to look. Students who enjoy decorating, instead of merely covering the walls, are usually successful at making their room “home”.

Dear Mom...HELP!!!

If all of the males at the U of I were to be divided into two strict groups, these are the two you'd have. There's the Mom'm-bringing-my-laundry-home-this-weekend, please-make-my-favorite-dinner type of guy, and there's the-this-being-on-my-own-thing-is-great, I-can-actually-cook-what-I-want type of guy. We've all met, or are members of, the first group. The latter, however, are rare. You'd think they only hang out in laundromats!

It is difficult for most college men to adjust to the domestication going away to school demands. This isn't necessarily difficult for all, however, as it provides a certain level of entertainment for the rest of us.(the female population, that is.)

Imagine the scene, your boyfriend calls you at 5 p.m. and cordially invites you to dinner. "I bought a turkey!" he says. "If I put it in the oven now and pick you up at 6, it should be ready by the time we get back." "Yeah, if you live in Memphis," you carelessly say. You go over to his apartment and, not being in a very daring mood, offer to cook for him instead. Looking around for the ingredients for your meal, however, you find the turkey, still frozen, of course; a case of beer, (correct)

What is it about the calm whirring and spinning sounds of a washer and dryer that makes guys cringe and sends them running?

Cooking is one thing, but what is it about the calm whirring and spinning sounds of a washer and dryer that makes guys cringe and sends them running back to the same sweatpants they've been wearing for the past month? All those little buttons are confusing, but most guys, especially those aspiring engineers, could learn to press the right ones and turn out a reasonably clean load of laundry.

Think of how impressed mothers will be when their sons come home for a weekend and are able to wash their own sweats and even half-heartedly accept the task of making dinner. But remember, guys, leave yourself a little extra time for the turkey!

far left Ron Foley, senior, demonstrates the optimal study environment.left Step one: seat yourself in a comfortable position. Step two: turn on the vacuum...above Tim Dill, senior, rolls up his sleeves and digs right in.

story by Carol McHugh layout by Heidi Martisius
It's Friday. Thank God. The only problem now is that next week will come too soon. On Monday, you have a paper due in sociology and an exam in econ. On Tuesday, there's a French oral exam that's been giving you nightmares for the past three weeks. Wednesday, you have to work in the afternoon, then see a movie for your English class at night. That doesn't leave you much time to study for your math quiz, and you definitely won't have time to research your topic for the econ term paper that's due Friday. To top it off, your sister just called and decided it would be fun to bring her five kids for a visit for the weekend. It's only Friday and you already know it's going to be a weekend from hell, and the following week isn't going to be much better. Ever had a week like this? What's the best advice you could get? GO TO HAPPY HOUR!

Happy Hour is a popular tradition practiced by many students who need a release from the tensions of college. When tension gets to be too much "I go to the bars and get trashed," says Tom Wrona, sophomore in general engineering. Other students prefer to improve the body rather than abuse it when pressure gets too high. "I run," says Karen McNeela, junior in aeronautical engineering. Students who prefer Karen's method are more likely to take advantage of what IMPE has to offer rather than taking in the evening specials at Kamil's.

Tension is virtually unavoidable in a college student's life, and everyone deals with it his or her own way. Responses varied from "I eat" (Laura Putz, junior in electrical engineering swears she eats only Double-Stuff Oreo's during particularly high-tension times.) to "I shop" which Margaret Wilson, a junior in LAS claims is the only way to relieve pressure, "or I curl my hair," says Wilson. "I smash a chair into bits and pieces," claims Tom Diskin, sophomore in LAS. He was responsible for smashing five chairs during his freshman year.

Observing students rather than asking them how they relieve tension also produced some interesting results. There were those students who, by the gleam in their eyes, demonstrated they were experiencing more than just a "friendly" game of pool in the Union. Others sleep in bizarre places on campus, such as the basement of the English building and on the steps of Foellinger Auditorium. These are more than just naps. The huge piles of books next to these students prove they have more important things to do. Sports activities are always an option for relieving tension. Frisbee games are often found on the quad during and in between classes. For some people, there is nothing like a good scream to relieve what ails them most.

Whatever your method of relieving tension, use it well. If it makes you feel better, it's bound to get you through your college years safely. Just make sure no one else is around when you throw that chair, Tom!

McKinley Health Center introduced new hours and services this past fall. Evening hours of operation have been extended and the all-night walk-in clinic eliminated.

In case of illness during the late night hours, students are now instructed to use one of McKinley’s new services, “Dial-A-Nurse”. The Dial-A-Nurse program operates from 11 p.m. to 8 a.m. daily. Students should call 244-WELL and a nurse on duty will discuss their conditions and make recommendations about home self-care or refer them to other area hospitals.

Many students feel that the closing of McKinley between 11 p.m. and 7:30 a.m. daily and implementing the Dial-A-Nurse program will result in below-par health care. Now that students may be referred to other hospitals by the nurse, the question of coverage is also raised. The health fee included in tuition covers treatment at McKinley, but nowhere else. Students who may have to go to another hospital because McKinley is closed during the night will be faced with bills they would otherwise not have had to pay. A McKinley pamphlet states that in the event that the Dial-A-Nurse refers a student to another hospital, the coverage issue will be dealt with on a case-by-case basis, depending on the student’s type of insurance, the diagnosed condition, choice of hospital, and nature of services received.

Other services offered at McKinley include regular appointments, workshops, an Acute Care Clinic, a Fitness Inventory Clinic, a Cold Comfort Center, Computerized Diet Analysis, Health Advocates, a Mental Health Department and a Preventive Medicine Clinic.

McKinley Health Center is currently undergoing a three-year, $4.2 million renovation which began in 1986. Because of the construction, many offices and departments have been temporarily relocated. For information about where to go or what to do, ask a McKinley Guide. For general information about McKinley’s new services, call 244-WELL.

Deep in the subconscience of every freshman wandering lost on the Quad on his or her first day of class is a glimpse of reality and adult life. Some look toward it with anticipation, anxious to get a taste of life in "the real world". Others wait it with fear and worry about the career and family decisions that lie ahead. It's difficult to pinpoint the exact emotions that one feels on Graduation Day. One feels on Graduation Day. It's a mingling of different feelings, the relief of taking that last final exam and the sadness at passing by the alma mater for the last time (and still not having it kneel.)

"I feel so old," said Valerie Kilman, senior in LAS, at the start of her last semester at the U of I. "It's weird walking around campus and hearing everyone talk about books and classes and knowing that this is my last time going through the routine. I'm going to miss it all."

"I can't wait," said Bob Hajduk, senior in LAS, "I'm just looking for a job, making some decisions about my life and biding my time until I'm out of here. It's been a long four years."

"It's scary," said Dee Hillman, senior in fine and applied arts. "Some of my friends have already graduated and it's weird how their lives have changed—no more all-nighters, no more football games or all campus parties." For some, graduation means finishing classes and moving on. But others don't feel their college careers are complete without participating in the graduation ceremonies held by their colleges, and the University ceremony held in the Assembly Hall on May 22. The same ceremony is performed twice on that day in order to accommodate the large number of students attending. In addition, each college department holds individual ceremonies for the graduates. No formal University ceremony is held for December graduates, although some college departments hold individual ceremonies.

Stay Home on a Friday Night?

"I have two tests and paper due on Monday."
"The bars are always crowded on Friday nights."
"'The Way We Were' is on at midnight."
"I've got to wash my hair."
"I'm too tired/cold/hot/sick/depressed/broke to go anywhere."

However lame or blasphemous the excuse might be, there are a number of U of M students who actually PLAN to stay in on a Friday night. Yes, that's right—they want to stay in! There is no earthquake, no tornado or even an act of God to explain this strange phenomenon of choosing to remain indoors on this night that God and/or college students set aside expressly for partying.

What do they do, then, these anarchists, these rebels? Well, I decided I'd conduct a scientifically-based survey complete with charts, graphs and pictorial evidence to support my theory that these strange breed of students will do anything, everything and all things, pardon the redundancy, except accomplish the activity(ies) they planned to accomplish by staying home. I firmly believe that no amount of homework, laundry, letter-writing, soul-searching or affairs-organizing is ever completed on a Friday night. It's scientifically impossible—and I can prove it!

Take me, for example. I live in an apartment with three other girls. We consider ourselves to be above-average partyers. Okay, so every bartender in town knows us by name. But every now and then, and looking back on it I can't fathom an explanation for it, one or all four of us have decided to stay in on a Friday night. Consider the following scenario:

7:10 p.m.---"I'm exhausted from Happy Hour, I think I'll try to catch up on my Stats homework tonight."
"Yeah, I have some laundry that's ready to get up and walk away on its own." "I've been meaning to shave my legs for months, why don't we all just stay in."
8:19 p.m.---"I'm bored, why don't we order a pizza and maybe take a little break. We've been working hard."
8:39 p.m.---"When's that za going to get here?"

10:02 p.m.---"Good pizza! How about a game of Trivial Pursuits or Illiniopoly?"
12:50 a.m.---"Whose turn is it anyway? Isn't this the new George Michael video? Yuck! Change the channel!"
"I think the stations signing off. I guess I'll just go to bed. What do you say we get up early tomorrow and get some stuff done?"

End of Case Study 1.

I decided maybe this survey wasn't quite as scientific as I'd planned, so I decided to call up my brother and find out what he and his friends do on those rare occasions.

"Well, sometimes we play basketball or watch wrestling. Once we decided we were going to record a music video, but it didn't work out. Usually we end up making a liquor run at about midnight. I don't know, nothing much," he said.

So, I've shown you all without any percentage of error. It just isn't possible, so don't even try it. Trust me, you'll hate yourself in the morning!

It’s Not Easy Being an R.A.

Living in a dormitory is expensive. Living in an apartment or house is also expensive. Wouldn’t it be great to live in a dorm, free of charge, in your own private room? There’s one catch: you’d have to take on the incredibly challenging job of “Resident Assistant,” a job which is a lot more difficult than it sounds.

“Anyone who wants to become an RA just for the free room and board is crazy,” says Sandy Flentge, junior in CBA and an RA at Wardall Hall. Try keeping drunk freshmen quiet after they’ve been out at the bars. Try solving differences between two people who have nothing in common but, unfortunately, ended up being roommates because of pure “luck.” This is why taking the job for the free room and board makes you crazy with a capital “C.” Being an RA involves a lot of dedication and responsibility, which is why the RA selection process is so careful and extensive.

Resident Assistants are of at least junior standing and are interviewed several times before they are selected. Each candidate is reminded several times of his or her impending responsibilities before he or she is selected for the position. Once an RA is chosen, he or she trains for the position for nine weeks.

The RA is the last person to leave the floor for winter break. He or she is also the first person to return for spring semester. This is true for all University holidays, because the RA is responsible for the condition of the floor. An RA must be available to the students on the floor, even if the time is not entirely convenient. The RA is expected to be there to help out with problems, school-related as well as personal. Each week, RAs write up reports on what is happening on their floors. The report serves to remind the RAs of their responsibilities as well as to keep the administration in touch with what is happening in the dormitories.

Floor activities depend on the RA. The RA might also be considered responsible for the level of communication that prevails on the floor, because the RA is the one who draws the students together.

There’s no doubt about it: it’s a tough line of work, often taking up the majority of an RA’s time. But, as Flentge said of her floor, “I have 54 new friends and we have a lot of fun.” Though the pressure may be rough, it may just be worth it to the “right” kind of person, a warm open person who wants more than just a free room for the year.

Try keeping drunk freshmen quiet after they’ve been out at the bars.

Otis and The Elevators

One of the more prominent bands to "Dominate" the music scene on the U of I campus is "Otis and The Elevators." Appearing about twice a month at Mabel's, "Otis" has developed quite a following among members of the community. According to John Marshall, they are one of the the bands that draws the largest crowds to Mabel's.

Jay Rosenstein, lead singer, guitar, and harmonica player, called the band a "primarily original rock and roll band." He said that about 75 to 80 percent of the band's material is written by the members. Their first album, "Some Career," which came out in May, 1986, sold out its first pressing and is well into its second, Rosenstein said. For a few months after the album came out, the song "Dominate" was the No. 1 requested song on radio station WPGU.

In addition to that album, "Otis" has also put out a live compilation cassette that Rosenstein refers to as "authorized 'Otis' bootleg." To the great surprise of the band, the cassette sold out, he said.

Rosenstein said that much of the music written is a compiled effort of himself; Jim Bury, the lead guitarist; and Mark Zehr, the bass player. Lead singing is usually done by the person who wrote the song. Mouse Brunner is the band's "rented" drummer.

According to Rosenstein, the band plays in clubs and bars in Chicago, Springfield, Madison, Wis., and Ann Arbor, Mich., as well as at Mabel's and other campus events. "Otis" has played at many street fairs and park district events.

"We like to play at a lot of different places so that people who don't go to bars too often can hear us play," Rosenstein said.

Last year, "Otis" opened for Steve Ray Vaughn at the Auditorium. "We'd like to (perform) there again," he said. "Hopefully next time, it will be our own show." Rosenstein said the band is currently recording a second album but that other future plans are not definite.

"We're going to keep on playing as long as we're still liking it and as long as people are still coming to hear us."

layout by Heidi Martius
The Mudhens

The "Mudhens" have recently become one of the most popular bands in Champaign-Urbana. Their rhythm and blues music is featured twice monthly at Mabel's and two or three times a month at the Alley Cat.

The band consists of Kevin De Forrest, lead singer; Tom "T-Bone" Miller on drums; Bruce Bethell on saxophone; bass player Scott Portzline; and Bruce Rummenie on guitar.

According to Rummenie, the band got together two years ago when he got a job teaching in Urbana and his brother, Portzline, was going to school at the U of I. The two brothers met De Forrest, the U of I swimming coach, and later added Bethell and Miller to the group. Since the group got together, their success has been great.

The band plays a variety of music, about one-third of which is original. They have one tape, "Have Mercy", which has been released locally, and are hoping to be able to record an album soon.

Besides their shows in Champaign-Urbana, the Mudhens have also performed in Chicago, Springfield, and other locations in central Illinois.
For a truly bizarre evening filled with "props, puppets and bad jokes" one can pop into Mabel's for a night with "Captain Rat and the Blind Rivets."

"Captain Rat" is known for its wild antics both on and off stage. "We've been known to leave the stage in the middle of a song, with our wire instruments still playing, and go across the street to Taco John's," said Mark Rubel, bass player for the band.

Rubel said the band uses costumes, dolls, hockey sticks and tennis rackets in its shows, and plays mainly '50s and '60s music. The band does not write any of its own material.

"We're not original, but we're unique," he said. This is the band's eighth school year in existence. The members include Buster Dordown, drummer; Todd Modern, keyboards and vocals; Timmy Ray, guitar and vocals; and Rubel, bass. All are U of I graduates.

Rubel said the band does special Christmas and Halloween shows in which they decorate the stage and wear costumes for the respective holidays. Rubel said the band planned a new show for Thanksgiving, 1987, called "Revenge of the Turkeys: 200 years of massacre." He said the show would feature a band member dressed as a turkey bowling ball aimed at "pilgrim pins".

"Captain Rat" has three records to its credit, the latest of which is called "Cubs, Cubs, Cubs." Rubel said the band is "very into the sports scene."

---

Clockwork Orange

"To call us a strictly heavy metal band would be like calling a wine glass a beer mug," said Andy Baylor, lead guitarist for Clockwork Orange.

Clockwork Orange is one of the relatively new bands to dominate the U of I scene. The band has been around for the last year-and-a-half and, according to Baylor, appears at Mabel's about every three weeks. John Marshall, the booking agent at Mabel's, said the band has a regular following.

The band mainly plays other artists' music, although they have written about 40 percent of their own music. Baylor calls their type of music, "classic hard rock with a modern influence." The writing is a group effort among the members: Michael Husler, the lead singer; Peter Bailey, the bass player; Ed "Buzz" Eselby; and Baylor.

Clockwork Orange appears at various locations throughout Central Illinois but are originally from the Champaign—Urbana area. Baylor said the band enjoys playing at Mabel's because they like the atmosphere. "We get more of an intelligent audience (at Mabel's) who understand our music," he said.

Baylor added that their live shows concentrate more on the music than on special effects. "We don't use pyrotechnics or smoke because it's a cheap facade," he said.

Most of the band's work has been in live performances but they are currently working on an extended play album, Baylor said. Although Clockwork Orange's future plans are uncertain, he said, the band plans to continue playing as long as possible.
The Elvis Brothers

The Elvis Brothers, said to be one of the most fun bands around, is noted for its craziness, wildness, and stand-up drummer, who serves as an interesting feature that sets the band apart from the rest. The Elvis Brothers are Graham Walker, Brad Steakley, Rob Lewhouse, and Adam Schmitt.

The band started locally, performing oldies and Elvis imitations. Lately, however, they have gained national recognition and have dropped the Elvis routine for some original material, but have kept their original name. The group has two albums released under the Portrait label: "Movin’ Up" and "Adventure Time". They have also toured and opened for other groups, such as Cheap Trick.

Despite the group's national success, however, they return to Mabel's regularly due to their popularity on campus.

story by Carol McHugh

Modern Humans

The Modern Humans, a relatively new band formed in November, 1986, specializes in a combination of several styles of music, including traditional jazz, jazz fusion, rock and pop. "We wouldn't classify ourselves," said one of the band members. "The combination is what's important."

The Modern Humans are Chris Neville, Mark Brunner (Mouse), Curt Morrison, Tom Sullivan, Jeff Grimson, Mitch Paliga, Mike Shulze, Brian Wagner and Jeff Helgeson. Although not all of the members are from the Champaign-Urbana area, and not all of them are students, they now make their musical home in Champaign. The group can be seen twice a month at Mabel's. They also perform at other locations statewide, the Park West in Chicago, for example.

The band has made tentative plans to record an album in the spring of 1988. This would undoubtedly rush their already fast-growing popularity.

One wonders where a name such as the "Modern Humans" originates. According to Chris Neville, the band's keyboard player, "The name comes from a celebration in faith of human evolution."

"That's Darwin," adds Mouse.

"We're not the 'Pepsi generation'," says Neville, emphasizing the band's dedication to modern, evolutionary thought.

What's an Orchard Downs?

Orchard Downs. Is it a suburb of Champaign-Urbana somewhere between Mahomet and Rantoul? Is it the Agriculture Department's experimental field for growing hybrid apples? How many times have you seen the MTD "Orchard Downs" bus and wondered exactly what is Orchard Downs?

Orchard Downs is university housing for married students and families. Consisting of 780 units, it is located in Urbana on Florida Avenue just east of the President's House. Although the buildings look identical and are close to one another, the general area is very peaceful and pleasant.

The units vary in size according to the size of the families, but usually consist of one or two bedrooms, a livingroom, bathroom, and kitchen. Rent prices are very competitive with off-campus apartments, and include water and a parking space. Also, for those students who don't own a car, the MTD bus comes right to Orchard Downs.

As for the people of Orchard Downs, although they share some common traits, in general they are very diverse. Most are married, however, some are not married but have families. Some couples have children, others do not. The majority of Orchard Down residents are foreign students. Some of the residents have lived there for several years, others are newcomers. Most are graduate students, but approximately 40 are undergrads.

Is it an experimental field for growing hybrid apples?

Phil and Kathy Harter, both seniors in Education, are newcomers to Orchard Downs as well as newlyweds. Asked why they decided to get married one year before graduating, Phil said they didn't want to have to graduate, get jobs, find a new place to live, and get married all at once. And since they have been dating since high school, it seemed logical. Even though Phil said he likes living at Orchard Downs, he admitted it is not exactly what he had planned for their first place together. But, due to budget constraints, Orchard Downs will be their home for this year.

Although there are many advantages to being a married student, there are a few minor strains. For example, since married couples like to go out together, it is difficult when one person has to stay in to study. It's not the same as telling your roommate to go out without you.

With marriage comes added responsibilities, even more so for couples with families, but many married couples enjoy doing the same things other students do--going out with friends or going to the bars, for example.

Although Orchard Downs is set apart from campus, its residents are still very much a part of the university.
Adapting to U of I

Think back to move-in day of your freshman year. Remember trying to stuff 18 years worth of belongings into a few cardboard boxes? Remember trying to picture what your roommates would be like? Remember saying goodbye to your friends and family and trying, unsuccessfully, to hold back your tears? Somehow moving away to college seemed like the most terrifying experience of our lives, especially moving to a university as large as U of I.

Now try to imagine what it would have been like if instead of moving to a college a couple hundred miles away from home, you moved to a college that is thousands of miles away from home, a college in a different country with different people, different customs, and a different language. A college where everything and everyone seems foreign to you, yet you are the "foreigner". Now you have some idea of what the 2,200-2,400 international students at the University of Illinois felt like when they first came here.

To help students in adjusting to life at U of I, the Office of International Student Affairs (OISA) is a strong support center for the students and acts as a middleman between the students and immigration offices, housing offices and the university administration.

Orientation meetings are held at the beginning of the school year to show the students how to register for classes at the Armory, where to go if they have questions regarding financial aid, employment, tax forms, and all the other different services available to them through OISA, including counseling, English classes, contacts with host families, and much more.

OISA also offers opportunities throughout the year for interaction between students of different nationalities. For example, every three weeks an informal discussion is held called "When Two Cultures Meet" which is led by two persons, each having studied in the other's country. Also, Chinese and Korean tea hours are held weekly at the OISA building.

Laura Buhs, the assistant director of OISA, said most of the problems students encounter in adapting to American life are either administrative (visas and passports), or academic. American schools have courses with many quizzes and exams where, in other countries, there is usually only a final exam per class at the end of the year. Buhs said the international students also have problems with general differences in food, housing, and habits.

The Cosmopolitan Club, a conversation group, is also a good support system for international students. The club holds biweekly dinners, field trips, and even a Thanksgiving dinner.

Joan Solaun, director of the Study Abroad Office, believes the student exchange program "internationalizes Illinois." The program helps others to learn about America and its language and customs, as American students learn about other cultures. Firm friendships are built, new ideas are discovered, and cultures are shared.

Ana Osborne, an exchange student from Rio de Janeiro, is studying foreign languages. Osborne noted several differences between U of I and her college in Brazil. Life at Illinois is very fast-paced and people are always in a hurry. Exams are more frequent and emphasize time more than what you know, for example, tests which offer 200 multiple choice questions in an hour instead of two essay questions. American food is more oily and less spicy. In Rio, a lot of salt and spices are used in preparing food. Osborne also said although people here have been friendly to her, their interest seems to be superficial as opposed to Rio, where people are very open and intimate on first meeting.

Tom Wardlaw is a sophomore in general engineering from Aberdeen, Scotland. He has also had to get used to our system of frequent exams but feels this helps him keep up on the work and puts less pressure on the final exam. Meal times are also different at U of I in that in some dorms have continual meal services which allow students to eat any time between 7 a.m. and 7 p.m. In Scotland, there are only two regularly scheduled meals, breakfast between 8 and 8:40 a.m., and dinner from 5:30 to 6:30 p.m. For lunch, students usually go to the "chip shops". The drinking age here is a lot higher than in Scotland, where the drinking age is 18, even though most people start when they are 16 or 17. Wardlaw said the students here have been very friendly and very curious about him and his home. He also said the girls in America are much prettier.

Students on the exchange program will be at the U of I for only one year before returning to their countries. But that year is one of learning, special friendships, and everlasting memories.

below The Office of International Student Affairs and the International Student Center are available to help foreign exchange students.

Gone But Not Forgotten

"The words of the prophets are written on the subway walls..." That's not the only place they're written!

Nobody listens to you. You think democracy is a sham. You've fallen in love with your Accy 201 TA. You think your fraternity is much better than the one next door. These are important thoughts, but nobody seems to listen. So what do you do? You write it on a desk.

Classroom desks harbor the words of aspiring poets, the causes of closet big-mouths, and the sketches of wanna-be artists. There's more to desk graffiti than just a little case of boredom in the classroom. No, there's some real depth out there. Peer closely into the intricate carvings and faded ink spots. Within them, you will find a myriad of experience and expression.

Let's start with the poetry. This extraordinary piece of work, for example, fighting to compete with the likes of Frost and Whitman, was found scribbled on a desk located in a building north of Green Street. (We don't want to get too specific. Engineers have their right to privacy, too.) The poem is simple and moving:

"Why must I sit here in this class
When I'd rather be staring at (so & so's) ---?"

The originality of thought and expression in this poem makes the reader wonder why this student has chosen to major in engineering, when he or she has an obvious flair for poetry.

On another desk, this one located on the quad, is a touching portrait drawn by a fraternity member of his pledge dance date. The sketch leaves no doubt in the onlooker's mind that this poor guy didn't have a very good time at the dance. The ability to convey this powerful message with a few slight strokes of the pen shows real talent.

Whoever said practicality was a characteristic of good artists was an insensitive slob. Why lay your books over the surface when the clean, almond-colored varnish is just begging you to create works of art, express yourself, or take notes if you happened to forget your notebook?

You're not convinced? Okay, maybe classroom boredom has a tiny bit to do with it...
Filling the Void Between Classes

You forgot to get your sister a birthday card. You have an econ quiz in two hours. You could use a little extra money. You desperately need a nap. You have exactly one hour between French and psychology. Thank God for that hour!

It’s amazing what little tasks can be accomplished between classes. Classes, though they take great effort to attend, offer distinct advantages. They put you in the center of things, close to the Union and Green Street, where plenty of week-old errands can be accomplished. Otherwise, you would probably just sit home all day and think about everything you have to do. Right?

The nap is an age-old college custom. You don’t have to go very far to find someone napping in a conveniently located place, a couch in the Union or the English building basement. Some students don’t even need a full hour between classes to catch a snooze. For some, the ten minute class change is enough time, though this nap usually continues through their class.

Students can accomplish a wide variety of things in the Union. They can cash checks, take naps, study, buy those birthday cards, bowl, play pool, or simply meet with friends. Because the Union offers a wide variety of things to do, some people spend an unusual amount of time there. You’ve seen them; one would think they lived on those leather couches.

Some enterprising students have jobs between classes. This way, they can work a few hours on several days rather than one or two long days which would, of course, fall on the weekends. Having a job on campus between classes is especially convenient because students don’t have to walk home and then walk back to work again. Also, after work, the students have short walks back to classes. Tempting, isn’t it?

Some students would be lost without that open hour in the middle of the day. Of course, the ideal schedule, which nobody gets, is a short, painless, continuous day. Students soon get used to having the extra time, and for some it becomes an essential part of the day, much more important than that political science class into which they somehow got scheduled.

Students can always find time between classes to get something accomplished.

below Many students take refuge in the Union, either to study or nap. upper left Often times it takes students an hour just to get across the Quad. far lower right The space between classes is the perfect time to get your shopping done. lower right Some students relax, have a bite to eat, and read the paper.

Student Life 105
Students’ Best Friends

Behind many happy U of I students, a wide variety of loyal pets walk, crawl, slither, or hop. Although the majority of students aren’t allowed to have pets at school due to dorm, apartment, and house regulations, the idea of leaving Spot at home with Mom can be too heartbreaking, and Mom may not be too excited about the idea either. So, pets are living on campus in closets, sock drawers, or on top of shelves, all the while providing their owners with unconditional loyalty and entertainment.

Doug Phares, senior in LAS, keeps a snake on top of his dresser. “It’s a cool pet,” Phares said. “You just have to give it a mouse every week.” "Gabrielle" is a boa constrictor and has been Phares’ loyal companion for almost a year.

Margaret Wilson, junior in LAS, has had her rabbit, “Trixie”, for eight months. “I wouldn’t recommend a rabbit as a pet for a college student because she is messy and she smells,” said Wilson. Also, because Trixie is not too particular about where she hops, Wilson has trouble hiding her from the landlord. Michael Pender, junior in LAS, has a similar problem with his canary, Bob, who prefers the open air of the apartment to the confinement of his cage.

Hamsters, cats, ferrets, and dogs are among the other popular animals thriving on campus, hidden away from their enemies: landlords and RAs. Pet owners agree that the pros of having a pet, even if it means risking their apartment leases, far outweigh the cons. Remember, that adorable puppy does have the ability to attract members of the opposite sex. Who can beat an advantage like that? Certainly not your roommate!

photo by Matt Bialczak

Give Credit Where it's Due

"Mom! Mom, is it here yet?"
I'll never forget the excitement I felt when I knew it was on its way. I couldn't believe they were actually sending me one--me, a penniless college student! Didn't they know better?

It finally arrived. I was the proud owner of a 2 inch by 3 1/4 inch piece of plastic that possessed the power to spend and destroy...a charge card!

Okay, so it was only a J.C. Penney credit card, but it was a start. Then came Carson's and Bergner's. Finally, I hit the big time...VISA! Mom and Dad were really in trouble now!

It all started freshman year when my roommate and I were shopping and saw the sign that read: "Fill Out a Charge Application and Get Free Gift." Since we were never ones to pass up something free, we filled out the applications and laughed about the bong letters we were sure that we would receive. To our surprise, we found out that J.C. Penney actually wanted to give us charge cards.

J.C. Penney is not the only company with that desire. Many local department stores and major credit card companies encourage college students to get credit by providing special student applications.

A customer service representative at American Express said the company chooses to offer credit to students whose income is lower than their non-student applicants because students have great potential to become better customers after they graduate. Other companies apparently agree with American Express's reasoning.

Applications can be found in displays at the Illini Union, in classroom buildings or in other areas where students gather. They are also distributed in residence halls and at local stores.

Companies even have begun to think of new ways to encourage students to fill out credit applications. In addition to offering free gifts to applicants, companies allow student organizations to raise money for getting students to fill out applications. Pi Beta Phi sorority hopes to raise $1,500 by using this fund-raising technique, one member said.

With few barriers to obtaining student credit, I guess I can start looking forward to the arrival of my Gold Card application. "Mom, is it here yet?"
Students Skate on Thin Ice

Remember when you were little and you used to start looking for snow in September? Snow meant a lot of great things: snowmen, snowball fights, even a few days off school if the storm was good enough. Along with snow, winter brings cold weather, freezing temperatures, and ice-cold winds. Get the picture? Freezing temperatures meant it was time to put on the snowpants your mother made you wear and go ice skating.

Ice skating was a fun thing to do as a child and most of us were pretty good at it. Coordination didn't concern us much and, besides, the snowpants provided a pretty good cushion in the event of a fall. (Maybe that's why our mothers made us wear them!) Picture the little girls in the center of the rink, gliding around, doing their three foot tall imitations of Dorothy Hamill. Did you end up with a bruised head when you tried to do the "Hamill Camel"? Then there were the charming little boys, future hockey players racing around with their hockey sticks, wild with the anticipation of nipping their little sister's "Hamill Camel" in the bud.

Oh, to be eight years old again. After two years of renovation, U of I opened its brand new skating rink on November 4, 1987. Suddenly, the old hobby of our youths was rediscovered as we dusted off our old snowpants and found that they were a little too short, among other things. Skating remains a classic form of entertainment for all ages, even though the ankles may buckle a little easier than they used to. The rink is open to the public for about 15 hours a week, with extra hours provided for U of I students and staff only. "Noon-skat," weekdays from 12 to 12:45, is a great way to forget the pressures of campus life or the class you are supposed to be at.

"We're always crowded," says Tim Harrington, manager of the rink. He noted that fraternities and sororities have late-night exchanges at the rink and that this has become quite a popular idea. Other campus organizations have started to do the same, as well as clubs in the cities of Champaign and Urbana. U of I's hockey team begins its season at the end of October and skates until the end of February. Since the team has been able to play at home, the turn-outs have been "unbelievable," says Harrington, "We've had to turn people away."

The new ice rink brought out the kid in a lot of us this year, proving that skating isn't just for eight year-olds anymore!

story by Carol McHugh
An Optimistic Beginning, But
With 17 of 22 starting players returning for the 1987 season, the Illinois football team was optimistic as it prepared to rebound from a disappointing 1986 season. However, although the Illini showed promise at times, they collapsed at the end of the season, thus solidifying their spot in the low end of Big Ten football. The Illini accelerated toward the basement by losing their last three games closing out the season at 3-7-1, and in eighth place in the conference with a record of 2-5-1.

Before the season began, sophomore Brian Menkhausen emerged as the starting quarterback, beating out junior college transfer Scott Mohr. Running back Keith Jones, the team's MVP in 1986, suffered a stress fracture in his foot during fall drills, and didn't return until the Ohio State game. The Illini counted on their defense to keep the team in the game.

Illinois traveled to North Carolina for their opening game against the Tarheels. While leading 7-3 late in the first half, the Illini forced North Carolina to punt from their own 29-yard line. The Tarheel punter took a bad snap, and instead of punting, ran the ball 57 yards to the Illinois 14-yard line. Three plays later they scored for a 10-7 halftime lead.

On Illinois' first possession in the second half, Menkhausen threw badly to fullback Jeff Markland. The pass was picked off and returned 19 yards for another touchdown. Later in the third quarter, the Tarheels had a 58-yard touchdown reception and a 56-yard run as they crushed the Illini 34-14.

The next game was at home against Rose Bowl champion Arizona State. Illinois' defense kept them in the game during the first half, giving up only 103 yards. But the offense couldn't get anything going and the game remained scoreless at the half. Junior Ken Thomas ran for a 57-yard touchdown in the third quarter to give Illinois a 7-0 lead. However, ASU's offense got on track and did the rest of the scoring as they recorded a 21-7 victory.

Menkhausen completed only 15 of 36 passes for a total 157 yards. Some passes were dropped, while others were off the mark. The 0-2 Illini needed to find some offense before their next game against East Carolina. A win would give them some momentum heading into the Big Ten season.
The Illini offense put on a good show as they defeated East Carolina 20-10 at Memorial Stadium. Mohr started at quarterback and completed 10 of 19 passes for 187 yards. Mohr connected on three long passes on the day, all of which led to scores. Junior tailback Lynn McClellan gave the team its first 100-yard rushing game as he gained 126 yards on 20 carries.

Menkhausen did not play at all during the game. Freshman Peter Freund ran the offense for the first time also. After three weeks, Illini coach Mike White felt he had three people capable of playing quarterback, but had no clear-cut starter.

The Illini had two weeks to prepare for their next contest with ninth-ranked Ohio State. The game also marked the return of Keith Jones to the lineup. Jones only gained 36 yards, however, as the Illini comeback fell short 10-6.

Scott Mohr, who established himself as the No.1 quarterback in the game, hit tight end Anthony Williams for an 11-yard touchdown, the first touchdown pass in four games for the Illini. Freshman kicker Doug Higgins missed the extra point, leaving the Illini behind by 4. This came back to haunt the Illini later in the game when Mohr drove the offense to the OSU 20. Three incompletions and a fourth down sack ended the threat with less than a minute play.

The 1-3 Illini hit the road the next weekend to play against winless Purdue. Eight fumbles lost, four by Mohr, stopped nearly all the offense's threats as the boilersmackers' "upset" Illinois 9-3 in a sloppy game. The Illini moved the ball well, and were helped by 14 Purdue penalties. Mohr threw for over 200 yards and threw no interceptions. Keith Jones gained 70 yards on 15 carries. But the Purdue blitz, which sacked Mohr four times, was too much for the Illini offense. While the Illinois defense once again kept them in the game, the offense didn't get on the board until the fourth quarter on a 22-yard field goal by Higgins.

Next on the schedule was traditionally-weak Wisconsin. The Illini couldn't afford to take anyone lightly anymore, however, as they needed a field goal in the last minute to beat the Badgers 16-14. Despite pre-game chatter that he would share time with Menkhausen, Mohr played the whole game, completing 19 of 37 passes for 253 yards and apparently gained the confidence of the coaching staff.

The Illini had to rally from a 14-7 deficit with 6:19 left to play. Starting at their own 15-yard line, Illinois drove down the field in ten plays, capped off by a 38-yard TD pass to Darryl Usher. After the two-point conversion failed, Illinois trailed by one with 3:30 to play. The defense then held the Badgers, forcing them to punt. The Illini took over at their own 43. Seven plays later, Higgins hit a 34-yard field goal to win the game.
The Illini took on Rose Bowl-bound Michigan State and put on perhaps their finest performance of the season. Although Illinois was a 17-point underdog, the defense kept the game tight. Scott Davis blocked a field goal attempt as time ran out. The Illini defense, led by nose tackle Mo Gardner, SMU transfer Gabe de la Garza, and linebacker Jason Guard, held star running back Lorenzo White to 67 yards on 31 carries.

Menkhausen started at QB for Illinois and led the offense on a 76-yard TD drive. The offense floundered during the middle quarters, then came alive again late in the game. Mohr came in for a 16-yard third down play and a 19-yard TD strike to James Gordon. Freund, with help from Mohr, drove the Illini from their own 26 for a touchdown, topped off by a 1-yard run by Greg Turner.

QB's Freund and Mohr combined for three touchdown passes and Higgins kicked 2 field goals, one a 52-yarder, as Illinois beat Minnesota 27-17 in the Homecoming game. The Illini offense was a bit out of character; they scored 20 points in the second quarter, and White was pleased with the victory. Ken Thomas led the team in rushing with 52 yards on six carries. At this point in the season, Illinois was 3-4-1, 2-2-1 in the Big Ten, with big games coming up against Indiana and Michigan. There was still a possibility of a bowl berth.

The Indiana Hoosiers, fighting for a Rose Bowl appearance, outscored the Illini 31-6 in the second half to win 34-22. Illinois dominated the Hoosiers in the first half, jumping out to a 16-0 lead. Markland ran two yards for one touchdown and Mohr threw 38 yards to Usher for the other. Indiana then scored 24 unanswered points, seven coming after Usher fumbled a kickoff at his own 5-yard line.

Mohr, who played the whole game, hit Jones for a 38-yard touchdown pass, but the Illini could do no more. Jones finished the day with 95 yards rushing while Turner added 53. Their running success was matched by a dismal 8 of 22 performance by Mohr.

Illinois hoped to save a .500 season against Michigan at home. For most of the game, Illinois looked like they just might do it, but Michigan scored 10 points in the final 10 minutes to win 17-14. Freund played the majority of the game when Mohr couldn't connect early. Freund led Illinois on two touchdown drives, one ending on a 1-yard dive by Turner, and the other a halfback option pass from Jones to James Gordon.

The loss was a bitter one for Mike White, who let his feelings be known after the game. "I'm ashamed of this football team. That game was there, the opportunity was there, the crowd was super. I just told them they let a lot of people down," he said.
The Illini closed out the season on a sour note, getting thoroughly beaten by perennial Big Ten doormat Northwestern. It was the second year in a row that NU has beaten Illinois. The game belonged to the Wildcats from the start, and they never trailed in the 28-10 win.

Illinois finished in eighth place by losing their last three games. It was the first time since 1969 the Illini didn’t win a road game. The Illini found themselves right back where they were when Mike White took over the program eight years ago.

"I thought we’d do a lot better this year, but we lacked something," said tailback Keith Jones. "I think the switching of quarterbacks hurt us.

There is reason to be optimistic for next season because Purdue transfer Jeff George will be eligible to play quarterback next year. George was the top high school quarterback in the country two years ago, and will be counted on heavily to bring back a high-scoring offense. "Jeff George will help us a lot, I’m sure we’ll be passing a lot more," said Jones.

---

Illinois head football coach Mike White resigned January 18 after eight seasons in Champaign. He compiled a 47-41-3 record and led the Fighting Illini to a Rose Bowl appearance in 1983. That same year, Illinois established a Big Ten record by defeating all nine conference opponents. The Illini also appeared in the 1982 Liberty Bowl and the 1985 Peach Bowl.

White resigned amid an official inquiry from the NCAA regarding three recruiting violations. The football team was placed on a one year probation in 1984.

On February 3, Athletic Director Neale Stoner named John Mackovic to fill the vacancy. Mackovic, 44, previously coached the Kansas City Chiefs and at Wake Forest University.

The 1987 NFL season could be the entire show for Marv Albert’s “Wacky World of Sports.”

On Sept. 21, 1987, the National Football League Players Association went on strike and, for the first time in the game’s history, replacement teams, or “scabs”, were fielded. The three games that followed were quite comical.

Picketing union players tossed eggs and shouted obscenities at replacement players when they showed up for work. Thousands of season ticket holders exchanged their tickets for refunds, while team owners vowed to hold out as long as possible.

In the 24-day strike, players made the following demands: free-agency for players after four years in the league, double pension values, and guaranteed contracts after two years.

During the strike, many star players crossed the picket line including the Dallas Cowboys’ Danny White and Tony Dorsett, the New York Jets’ Mark Gastineau, the St. Louis Cardinals’ Roy Green, and many of the San Francisco 49ers. No members of the Chicago Bears crossed the picket line.

Meanwhile, television stations and the odds-makers in Las Vegas lost millions of dollars every day. Buffalo Bills’ quarterback Steve Young estimated a personal loss of $80,000 a week. The strike freed time for many members of the Chicago Bears to attend to their off-season businesses—running restaurants, modeling, and appearing on talk shows and in advertisements.

Persistent football fans fought through picket lines to get into stadiums for the replacement games, while in Philadelphia, protesting Philadelphia Eagles started fights with the "scabs."

"We'll haunt those (replacement) games," said players’ union president, Gene Upshaw. "They are really tearing down our product, and we don’t like it."

By the end of the strike on Oct. 16, players, team management, and loyal fans were ready for the regular NFL players to return. As the replacements went back to work at local factories or law firms, fans could look forward to football games that were peaceful, relaxing, and safe.

below Gene Upshaw, head of the NFL players Association, makes an announcement after a 7-hour meeting with players representatives that he would resume discussions immediately with management in an effort to end the strike. Behind him, L-R: Bengals’ Boomer Essoiason, Dolphins’ Dan Manino, Raiders’ Brian Holloway, and Falcons’ Mike Ken.

"ROAD TRIP! ROAD TRIP!" The chant rang throughout our apartment. I'm not sure which one of my friends first thought of the idea, but in the end we would all make the claim. For those who are unfamiliar with the term "road trip", a definition is necessary. A road trip is defined as eight to ten students, no more, no less, who pile into a subcompact car and travel to another university. Beverages and munchies are vital, though the driver must drink soda. The reason for the road trip may vary from visiting friends or boredom with U of I to a change of pace or a football game. The motive for our adventure was to cheer for the Illini in enemy territory: INDIANA!

After what seemed like days of driving through the most scenic part of the country, we arrived at Indiana University. We arrived on Friday night so we could take the bars by storm while flashing our Illini attire. The reaction from the crowd was mixed. Either a large hairy "person" was screaming about how Indiana would kick our butts, or people who knew Illinois students acted glad to see us. "Do you know Joe Crane?" "Sure we do, he's one of the thousands of people we just meet on the street." Over all, we met several interesting Hoosiers. Some were even gracious enough to offer us sleeping quarters for the night.

When we finished our Bloody Marys and eggs for breakfast, we were ready to hit the stadium and watch the Illini crush the Hoosiers. The tickets we had sat us in the middle of a student section. We looked like
eight oranges growing on a ripe apple tree. The Illini were winning in the first half and with help from our bodas we let the crowd around us know the score. The Hoosiers probably thought it would be a great idea to pass us up through the crowd and over the wall. We remained physically safe since the Illini crumbled in the second half. However, the emotional scars from the abuse we received still remain.

The Illini failed us. There we were on the large and scenic campus which reminded me of a golf course, hundreds of miles from home. Our football team had lost, our beverages were gone, and we still had to drive all the way home. And then, depression set in.

I awoke as the car left the highway to pull into Champaign. Suddenly, I had a great feeling inside of me. We were home! The Illini will win games and they will lose games, but our Illini loyalty will always shine. Our famous marching band, our hot Illinettes, our nimble cheerleaders, and our good old “ILL...INI” cheer will always make the University of Illinois the best school around.

In addition to its great academic facilities, the University of Illinois can also boast of its excellent athletic facilities after the completion of several projects in the past year.

When the old Illinois Field was torn up to make room for the University's Beckman Institute, a new baseball field had to be built. After playing for a year at Urbana's Prairie Park, the baseball team will now play its games at the new $2.5 million 1500-seat Proano Stadium. The stadium, which is located just south of Florida Avenue on the old golf course, features a press box, concession stand, batting cages, an outfield wall, and a clubhouse/locker room. There are also plans to replace the all-grass field with artificial turf. "It's one of the best stadiums in the country," said outfielder John Walewander.

"We're proud of (the stadium)," said first-year head coach Augie Garrido. "It's a good addition to the university."

Adjacent to the baseball field is the new track, replacing the old one at Memorial Stadium. "The track is super," said men's track coach Gary Wienke. "We had a lot of input in the layout and we feel that it's the best that there could be." The polyurethane-based track was made by Rekortan, and is the "Cadillac of tracks," according to Wienke. "It's the same track that was used at the 1984 Olympics in Los Angeles."

Wieneke also said that with eight 48-inch lanes, the track has more surface than any other that they've run on. This view is shared by pole vaulter Dean Starkey. "It's awesome, we don't have the wind problems here that we had in Memorial Stadium either."

Several popular wintertime activities returned when the ice arena reopened this year after a $2.7 million renovation. "Just about everything has been replaced," said Matt Wever, director of the ice rink. In addition to mechanical and electrical work, there is a new ceiling, new lights, lobby,
office, boards, and lockers.

For Illini hockey fans this means a
return of exciting hockey games to
campus. The team played all of its
games in other arenas last year. “It’s
good to be back this year,” said center
John Proctor. “It’s a great feeling to
come through the tunnel and hear the
crowd, which is the best and most in-
fluential crowd in the league.”

The rink will also have skating ses-
sions, lessons, intramural hockey
and broomball, roller skating, and floor
hockey.

While athletes need quality facili-
ties in which they compete, they also
need weight training facilities in order
to improve their performances and
help prevent injuries. A new weight
room below the northeast tower of the
stadium was completed in August 1986
to supplement the one already in use. It
had been planned for over four years,
and is used mostly by football and bas-
ketball players.

“Weight training is a very profes-
sionalized area,” says strength coach
Bill Kroll. “Different athletes need to
develop different muscles. We con-
struct a program for each individual.
The equipment in the new strength
complex is better and there is a lot
more of it. I designed a lot of the
machines myself and had various com-
panies conform to the specifications
that we wrote.”

Kroll’s major objective was to de-
velop, exclusively for the Illinois foot-
ball program, the most modern, func-
tional, state of the art strength training
facility. It predominantly emphasizes
free weights and is large enough to
serve the strength training needs of the
entire football team in the off-season,
pre-season, and in-season periods effi-
ciently.
Illini pros

Can the Fighting Illini rightfully claim ownership of the eighties? Has this decade really belonged to us? Anyone with a knowledge of sports would beg to differ. Illinois has had some good teams, but certainly not the best. However, they have had some superb individual athletes, many of whom now play professionally.

Ever since head football coach Mike White brought his aerial attack to the U of I, the Illini have been blessed with great quarterbacks. Dave Wilson only played during the 1980 season, but he made the most of it. He passed for an NCAA record 621 yards and six touchdowns against the Ohio State Buckeyes. Wilson was picked in the first round of the NFL draft by the New Orleans Saints.

In 1981, Tony Eason took over and transformed the Illini from a perennial loser to a contender for the conference championship. After setting several school passing records during his two-year stint as quarterback, he was the first round draft choice of the New England Patriots. Since joining the Patriots, Eason has been their starting quarterback and led them to the Super Bowl in 1985.

In the first of three record-setting years at the helm of the Illinois offense, Jack Trudeau took the Illini to the Rose Bowl. He was drafted in 1986 by the Indianapolis Colts in the second round and is now the starting quarterback of their much-improved team.

Other Illini in the NFL include Calvin Thomas, a fullback for the Chicago Bears who played on their Super Bowl championship team; Scott Studwell, who has had a long career with the Minnesota Vikings after playing at Illinois in the mid-seventies; and Mike Martin, a wide receiver/kick return specialist for the Cincinnatti Bengals, who played at Illinois from 1980 to 1982.

More recently, Cap Boso, a former Illini tight end, is now playing for the Bears. Tight end Jerry Reese plays for the Atlanta Falcons, tackle Jim Juriga blocks for the Denver Broncos and tackle Mark Dennis plays for the Miami Dolphins.

Notably absent from this list are two-time All-American wide receiver David Williams, who was drafted by the Bears, and all-Big Ten safety Craig Swoope, who played for a year at Tampa Bay before being cut. Illini career rushing leader Thomas Rooks was drafted by the Minnesota Vikings but did not make the team.

In basketball, the Illini have had three players make it into the National Basketball Association in recent years. Eddie Johnson, a high-scoring power forward who played for Illinois from 1977-81, now makes his living with the Sacramento Kings. Derek Harper, an all-around guard who set records at Illinois for steals and assists and then skipped his last year of eligibility, was drafted by the Dallas Mavericks and has been one of their top players. Most Illini fans should remember Ken Norman, who was drafted by the Los Angeles Clippers in the first round of the draft after being named to several All-American teams for the 1986-87 season. Norman will try to help rebuild a team that, last year, compiled one of the sorriest records in NBA history.

Several Illini basketball players, including Doug Altenberger, Bruce Douglass, Anthony Welch, Efrem Winters, and Scott Meents, have been drafted in recent years but were unable to make the final team cuts.

Another ex-Illini, Jeff Innis, pitched for the New York Mets last year, when their staff was hit hard by injuries. Innis played baseball for Illinois in the early eighties.

So, the eighties might not belong to today's Fighting Illini, but former Illinois athletes are certainly making the most of the decade.

After playing a full schedule on the road last year, the Illini hockey club gunned for the Central States Collegiate Hockey League title this year when they returned to play in the newly renovated Ice Arena.

The club went home for the semester break with a 2-4 record but had reason to be optimistic about the remainder of the season. Forwards Mike Goldberg and Bill Mazurowski returned to help generate some offensive power. Goldberg was named to the CSCHL all-star team two years ago. Goldberg and Mazurowski will be joined on a line with Brian Moore, one of the top scorers in the league. Several players also return after being hampered by injuries during the first half of the season.

"I think we have a good chance of winning the conference," said forward John Proctor. "St. Norbert and (defending champion) Iowa State will be tough."

The club evened their record at 5-5 after a series of games at the Ice Arena, their first home games in two years. They came out a bit sluggish against Wisconsin-Whitewater, losing 4-2, after missing many scoring opportunities. The next night the Illini came back and destroyed the Warhawks 9-2. Moore and Goldberg each had two goals.

The next weekend, Illinois again played host as Marquette came to Champaign for Friday and Saturday night games. The Warriors probably wish they had stayed at home, as the Illini mauled them 17-2 and 8-5. Not only did they get beaten, they were also humiliated in front of the ever-hostile Illinois hockey fans.

"We've had quite a following in years past and the renovated arena has generated a lot of new interest," said coach Mark Roszkowski.

"It is the best arena to play in because the fans are on both sides and they're right over the ice so it's louder," said Proctor. "It's a great feeling to come out on the ice in front of our fans."

Lacrosse Popularity Spreads

One of the fastest growing sports in the Midwest is making its presence known at the U of I, as the Illinois Lacrosse Club tripled its membership this year. After a disastrous spring season, the team held a clinic for all new players during the first week of the fall semester. The result was two teams totalling almost 90 members.

"I'm optimistic about our future, and I'm very happy with the turnout that we've had this year," said offensive captain Louis Foreman. "We now have a strong base of support for the years to come."

The lacrosse club, which is not a varsity sport, has been in existence since the early 1970's. It is funded by SORF, the Division of Campus Recreation, and its membership dues. Seven other Big Ten schools have lacrosse clubs, while Michigan State and Ohio State have varsity squads. "On the East Coast, it's the sport to play," said Foreman. "Its popularity is growing in the Midwest."

The lacrosse club, which is not a varsity sport, has been in existence since the early 1970's. It is funded by SORF, the Division of Campus Recreation, and its membership dues. Seven other Big Ten schools have lacrosse clubs, while Michigan State and Ohio State have varsity squads. "On the East Coast, it's the sport to play," said Foreman. "Its popularity is growing in the Midwest."

The A and B teams each practice three times a week at FAR field. Practices are organized by faculty advisor and coach Dick Evans. However, the captains run the club during matches. "Pat (Donahue) and I do the yelling," said Foreman.

The club plays year-round, but their actual season occurs in the spring. Most members also play during the summer in Chicago. "Our emphasis is more on getting serious exercise than on winning games," said Evans.

Illini Ranked Number 1

The University of Illinois men's gymnastics team made history this 1988 competitive season. The team set school and meet records for the highest score in the Windy City Invitational in January. The team's score of 284.70 was at that time the highest score in the nation. Most importantly, the Illini beat out six Big Ten teams including Ohio State and Iowa who both gave Illinois trouble last season.

The Illini finished fourth in the Big Ten last year behind Ohio State, Iowa and Minnesota. But this year the No. 1 nationally ranked Illini, under head coach Yoshi Hayasaki, plan to take control of the Big Ten. Hayasaki said, "this is probably the best team we've ever had," during his 14 seasons at U of I.

One reason for this year's success is the return of four seniors and eight juniors. Seniors Paul Linder and Tigran Mkchyan will lead the Illini as co-captains for the second season in a row. Mkchyan has scored consistently in the 9.5- plus range for each of the six events, and is expected to take individual honors in the Big Ten. Linder should lead the Illini in their strongest event, the still rings.

Other seniors include Gary Anderson and Andrew Dillon. Anderson will join Linder in the still rings while Dillon will challenge for a spot in the pommel horse event. Juniors Aaron Fundich, Randy Lane, Chris McKee, Mike Minglie, Joel Tucker, Howard Zavell, Dave Zeddies, the 1986 Big Ten horizontal bar champion, and David Romero, who was sidelined for the season with a knee injury, along with sophomore Scott Diamond are responsible for the success of the Illini.

A second reason for Illinois' success is the recruitment of two of the nation's most sought-after gymnasts. Emilio Marrero and Dominick Minicucci are both from New York. Minicucci may be considered the nation's number one prospect and has the best chance of all the Illini gymnasts to earn a spot on the 1988 Olympic team. Marrero, who has competed internationally, was the New York State Champion and 1986 Junior National still rings champion. "(Minicucci and Marrero) are doing phenomenal jobs right now. They are the two best freshman in the country," Hayasaki said.

Also joining this year's squad are Alan Hirsch and Lee and Mark Wolochuk. The Wolochuk twins were two of the state's best performers on the pommel horse in high school.

Can the Illini maintain their No. 1 rank for the entire season and accomplish their season goals? Coach Hayasaki says the team "definitely will try to win the Big Ten championship and go on to reach the final three in the NCAA, which is comparable to the final four in basketball. We have a very good chance for finishing the No. 1 team in the NCAA's.

story by Ken Florey
layout by Patty Gotter
Continuing to Improve

The Illinois women’s gymnastics team had a case of the opening jitters as they began the season with a pair of losses at Michigan and Michigan State. Against Michigan, the team scored a disappointing 172.3 points and was led by freshman Susan Adams, who scored a 9.2 to tie for first place on the parallel bars. Junior Debbie Shively gave a consistent performance, scoring 8.8 on the beam, 8.9 in the floor exercise, and 8.85 on the vault.

The next day against MSU, Illinois improved its team score to 179.5, but lost to the Spartans, who scored a 182.85. Sophomore Heather Singalewitch’s composite score of 37.1 won her first place in the all-around.

The Illini were hoping to raise their score above 180 as the season progressed. They accomplished this goal in their next meet as they defeated Southeast Missouri State 182.1 to 171.0. SEMO was ranked No. 1 in Division II gymnastics. The Illini were hoping to gain revenge against ISU, who won the competition last year.

Not only did they get revenge, they bettered their mark against SEMO by one tenth of a point with a score of 182.2. Singalewitch once again won the all-around competition with a score of 37.9, highlighted by a 9.55 on the balance beam and a 9.6 on the floor exercise.

After the victory, the Illini were ranked 15th in the nation and the future looks bright for the team as they hope to qualify for the NCAA tournament. "We’re doing well right now," said head coach Bev Mackes. "We’ve been scoring 182 recently. Last year at this time we were scoring 174 and we ended up at 183." Mackes, in her 10th season coaching at Illinois, added that her teams have gotten better every year. If the Illini can keep their confidence up and injuries to a minimum it should be a smooth road ahead for them.
The Illini track team tore through the Big Ten last season capturing both the indoor and outdoor titles. Can a team which took both championships by over 30 points continue to prevail? There should be no doubt as six nationally recognized athletes return to the squad this season.

Dave Halle, 10,000 meter outdoors; Charleton Hammer, 800 meter outdoors; Jon Thanos, 3,000 meter steeplechase; Tim Simon, 400 meter outdoors; and Lee Bridges and Rod Tolbert, 1,000 meter relay are the All-American Illini who will make last season's accomplishments a reality this season.

These men will also help make up the losses of graduated seniors. Lane Lohr, Big Ten vault champ and NCAA runner-up, and John Elliot, Big Ten high hurdles runner-up are among the graduates.

The Illini have had their best year for recruits, according to head coach Gary Wieneke.

Senior Dean Starkey will now head the vault team as he went over 18 feet last year. While senior Earl Parham will try to follow Elliot's successes. Bannon Hayes, who won first place in both Big Ten long and triple jumps, will lead the Illini long jumpers. The veterans will not be alone in accomplishing the team's goals.

The Illini have had their best year for recruits, according to head coach Gary Wieneke. Len Sitko, Illinois State long distance champ, from Notre Dame High School in Niles, and pole vaulter Bobby Shanks of Indiana are among the new Illini. Coach Wieneke is confident that the Illini will accomplish their goals of winning both indoor and outdoor titles for two years in a row; "A great returning nucleus coupled with new recruits will lead to a successful year."

Story by Ken Florey
Layout by Socorro Soberano
A victory in the Indianapolis National Invitational and a second place finish in the Big Ten outdoor meet were the high points of the season for the women's track team in 1987.

Most of the athletes performed better at Indianapolis than they had all year. The sprinters and hurdlers were the strength of the Illinois team, as they defeated eleven other teams.

Purdue defeated the Illini team by a score of 115-112 for the outdoor title at Iowa City, Iowa.

"Second place is our highest finish in recent history in the conference," said coach Gary Winckler. The inexperienced team, comprised mostly of freshman and sophomores, finished fifth in the Big Ten indoor meet.

"We are very optimistic for this season," said Winckler. "Most of our top athletes are returning."

"We are very optimistic for this season," said Winckler.

Five members of the team were named All-Americans at the NCAA championships in June in Baton Rouge, La.

Victoria Fulcher qualified in the 400-meter hurdles with her 58.12 second finish at the Indianapolis meet. Also qualifying was the 400-meter relay team of Leticia Beverly, Angela McClatchey, Renee Carr, and Celena Mondie, when they ran a 44.79 at the Penn relays.

upper left Melissa Strouser runs past Western Illinois.upper right Kim Dunlap sprints past her opponent.

Try to imagine what it would be like without Illini football or basketball games, or with no volleyball, wrestling, baseball, or swimming. How many of us have used the golf course or participated in intramural sports in the bubble in Memorial Stadium? Without these sports and the facilities, life at the U of I would be all work and no play. Although my parents might cherish that thought, it just would not be college without the Illini. That dreary image would be reality if it were not for the U of I Athletic Association.

The Athletic Association (AA) is a nonprofit organization which receives no university funds or state money, but covers all of its own expenses. The self-sufficiency of the AA is impressive considering the accomplishments of this organization.

Memorial Stadium was partly financed by the AA, and the new turf on the field and the bubble over the stadium were completely paid for by the AA. The AA also built the new 2.5 million dollar Proano Stadium for Illini baseball and track teams. A new floor in Kenney Gym for the nationally ranked volleyball team was partly funded by the AA. Building and maintenance of the 36-hole University of Illinois golf course in Savoy is credited to the Association.

Beside these past projects, the AA is responsible for every aspect of seasonal sports. All athletic scholarships, coaching salaries and sporting expenses are paid for by the Athletic Association.

The Athletic Association is always looking for areas in need of improvement. Three new projects are now receiving its attention. First, a new tennis facility is going to be built. The Illini wrestlers, gymnasts, and volleyball players will have a new home in a multipurpose sports facility which is the second project. The complex will have practice facilities, locker rooms, and a small arena. The third project is a new administration building for over 200 fulltime employees who now rent offices in Assembly Hall. The funds for these projects come from several areas.

Nearly half of the revenue for the 13 million dollar Athletic Association budget comes from football revenue, 80% of which is from ticket sales. Basketball revenue accounts for nearly 40% of the budget while the remaining money comes from private contributions and television revenue.

"Exposure of the University of Illinois to the rest of the nation through athletics is an important aspect of the Athletic Association," according to Dana Brenner, assistant director of finance for the AA. Whether they are developing projects or building winning Illini teams, the Athletic Association helps place Illinois among the top universities in the country.
The Rehabilitation Center

For forty years, the University of Illinois has set nationwide standards in its commitment to disabled students. The design of the campus and the programming of the Division of Rehabilitation Education give disabled students full access to all campus academic and extracurricular activities.

Unknown to most students, the Rehabilitation Education Center is located on the corner of Stadium Drive and Oak Street in Champaign. The center is primarily designed for permanently disabled students. Its secondary purpose is to help the temporarily disabled.

The building provides special testing services, a fully equipped physical therapy facility, counseling, and services for the sensory impaired. These services, which use a wide range of computer technologies, include adaptive equipment for the learning disabled, the hearing impaired, or the visually impaired.

"We have the best computer technology laboratory to serve disabled students in the United States," said Tom Jones, assistant director of administration and special services for the division. For instance, those unable to type a command into a computer can use special voice-activated computers.

There is also a prosthetic shop where wheelchairs can be repaired and other orthopedic devices can be made. "If a student's wheelchair breaks down on the Quad, we want to get it fixed as quickly as possible, so that the amount of class time missed will be minimal," said Jones. Without this service, some wheelchairs would have to be sent across the country to be fixed.

According to Jones, not as many disabled students use the counseling service as they had in prior years. "They're more attuned to themselves now than they used to be," he said.

The division conducts a comprehensive sports program for disabled students who are interested in competitive and recreational sports, including men's and women's basketball, track and field, archery, air weapons, baseball, football, tennis, bowling, and swimming. "Recreation and sports is very important for the disabled students," said Jones. "It gives them a feeling of self-worth and also provides fun and physical fitness."

Physical therapy is used to correct injuries and to build strength of the disabled students. The number of temporarily disabled students who use the facility varies with the season. "We can get close to 1000 after Christmas break because of skiing and other winter activities," said Jones.

There are about 150 permanently disabled students currently on campus. "We have a very active recruiting program including scholarships," said Jones. "We don't demand that they use our services, but we're here for whatever they need."

According to Jones, the number of disabled students has dropped from about 250 during the 1950's because now there are many more equipped schools. The Division of Rehabilitation Education Services, which is currently directed by Joseph R. Larsen, began in 1947 and was the first in the country. As for today, "in terms of total services, it's our opinion that we are the best in the country," said Jones.

story by Jim Eade
layout by Leslie Cole
After one semester at the University of Illinois, I had mastered the art of avoiding homework. I would strategically surround myself with cheese puffs, potato chips, and Twinkies. After a long, hard day of attending every single one of my classes, I relaxed in my dorm room, a Coke within reach.

Sure I gained a little weight from this lifestyle but I still exercised. I must have walked at least four blocks a week between waddling to my car and to the cafeteria. But after a while the famous freshman fifteen became a trim fifty pounds. When I could no longer squeeze into my sweatpants I knew drastic action was needed.

I drove, no, I walked to IMPE and decided to look into the intramurals program. When I got there, I was in awe of what I saw—the third most famous intramurals program in the nation, behind Harvard and MIT, of course. Not only were the jock sports of football, basketball, and softball available, but also sports which I never even knew existed—Ultimate Disk, Walleyball, and Broomball. According to Greg Cales, the assistant director of men's intramurals, during the fall 1987 semester, U of I students, faculty and staff members had participated in intramural activity 45,000 times.

I did not want to join the water sports like swimming or water polo, even the innertube games, since I out-grew my swimsuit two months ago. The more strenuous sports of hockey, soccer and wrestling were definitely out of the question.

While psyching myself up by watching ESPN, the true sport for me became obvious. There were plenty of golfers who apparently shared my love for food, and I already owned three pairs of checkered pants. After searching for my golf balls in the bushes and mercilessly scratching myself to death, I decided to become a champion frisbee golf player instead.

Now that I am an experienced Illini-Intramural I have high hopes for my future. As soon as I start talking to girls, I'm going to put together a co-rec team and really make my mom proud of me.
Many students devote their time to academic excellence while others pursue athletic achievements. Fighting Illini junior, Chris Schwarz has conquered both of these goals as a nearly straight-A student and a Varsity volleyball player. Each semester Schwarz has been on the Dean's List while recording 5.0's her last two semesters in the U of I School of Business. As one can imagine, such a feat must require an incredible amount of time and energy.

Schwarz's daily schedule is packed with less then 2 1/2 hours a day available for meals and leisure. A typical day begins with an 8 or 9 o'clock class and lasts until 2 p.m. (including lunch), followed by a trip to the gym where she prepares for practice. After volleyball practice and a good meal at the Varsity Room, she returns to her apartment where she enjoys a luxurious half hour rest before cracking the books. As Schwarz is able to budget her time during the week, the weekend games truly test her efficiency.

One problem many students face is that of falling behind as the semester grows more tiresome and tougher. Unfortunately, the volleyball season and the semester follow the same pattern. Schwarz takes advantage of the boring bus rides to away games. "While most people are sleeping I have to spend the time keeping up with my studying," she says. This academic dedication has not gone unnoticed.

Schwarz has received several awards including the 1986 Big Ten All Academic honorable mention, the 1986 Kiwanis Academic Award, and the 1986 George Huff Academic Award. A new team academic award is given to players above a 4.0. Schwarz has won that award twice.

Often the taxing schedule of games causes conflicts with school work. Apparently, Schwarz's dedication is appreciated when problems arise, "Most teachers feel honored to have you in class, especially when we're having a good season." A successful season which continues well into the NCAA tournament can turn into a disadvantage for Schwarz, however. "If we advance to the final four, exams will have to be taken after Christmas break." she explained.

When people question if Schwarz has an easy schedule, they are soon quieted. Schwarz is a finance major and, as she has international banking in mind as a career, she may pursue a double major in German. Her German was strengthened after a visit to Vienna, her parent's homeland, one summer. "I enjoy German and I want to study abroad in Vienna next semester." Whether in class or on the court Schwarz always gives her best shot.
About five years ago in West Germany, a talented high school basketball player was playing on a semi-professional team. This young man, Jens Kujawa, was destined to leave his home country and family and become an important part of the "Fighting Illini" basketball team.

Kujawa began his United States basketball career by playing in two different high schools. First, as a junior, Kujawa played in Bellinger, Washington. After a year, he transferred to Taylorville, Illinois. In Taylorville, Kujawa lived with a host family, who he would later consider to be his American family.

When the choice of colleges came up, Kujawa had U of I and University of California at Berkeley in mind. Illinois was his choice because of their nationally ranked basketball program. Also, by attending Illinois, he would be able to stay close to his family in Taylorville. "It's almost like they've adopted me," Kujawa said. "It's great to go home for birthdays and holidays."

Though he has an "adopted family" in the United States, Kujawa misses his natural family and returns to Germany every summer. Last Christmas, Kujawa's parents made their second trip to Illinois to visit.

According to Kujawa, many differences exist between the United States and West Germany. "Basketball in the U.S. is a way of life and big money is a possibility, while in Germany basketball is more like a hobby. "School is also different. In Germany, college is extremely specialized and has many strict requirements. "School is very difficult," Kujawa stated. "Tests in Germany are like taking the MCAT's three times a year."

Balancing basketball and academics is not difficult for Kujawa. As a Finance major, he "does not need to give 100% to books" in order to get good grades. He now has a 4.1 GPA. Excellent basketball and strong academics do have their drawbacks, though.

"I would like to get more involved in campus activities and my fraternity, Alpha Tau Omega, but time just isn't available." His schedule is demanding, with classes from 8 or 9 a.m. until noon, and basketball practice from 1 to 7 p.m.

Kujawa knows his commitment to basketball and academics will pay off in the future. He would like to play professional ball and eventually become an investment broker. Although Kujawa knows he could play basketball in
Golfers Show Their Strength

If the Illini are to be one of the few teams in the nation to play in the NCAA golf tournament, this is the year. The men's golf team has had almost the same members for the last three years. "This team has a great deal of talent compared to teams in the past," claims coach Ed Beard. The Illini have started the season in a winning way.

Although the Illini finished a disappointing fourth place in the Big Ten tournament last year they are showing their true strength this season. The golf team won their first two tournaments and took third place in the third tourney.

The team began the season by breaking their own tourney record with 22 over par in the Iowa Fall Classic. Junior Steve Stricker won the tournament and tied the individual record.

In the second tournament, the Illini played against some of the toughest teams in the country at the Butler Intercollegiate Classic. The Illini won that tournament, with senior Mike Small taking first place.

The third tournament, at Ohio State, was again won by All-American Steve Stricker, but the team took third. The remaining Illini are awaiting their turn to win a tournament. Seniors Don Edwards and Chuck Fiser along with junior Kevin Fairfield make up the rest of the winning veteran team.

The Illini are working toward their goal, a Big Ten championship. Making the NCAA tournament as a team is the next priority. Making the NCAA's for individual members is even more difficult, yet Stricker has played in the tournament the last two years.

With the fine playing so far this season and the experienced squad, Illinois fans should be proud of the men's golf team. According to Coach Beard, "We have a good legitimate shot at making the NCAA tournament. We just missed it last year. If we continue to play well the team can make the tournament."

Par for the Course

The 1987 season marked the tenth coaching season for Illini women's golf coach, Paula Smith. She has developed many young women into fine golf players. This season is no exception, as the Lady Illini hope to be contenders for a Big Ten championship.

According to Smith, "Individual accomplishments of their goals will result in a successful team season." Last year the Illini finished 6th in the Big Ten tournament, where they shot their best round of the spring season. Although the team will miss teammates Cheryl Arnulton and Connie Borbeck, the Illini will retain a strong team. Now a junior, Justi Rae Miller placed 7th in the tournament and was named Most Valuable Player for the season.

Miller will be joined by seniors Brenda Macconnachie and Allison Johnston. Sophomore Elizabeth Keller, Sue Winkeltem, and Shelley Wood also are important players on this year's squad. There are four recruits on the team. Kristen Klein originally from Barrington, Ill., now living in Tampa Bay, Fla., and Lisa Biehl from Fithian, Ill., are two of the new players. Julie Grummish and Tracy Kunz, sister of Illini basketball player Phil Kunz, complete the team.

Coach Smith has high hopes for these players after the fall results. Most of the players, 8 of 10, have competed in the fall tournaments which allowed Smith to evaluate the team and prepare for the spring tournaments. The Illini posted their best results by tying for second place in the Lady Spartan Tournament at Michigan State. The second place finish was accomplished with Miller's help when she won the tournament, her second win of the season. Macconnachie, who was MVP two years ago, scored 84-77-75 which set her pace for the season. With half the season finished, the Illini were ready to make their adjustments and charge into the spring half.

Only 17 of 100 teams from Division I compete in the NCAA tournament. Indiana represented the Big Ten last year. The Lady Illini hope to send Miller or Macconnachie to the tournament as individuals. An incredible team effort would be necessary for the team to make the national tournament.

"The race is wide open and we should finish in the top three teams in the Big Ten," said Smith. The women are doing their best to make Illinois proud of its Illini golf team.

After a mediocre season in which they carried only one member, the Illinois men's diving team is using this year to rebuild.

"We've got three divers this year," said coach Fred Newport. "Five is what I would like to have." Newport explained the slow season was due to a bad recruiting year.

Matt Scotty, last year's lone diver, was bothered by a chronic shoulder injury. "He dove, but he wasn't as effective," said Newport. Scotty had surgery on his rotator cuff in the fall of '87 and was expected to be at full strength for this season, which started in November.

Newport has added two freshmen this year. Ward Makielski finished third in the Michigan state meet last year. He is "talented, smooth, and very experienced," according to Newport. Walking on the team is Willie Laszlo of Lockport, who finished seventh in the state last year.

"We've got a good group of people this year," says Newport. "They're good student-athletes."

This year's team competed at IMPE for springboard events, and traveled to Clayton, Missouri, a suburb of St. Louis, for platform competition.

Another Season

In the last thirteen years, the Big Ten divers have scored more points than every other college diving team in the country combined," Illini coach Fred Newport proudly claims. College diving, for the most gifted athletes, is often used as training for the Olympics.

Big Ten universities, through their diving reputations, attract divers from foreign countries. The University of Illinois diving team, which finished 4th in the Big Ten last season, is no exception.

Two of the four divers on this year’s squad are from Canada. Renee-Claude Auclaire, a transfer student from the University of Montreal, is a vital part of the team. Auclaire has competed as a finalist in the World University Games in Japan in 1985. These games are known worldwide to be second in sporting competition to the Olympics. This talented athlete may have decided to attend the University of Illinois after meeting Illini Anne-Marie Bevis in a Canadian diving competition. Bevis, also Canadian born, placed third in the Canadian National Championships.

As Auclaire and Bevis are unique to the Illini, their two teammates also show exceptional qualities. The leader for the Illini team is senior Michelle Brown, who is ranked 21st in the NCAA.

The fourth member of the team is Anna Gallan. While most collegiate divers have been perfecting their art since they were children, Gallan is an exception. Gallan began diving on December 5th, 1986 as a junior at the U of I. "Anna has tremendous heart and a lot of desire," Newport said. Gallan and the entire team are striving to perform to capacity at the Big Ten Championships.

"Ohio State and Michigan are going to be the toughest competitors," said Newport, who is confident the Illini will finish in the top three teams in the Big Ten. The team faces a tough season but thoughts of the conference champ title is not out of the question for Coach Newport. "It is not unrealistic to hope to outscore every team in the Big Ten," he said. Perhaps we may see Illini divers competing in the Olympics one day.

What varsity team has been the most successful at Illinois, dominating its foes year in and year out? Those of you who have no idea are certainly not alone. It's the Illini fencing team, coached by Art Schankin, which has won 38 conference titles.

With only two seniors graduating from last year's 22-1 Big Ten champion team, this year should be no exception. "We should win the Big Ten again," said assistant coach Mark Snow. "We have a lot of talented seniors, and some good rookies."

There are three different categories in fencing: epee, foil, and sabre. The whole body is open for attack in epee, while foil excludes the head and arms. In the sabre category, anything above the waist is a target. The swords are not sharp, so there aren't many injuries, except maybe some bumps and bruises.

The team is led by senior captain Tim Hensley, the 1987 individual conference champ. Hensley will duel in epee, which is the team's strength. Also in epee is junior Joe Socolof, and senior Miles Phillips, the 1986 conference champ.

Seniors Reiner Kemper and Kenny Song will compete in the sabre class. They were 94-23 in dual meets last year. The foils will be led by senior Steve Gillette, who posted a 59-4 mark last year. Sophomore Mike Calderisi, and freshmen Glenn Schicker and Steve Chung will gain some valuable experience this year.

The team began its competition in December against tough opponents Notre Dame, Stanford, and Air Force. The Big Ten championships were held at the end of February, followed by the NCAA's in March. After an eighth place finish last year in the country, the team hopes to compete for the national title.

layout by Patty Gotter
The goal for this season's Illini wrestling team is to improve on its fourth-place finish in the Big Ten in 1987, a year in which they sent five team members to the NCAA wrestling championships in College Park, Maryland. The Illini had never sent that many wrestlers to the national championships. Although none of the five Illini wrestlers placed, the nationals were a learning experience and should benefit the four wrestlers who return this year.

The five qualifiers were Mike O'Brien at 126 pounds; Keith Healy at 134 pounds; Kirk Azinger, 142 pounds; Kevin Mottlowitz, 190 pounds; and the heavyweight, Brian McCracken, in the 190 and above category. O'Brien and Healy won their first round matches but were defeated in the second round. Coach Ron Clinton had hoped the team would finish in the top fifteen in the country, but the Illini ended up 40th. The team's national qualifiers, except McCracken, will be back this year.

The fourth-place finish in the Big Ten championship was the team's highest in 25 years. Healy, Azinger, Mottlowitz, and McCracken took third place in their divisions while O'Brien placed fourth.

As for this year, Clinton has high hopes for his top four wrestlers. "We've got some senior leadership, but outside of those four, we're young," he said. "We'll see how the other kids go."

Coach Profile: Lou Henson

This Illini basketball season could provide coach Lou Henson with his 500th college basketball victory. "I really feel good about (the record). I also feel good about the percentage of wins (.674)." Coach Henson could then move into the ranks of the top-20 all-time winningest college basketball coaches. At the start of the season, Henson had 481 wins and was ranked 26th. There is no doubt that Henson will reach this milestone as the Illini have posted 19 or more wins in 8 of his 12 seasons with the team, including his last five consecutive seasons.

After Henson, from Okay, Oklahoma, played basketball in his home state at Connor Junior College and at New Mexico State, he began his successful career in coaching. At his first job, beginning in 1957, Henson provided Las Cruces High School in New Mexico with three state champion titles and an overall record of 145-23. Henson's high school coaching success shot him into the ranks of college coaching.

Although his first season at Hardin-Simmons was a losing one, 10-16, he would produce winning teams for the next ten years. Twice during those ten years, Henson matched the school record of 20 wins in a season. In 1967 he took the coaching position at his alma mater, New Mexico State.

Henson reached the National Collegiate Athletic Association playoffs in his first year as the NMS basketball coach, as he would in five more of his nine years at NMS. The 1970 season proved to be Henson's best. The team ended with a 27-3 record that broke the school record for wins and finished third in the NCAA tournament. The UCLA Bruins, under coach John Wooden, stopped Henson's team that year for a third time in the NCAA tournaments. Ironically, Wooden's retirement in 1975 led to Henson's leadership role with the Illini.

Then-Illini coach Gene Bartow replaced Wooden at UCLA, which left the vacancy at Illinois for Henson. The basketball program at the U of I was in sad shape with consecutive 5-18 and 8-18 seasons. Henson was the cure for the Illini basketball blues.

"I knew the program was down and it would take time to build. We were excited about building it. Today we feel good about the program," said Henson.

Henson took his team to the NCAA final four at NMS. His next goal was to take a team to the final four in the National Invitational Tournament. The Illini placed third in the NIT tournament, initiated the Illini NIT/NCAA tournament appearances. Since then, the Illini have made annual returns to these national tournaments.

Following Henson's tradition of setting win records at every school he has coached, the 1984 and 1985 Illini teams set records of 26-5 and 26-9, respectively. Henson's success in the '84 season led ESPN to name him the national Coach of the Year.

Henson is successful as a coach for many reasons. "I set goals of 20 wins a season." The Illini have had an average of 24 wins in the last four years. Henson also is a master at the most important aspect of coaching. "Most important is recruiting and in-state players are best for recruiting." Ten of the eleven regular players on this year's squad went to high school in Illinois.

As for this season, Henson hopes to "finish high in the Big Ten or win the Big Ten (which is considered to be the toughest conference in the nation) and to reach the final four." The Illini, led by Lou Henson dressed in his spirited Illini-orange sport coat, are definitely heating for another successful season.

lower left Coach Henson leads the young Illini team into Big Ten contention. lower right Coach Lou Henson is one of the top five active coaches in victories.

What some coaches strive for in a lifetime, Illini volleyball coach Mike Hebert accomplished in just three years. He has brought a struggling team to national recognition. Under Hebert, the Illini have seen more individual, team, and national honors than ever before. Now in his fifth season as head coach, a national championship could be in sight.

Hebert was not always known for his coaching prowess. Ten years ago he was teaching at a small liberal arts college in Pittsburgh where he played volleyball once a week. A coaching position at the University of Pittsburgh opened and his remarkable career began.

Hebert has specialized in creating successful volleyball programs. In his four years at Pittsburgh from 1976 to 1979, he consistently produced winning teams. Hebert compiled a 129-52 record while guiding his team to two consecutive EIAW regional championships and 13th-place finishes in the national championships.

In 1980, the volleyball program at the University of New Mexico sought new life. Hebert was their answer, as he led the team to the NCAA Regional Championship. After ending his career at New Mexico in 1982 with a 60-57 record, another ailing volleyball program needed the assistance of "Dr. Mike." The University of Illinois was destined to experience national recognition in volleyball under Hebert's skillful direction.

"I felt that Illinois, with its academic integrity, being part of the Big Ten athletic tradition, and being near the recruiting talent pool of the Chicago area—I felt this was a great place to build a great program."

Obviously, Hebert was correct because he has indeed built a great program. In 1985 he led the Illini to its best season record of 39-3 and its first NCAA appearance. Last season, Hebert guided the Illini to a 36-3 record and a 5th place tie in the NCAA tournament. The Illini, who were undefeated in the Big Ten, captured the Big Ten Championship for the first time. His spectacular record of 98-46, considering just 6 loses in the last two years, and the nationally contending Illini team of today, prove what Hebert can accomplish.

Hebert's efforts have not gone unnoticed. In 1985 he was named NCAA Division I National Coach of the Year in addition to honors of Big Ten Coach of the Year for both 1985 and 1986. Last summer he served as head coach of the USA Women's team in the World University Games in Yugoslavia. Hebert also currently serves as president of the American Volleyball Coaches Association.

Can Hebert provide the motivation his players need to be a 1 team? Considering that last season's Illini fans saw five players on the All-Big Ten team including Mary Eggers, who was also Big Ten Player of the Year and an All-America First Team selection, little doubt remains. Most importantly, Hebert feels his job is not finished, "I came here to win a national championship."

upper left Coach Hebert watches the game from the sidelines...upper right and advises players on the team.

layout by Debbie DiMaggio
The 1987 volleyball team, under coach Mike Hebert, has made Big Ten history. The spikers broke a Big Ten conference record for the longest winning streak in any sport. The record of 37 victories was formerly held by Bobby Knight. An important part of this achievement is that "the team played so consistently, which is difficult in any sport," said Hebert who, last season, was named Coach of the Year for the second consecutive year.

The Illini had another impressive season in 1986. The team went undefeated in the Big Ten and reached the finals of the Mideast Regionals where they were defeated by national champion runner-up Nebraska. This was the Illini's second consecutive NCAA appearance and the spikers have continued their success streak in the 1987 season.

This year's team appeared once again in the NCAA tournament. The team also repeated as Big Ten champions (17-1) and entered the postseason play ranked 10th in the nation with a record of 28-6. Coach Hebert said he feels "the team has a reasonable chance of making the final four" in the NCAAs. Strong team leadership was the greatest factor in this year's team's success.

Senior Disa Johnson from Western Springs, Ill., and junior Mary Eggers from Aurora, Ill., have become the team leaders. According to Hebert, "(Johnson) has played as a strong leader." While Eggers, for the third time in a row, earned All Big Ten Conference first team honors. With Eggers and Johnson's leadership and the remaining squad's talent the 1987 Illini are expected to be the best team ever.

The three other seniors on the team are Lori Anderson from Blue Mound, Ill.; Elizabeth Binkley from Cleveland Heights, Ohio; and Paula Douglas from St. Louis, Mo. Juniors Chris Schwartz of Orland Park, Ill., and Sandy Scholten of Downers Grove, Ill., have both had a successful year. Bridget Boyle from Decatur, Ill., and Nancy Brookhart from Glen Ellyn, Ill., are the returning sophomores. The newcomers to the team are Laura Bush, Steward-

layout by Patty Gotter
The University of Illinois 1986-87 men’s basketball team had just finished a successful regular season of 23-8. The NCAA tourney awaited as the Illini were seeded third. In the first round Illinois was ready to play a team which was unknown to Illini fans, a team which coach Lou Henson and his team had overlooked, Austin Peay. All of our NCAA Final Four hopes were shattered as the Illini were knocked out of the tournament with a 68-67 loss.

Ken Norman, Doug Altenberger, and Tony Wysinger will always remember their final college game as a heartbreaking defeat, as will Jim Green, Olaf Blab and Dave Wells who also wore Illini uniforms for the last time.

However, the 1987-88 Illini would have a chance to settle the score with Austin Peay and decisively beat them with a 100-62 victory.

This 38-point victory margin was accomplished with fast tempoed and quicker Fighting Illini team. Returning players include senior Glynn Blackwell; juniors, Lowell Hamilton and Jens Kujawa; and sophomores, Steve Barbo, Kendall Gill, Phil Kunz, and Larry Smith. The talent and experience of these returning seven will be vital for Illinois’ success as they face perhaps one of their toughest schedules. Atlantic Coast Conference Georgia Tech and North Carolina as well as South- west Conference Auburn and Tennessee were scheduled to come to the Assembly Hall to test the Illini. The 1987-88 Big Ten Conference schedule would prove to be the toughest in the nation. Fortunately many new additions to this year’s squad added strength.

Kenny Battle is eligible to play after transferring from Northern Illinois University. Battle, 6-6, was star player at Northern with 20.1 points averaged per game. The crowd-pleasing Battle will have a tough job carrying the offensive load left by Norman, Altenberger, and Wysinger.

Also aiding the Illinois offense is sophomore Nick Anderson who was named “Mr. Basketball” in Illinois in 1986. Anderson is from Simeon High School in Chicago as is new Illini player, 6-7, Ervin Small. Small’s quickness and rebounding ability should bring him some playing time. Both Anderson and Small sat out their freshman year due to Proposition 48.

Proposition 48, which requires a minimum ACT score for eligibility, has caused high school super-star Marcus Liberty to sit out this season. Liberty, 6-8, from Martin Luther King, Jr. High School in Chicago was the highest-ranked high school player in the nation. Liberty will be a welcome addition to the team next season.

But this season is where the Illini have their minds set. Lou Henson and the whole Fighting Illini team from the nationally known stars to the energetic and dedicated walk-on players like Eddie Manzke, Bryon Brickner, Mike MacDonald, Ron Trice, Pat Kennedy, Randy Scheuneman, and Travis Smith are striving to accomplish their goals. Henson hopes “to finish high in the Big Ten or to win the Big Ten.” Such goals will be tough to achieve considering the strong competition of Purdue and Michigan as well as NCAA champion Indiana and Ohio State. Whatever place the Illini finish in the Big Ten, the experience gained throughout the season should give the already talented team strength in the NCAA tournament.

story by Ken Florey
layout by Denise Hott
The Illini women’s basketball team has been on a roller coaster this year. The team had been ranked as high as 18th in the country, but after seven conference games, they still did not have a Big 10 victory. They qualified for NCAA tournament play in the last two years and started out the season well this year.

The Illini opened the season in fine fashion with a 73-68 upset of 12th ranked Vanderbilt in front of a home crowd. Senior Jenny Johnson scored 22 points and DeeDee Deeken had 20. The team played this game without top returning scorer Angie McClellan.

The Illini opened the Illini Classic in December by beating Ball State and Cal-State Fullerton. McClellan took MVP honors in the tournament with 49 points and 23 rebounds.

The Illini were 5-1 after another big upset, this one a 61-58 victory over 13th ranked Southern Illinois. Coach Laura Golden used a press and half-court zone defenses to effectively shut down the Salukis. McClellan once again led the scoring with 27 points.

Soon the conference season opened. The Illini were picked by some to finish as high as third in the Big Ten. Another NCAA bid seemed likely. Then came disaster. Senior guard McClellan, the team’s leading scorer and rebounder, was suspended permanently for disciplinary reasons. Then Johnson was forced to miss several games with a broken nose. The Lady Illini still had not been able to buy a victory in the Big Ten. To make matters worse, center Kerry VanHandel went down with a stress fracture in her foot during a game against Purdue and was lost for the rest of the season.

Freshman Acquanetta Washington has been a bright spot in this season of adversity. She played well against Purdue, scoring 12 points and grabbing 9 rebounds, and is a hope for the future. “She was all-state in Indiana,” said assistant coach Lori Hyman. “(Washington) has excellent hands. She’s really coming into her own.” Since many top players will be graduating, the Illini will be counting heavily on Washington next year.

The differences between the men's and women's swimming teams this season are more than their sexes. The men's team is young and will rely on top recruits while the women's is experienced and will depend on returning NCAA qualifiers.

Returning to the men's team are only four seniors; Tony Wilson from Australia; Ken Malmberg, Rockford; Brian Neylon from Ireland; and one junior, Gary Richter, of Palatine. Co-captains Neylon and Givot hold the Illinois records for the 100-yard butterfly and 200-yard backstroke respectively. Another record for the 400-yard relay freestyle is held by Graeme McGuffie, who graduated last season; co-captain, Malmberg; and sophomores, James Mackin from Burbank, CA; and Andy McVey from Beech Grove, IN.

These record breakers will set the pace for the team which includes sophomores Bob Allen, Hinsdale; Greg Dillman, Barrington; Peter Gruben, DeBuque, IA; and Chris Guerrara, Minnetonka, MN. The talented recruits will also add strength to the Illini; Bob Carstensen, Portland, OR; Scott Chastain, Richmond, KY; Mike Dinzler, Decatur; Greg Drake, Indianapolis; Greg Helwicks, Normal; Ed Jenkins, Louisville; Mark Kunde, Lake Oswego, OR; Chris Lubeck, Fairfield, CT; John McDonald, Boston; Scott Novesel, Tinley Park, IL; Paul Staples, Nepean, Ontario; Lance Tiedeimann, Mt. Prospect; and Ryan Vogt, Champaign.

The men's team finished seventh in the Big Ten and the women placed fifth last season. According to Patty DeForrest, graduate assistant to Coach Don Sammons, "The men's team wants to do better and place in the top five while the women's team would like to do as well if not improve to place fourth."
The women's team will be able to reach their goals with the returning NCAA qualifiers, seniors, Liz Grant from Australia and Gail Huttenlocher from Louisville, and sophomores Jenny Guillikson, Janesville, WI; Kris Treado, Grand Rapids, MI; and Katie McCarthy, Alsip, IL.

Not only did some Illini reach the NCAAs but also they broke several records during the season. Co-captain Huttenlocher broke three individual varsity records including the 100 and 200-yard breaststroke as well as participating in three relay record breaking teams. Grant set five individual records and three relay records.

Additional seniors who add strength to the Illini include Chris Domitz, Whitewater, WI; Sally Grandcolas, Kirkwood, MO; Theresa Getteridge, Carbondale; Ellen Mac Gregor, New Albany, IN; and co-captain Meta Rose Torchia, Kankakee. The team will also gain strength from its juniors, Allison Gardiner, Wilmette; Judy Kats, Peoria; and Elizabeth Mackin, Burbank, IL; and its sophomores, Michelle Meriweather, Libertyville, IL; Kristin Ostendorf, Hinsdale; Jane Schofield, Orland Park; and Patricia Sullivan, Lake Forest.

The women's team also has a strong field of recruits including Michelle Dixon, Santa Cruz, CA; Robin Orloski, Arlington Heights, IL; Sandra Richter, Chicago; Erin Roscetti, Springfield; and Wendy Salem of Northbrook, IL.

Can the young men's and the experienced women's teams accomplish their Big Ten and NCAA goals? According to Coach Sammons, "The team is coming around so far but the conference championships is where the team will prove itself."

New Field * New Coach * New Coaches

The Illini baseball team will get a fresh start this season. A new 2.5 million, 1500 seat Proano Stadium is anxiously awaiting the Illini sluggers and the 1988 season. The head coach and his staff also are new to the University of Illinois. After last season's difficulties, the Illini can now concentrate on bringing home a Big Ten title.

Last season was forty-two games old before the Illini had played a single home game. The old baseball field was torn apart to make room for the University's multimillion dollar Beckman Institute. Urbana's Prairie Park served as the home field for the remainder of the season.

Eventually, the Illini finished 32-24 overall and 9-7 in their division. Although this record tied Iowa for second place, the Hawkeyes had a 3-1 advantage over the Illini and advanced to the playoffs. The season finish was a disappointment to most Illini fans considering the talent on the team.

Of the nine graduated seniors, six signed professional contracts. Most notable is Darrin Fletcher who was drafted by the Los Angeles Dodgers. Fletcher batted .494 with 14 home runs and 67 RBIs. After an excellent season, he holds the career high HR and RBI records for the Illini. Apparently Fletcher takes after his father who is also in the record book for pitching four shutouts and for having an earned run average of 0.38 in 1962. Also among the graduates were four pitchers who took 21 of the 34 wins with them. The team's inability to reach their potential may have contributed to the loss of head coach Tom Dedin and his staff.

Augie Garrido, the new head coach has a tough job in store for him. If his success rate with the Illini matches his former accomplishments, Illinois will be the biggest threat in the Big Ten. In his 15 seasons at Cal State Fullerton, Garrido had a 667-292-6 record, a .694 win percentage. Garrido drove the Cal State Titans to 12 conference titles and a pair of national championships. In 1979 and 1984, Garrido and the Titans won the College World Series.

As Garrido is ranked 10th among active Division I coaches with 777 career victories, perhaps the Illini will become a nationally ranked team.

Garrido, age 47, is from San Francisco. He attended Fresno State and graduated in 1962. Before Garrido began his coaching career in 1966, he played for six seasons in the Cleveland Indian chain. Garrido and his wife, Tere, now live in the Champaign area.

Two veterans on the Illini team are more than able to help Garrido. First baseman Mike Wolters was a first team All Big Ten choice last season. Slugger, Brad Wentz, who plays right field, is expected to lead the team in home runs. He smashed 13 home runs last year making him second to Fletcher with his school record—15. Wolters and Wentz will be joined by an excellent group of new players.

Junior College transfers Jason Backs, pitcher, and Randy Zientra, outfield, will be joined by seven freshmen. Tom Michalak from Chicago will replace his brother, Tony who played shortstop and was drafted by the St. Louis Cardinals. Ryan Richmond and

photo by Jeff Barczewski
Scott Kendragan both join the team from Bradley Bourbonais High School. Local talent Andy Cotner also joins the Illini. Two out-of-state ball players Brian Duray from Hayward, Wisconsin and Chad Boeing from Ft. Madison, Iowa are welcome additions to the team. Can Coach Garrido mold this talent into a Big Ten contender?

If excellent coaching is what the Illini need for a championship we may soon be tops in Big Ten ball. Garrido is a three time winner of National Coach-of-the-Year honors in 1975, 1979, and 1984. Garrido feels ready to accept the challenge of turning the Illini team into a champion. "We will do our best this season to provide the Illini with a winning team."

Weekend Get-Aways

For about the same price as a bus ticket home, you could rent a tent and camping equipment at IMPE, and go canoeing in the many state parks in Central Illinois. So the next time you get those Champaign blues, find a car and spend a pleasant weekend in the country.

About 45 minutes out of town near Danville, Kickapoo State Park offers many activities to keep you busy. One of the more popular activities is canoeing in an old quarry that tempts its passengers with unknown dangerous depths. For the more adventuresome, there is a bit of white-water rafting and hilly paths for afternoon walks. There are designated areas for pitching camp and horseback riding facilities. Kickapoo offers the quickest escape from campus to get back to nature.

Just across the border in Indiana, Turkey Run State Park offers a scenic backdrop to canoeing in the winding river that flows through cutout miniature mountains. An old Kickapoo Indian in costume greets you at the gate to the park and overgrown trees and hills invite you to picnic. You will pass under many bridges as you canoe for two to three miles. About an hour and a half from the University, Turkey Run is one of the better deals in the area for a real look at nature's beauty.

Parks closer to school include Crystal Lake Park, Urbana; Clinton Lake, and Allerton Park in Monticello. Allerton is a retreat for many university organizations and has thick woods, sculptures, and Oriental Gardens. Crystal Lake and Clinton Lake also serve as fishing spots in the warmer months. At the RK Corral in Arcola, students can spend an afternoon horseback riding.

To really get away from school for a long weekend, a longer drive south can put you at the Shawnee National Forest near Carbondale and the Smoky Mountains in neighboring Tennessee. The Smokies offer some of the most breathtaking crystal rivers and refreshing environment in the nation.

Going camping is the best way to get away from being pushed around at the bars, getting fed up with midterm exams, and the usual mundane activities of weekend days. So head over to IMPE while it's still warm out and head out back to the great outdoors.

Last season, the Illini men's cross country team finished 7th in the NCAA's, their best finish in 10 years. This year's squad is as talented as last year's, and the Illini are striving to improve on last season's success.

Missing from the team which finished second both in the Big Ten and District 4 meets are seniors Jeff Jacobs, Greg Reynolds, Chris Bowe, and Paul Kivela. However, with returning cross country All-American, Dave Halle, and track All-Americans Joe Leuchtmann and Jon Thanos, the team's success is evident.

Seniors John Jacobson and Dwight Gilbert, junior John Powers, sophomores Dave Zimmer and freshmen Len Sitko, Chris Inch, and Kraig Ummel make up the rest of the team.

Cross country is a sport in which the playing field in rarely the same. Each course, either 8 kilometers or 10 kilometers in distance, is unique. In most meets, seven runners are placed in the field. The top five runners record their scores in order of finish, with the lowest score winning the meet. The Illini have scored low many times this season and have been ranked between 4th and 7th in the country.

"Dave Halle is our leader by placing first in every meet, while Jon Thanos provides total team leadership," said head coach Gary Wienke, "while (recruits) Sitko and Inch have provided excellent performances this season."

Can the Illini improve upon last season's success? Wienke believes the team "will finish in the top ten teams in the NCAA's and be as good as last year's team."
Led by new coach Marybeth Dyson, the Illinois women’s cross country team has had strong individual performances as well as good team efforts this year. The team’s top runner is sophomore Melissa Straza, who finished seventh in the Big Ten meet on October 31. Other team leaders are junior Sharon Locascio and sophomore Donna Russell.

The team opened the season by placing third at the Midwest Collegiate meet in Wisconsin. Straza finished eleventh, while the second through sixth Illini runners finished within a minute of each other. “They did a very good job of running together as a team,” said Dyson.

The Illini hoped to win the Illinois Invitational but injuries and lack of depth held them to a sixth place finish. Straza finished third with a time of 17:41, knocking 35 seconds off of her best time from last year. Locascio placed 17th.

Next on the schedule was the Marquette meet, where the Illini placed fifth out of eight teams. Straza finished sixth and Russell broke into the top ten with a ninth place finish.

The squad hoped to finish the season by at least tying last year’s seventh place finish in the Big Ten championship meet, but they wound up in eighth place. Straza did well, improving five places to seventh. According to Dyson, the team had been working hard in practice, but lacked a good summer training program. She was not hired until mid-August.

Dyson returns to the University of Illinois after serving as the women’s assistant track and cross country coach from 1982 to 1984. Dyson hopes to be competing for the conference championship and be a national level competitor in two or three years. “Right now we just don’t have enough depth,” she said.

above Sophomore Melissa Straza leads her way to a third place finish in the Illinois Invitational at Lake of the Woods.

First-year coach Jennifer Roberts-Rudd leads the Illinois women's tennis team this year as they try to improve their rank in the Big Ten. The team has a good chance to do so after the small turnover of players from last year. "We're definitely shooting for the top half in the conference," said Rudd. The Illini finished seventh in the Big Ten championships held last spring.

"We're concentrating on individual skill improvement," said Rudd. "I work with each athlete once a week on the style of play that we want in the spring. The athletes have improved a lot. They've got a positive, healthy attitude."

Rudd is no stranger to the University of Illinois. She competed on the tennis team during her junior and senior years and was twice voted team captain. She was a member of the Illini team that made an appearance in the 1982 Midwest Regional Tournament. Prior to returning to Illinois, she served as director and head coach of the Vic Braden Tennis College at Green Valley in St. George, Utah.

"I played college tennis because I wanted to coach college tennis," said Rudd, a Springfield native. "To be able to come back to the U of I makes it doubly exciting."

"We all like her a lot," said senior Susie Stout. "She's personable and she puts in time herself. We work hard but it's fun. That's what we lacked last year--fun."

"So far this year we're doing really well," said Stout. "We're all in good shape and we've got good morale. We did well against Northwestern, even though we lost 6-3. Usually we don't win any of the matches."

Top players on the Illini team are senior Kathy Neil and freshman Cynthia Chambers. The team played well against some nationally ranked teams at the Indiana Invitational. Although they won no team or individual awards at the tournament, the Illini won several matches against players from Kentucky, Notre Dame, Miami of Ohio, NIU, and SIU-Carbondale.

A Fun Year for Women's Tennis

Illinois Shows Potential

The Illini men's tennis team "has the potential to be the best team in Illinois history," according to head coach Neil Adams. "The players are team oriented, motivated, and good students." Adams is the youngest coach in Division I sports. However, he "doesn't want to be known as a young coach, but as a good coach."

Adams is well on his way to establishing his desired reputation. The Illini, under Adams, finished third in the Big Ten last spring. This is a significant improvement from the team's seventh place finish the previous year. Four of the players who were partly responsible for the team's success remain on the team this season.

Adams considers senior Mark Long from New Zealand to be one of the team leaders. Long was the first alternate to go to the NCAA tournament last year. Adams must be revealing the secrets of his personal success, holding the career record for singles and doubles wins; Long is only 15 wins behind Adams' record. Juniors Manny Valleco and John Gottsmann, as well as sophomores Gary Pearns and Hector Ortiz are all returning Illini players. Beside these veterans, seven of the eleven players on this year's team are new recruits.

These recruits possess talent which will help provide the Illini with a Big Ten championship. The second team leader, John Murray, is a transfer student from BYU. "John is a leader by example, he is very much a team player. He is the glue that holds the team together," stated Adams. Another transfer student from a junior college is Chris Lapriore, who played for the Illini as a freshman. Lapriore was once ranked 60th in the nation and was one of the top 5 junior college singles players in the country.

Other recruits are freshmen Neil Brown, originally from Texas, Brent Knowlton from Hinsdale, and Steven McRaven from Peoria. Sophomore Brian Dilman, also from Texas, and junior Greg Kennett of Bloomington, Illinois, round off the Illini team.

"The team is meeting up to my expectations," said Adams, who is confident the team will accomplish its goals. Winning the Big Ten championship, advancing to the NCAA tourney and breaking into one of the top 20 teams in the nation are the goals for this season.

"We concentrate on performance rather than outcome, winning will come." Adams' unique attitude has developed the winning team of last year, and with the talent of this year's squad, Illinois will have a champion tennis team.

For Champaign-Urbana, the winter Olympics could not have been better. Hometown favorite Bonnie Blair won the gold medal in the women's 500-meter speed skating sprint with a world record time of 39.10 seconds. Blair has been sponsored by the Champaign Police Department for the past six years and sent the city into an uproar because her victory gave the United States only their fourth medal at that time. A Chicago Tribune article called Blair "as genuine as a peanut butter and jelly sandwich." Fellow hometown Olympian Erik Henrikson also did well and contributed to the celebration in campustown.

For the rest of our nation's athletes, though, the party was not as enjoyable.

The U.S. hockey team was eliminated from medal competition and faced the possibility of ending in a last-place finish, the worst ever in U.S. history. The Soviets dominated the hockey competition and were well on their way to securing the gold medal.

The United States won a gold medal in men's figure skating and Debbie Thomas came in second place in the compulsory figures. Jill Watson and Peter Oppengard won the bronze medal in pairs figure skating.

The most controversial U.S. sport in the Olympics was the bobsled team. Members became irate when Chicago Bear wide receiver Willie Gault was a late addition to the team. Gault had the opportunity to participate in the event if his sled beat out others who had been practicing for several months.

Over half way through the games, the United States was in tenth place in total medals, 18 behind the Soviet Union. As the ceremonies came to a close, Americans looked towards a more fruitful experience at the summer Olympics in Seoul, South Korea.

Olympics
IMPE Alternatives

Physical fitness may be a craze of the 80s, but many of the popular places Illini use to fine-tune their bodies were built nearly nine decades ago. Three buildings, Huff, Kenney and Freer Gymnasiums, may not be equipped with the modern technology of IMPE, but Illini students, faculty and staff make these gyms popular places to go.

Kenney Gym is located at the intersection of Springfield Avenue and Wright Street in Urbana. Part of the gym was built in 1890 and the rest was constructed in 1902. The facilities include an indoor track, a swimming pool, two basketball courts, one volleyball court and a weight room. Kenney Gym boasts of having the only gym with free weights in its co-recreational facilities. The Illini Weight Lifting Club allows students to use the equipment. The Illini volleyball team practices and plays its home games at Kenney Gym. The men's and women's gymnastic teams also practice and hold meets there. Illini athletic teams also can be seen at another gym on campus. The men's and women's basketball teams practice at Huff Gym, located on the corner of Fourth Street and Gregory Drive. Built in 1925, the gym has five basketball courts, often used by intramurals; a swimming pool; a weight room; and ancient racketball courts that are located in the basement. The basketball team played its home games in Huff before Assembly Hall was built. But now, a "diverse crowd of town people, students, and faculty use the gym for basketball and running," according to gym attendant Kenny Flynn.

Freer Gym, which was built in 1931, has a swimming pool, basketball courts, and a small dance studio. Because the School of Applied Life Studies uses most of the building for research and many physical education classes are taught there, Freer is not used as much as the other gyms for recreational activities. Jack Steger, manager of facilities, said, "Freer has the best teaching pool on campus because of the layout."

Next time you go to IMPE and the wait for a basketball court is long enough to write a term paper, or the swimming lanes are so full you feel like you are part of a school of fish, remember the other gyms on campus. They might make working away those pounds a little bit easier.
This season will begin a new era for a hopeful Illinois women’s rugby club. After a 6-2-3 record in the spring of 1987, the team should be able to carry that momentum over into this year.

“We’ve got a good team this year,” said Paula Bienaman. “We have a lot of players; we are all in better condition; and there is a special camaraderie on the team this year, so the motivation is high.”

Coach Meredith Horn recruited a large number of new members by working during Quad Day and by placing ads in the Daily Illini, resulting in a team with more depth than ever before. Most of the new players have never played rugby before and must therefore learn the rules and fundamentals of the game. The club plays college teams from around the Midwest and the older, more experienced squads from Chicago. The women’s rugby club plays by the same rules the men’s team uses.

This marks the first year in which 18-season veteran Joan Barth did not play. She finished her graduate work and will be sorely missed. Barth has been president of the club and has unofficially always been considered the coach. She has been one of the club’s main boosters since its founding in 1978.

Although rugby is gaining popularity in the United States, it has a long way to go before attaining the same level of play as in many foreign countries. Fortunately, the Illinois men's rugby club has been blessed with several foreign exchange students. Among them is forward Ken Hodge of New Zealand and center Vernon McDonald of England. The team lost three exchange students from last year's team.

"They bring a lot of experience. Most of them have been playing rugby all of their lives," said club member Malcolm Armstrong. "This will be a rebuilding year since we've had several guys graduate."

After a strong recruiting effort in the fall, the club began the season with eighty members. According to Armstrong, the number usually drops to about fifty. While the club's coach, Hamish Fraser, took a fall sabbatical, Hodge and Stewart Birrell shared the coaching duties. Gene Jewell is the club's president and Jay Corgiat is secretary.

The team usually plays other college or city clubs within Illinois, although this year they will travel to Bloomington, Indiana, and to Ann Arbor, Michigan for the Big Ten Tournament. The city clubs are generally more experienced and much tougher to beat.

Contrary to what one might think, there aren't many major injuries in rugby, mostly bumps and bruises. "There are some cheap shots but nobody tries to hurt anyone real bad," said Armstrong.

Varsity Recognition?

The toughest obstacle for the men's soccer club this year has not been their opponents. After eight games they were undefeated and had allowed only three goals. Unfortunately, they are still unsuccessful in gaining varsity status, even though they meet all of the Athletic Association's requirements.

The club defeated Purdue twice, Illinois College, Northern Iowa, Minnesota, Illinois Wesleyan, and Millikin once each, and tied a tough Iowa team. They are led by a strong defense consisting of senior Eric Kuehl, junior Joe Kenny, freshman Brian Marshall, and senior Matt Downs. Leading scorers are sophomores Andrew Kokodynski and Dave Knutte. Steve Vivian and Steve Prebish share the position of goalie.

"We have a young team," said coach Joe Kenny. "There are only three seniors." According to Kenny, sophomore Mike Zarob, who plays center-halfback, controls the team. "For us to do well, (Zarob) needs to have a good game," he said.

The team had a strong turnout in the fall. About sixty people showed up for tryouts and 25 made the team. The club had a coach two years ago, but "he turned everyone off," according to Kenny. They were 1-7-1 two years ago and 8-3-1 last year when Kenny took over the coaching duties.

Kenny has submitted proposals for varsity status twice in the past two years, but it has been denied because the Athletic Association refuses to allocate funds for any more varsity sports.

Kenny believes the money is not available because of the amount being spent on the new athletic facilities on the south end of campus.

The club meets the association's criteria for varsity eligibility including fan and athlete interest, availability of recruiting and scheduling, a proposed budget, and other national and regional requirements.

"Everyone agrees soccer should be the next varsity sport, but it doesn't look like it's going to happen in the near future," said Kenny.

The women's soccer club ended the fall season with "about a .500 record, which wasn’t as good as the last two seasons," said senior forward Melissa Riley. "We had a lot of ties, but we did beat Eastern Illinois, Illinois State, and Loyola."

The squad was led by senior halfback Kathryn Mellon, junior fullback Shannon Douglass, and Riley. "Most of our team is young. We have a lot of freshman and sophomores," said Riley. The club recruits on Quad Day and with fliers and advertisements in the Daily Illini. They practice three times a week, working on drills, skill work, and a lot of running. "We don’t have any cuts. Those who are serious usually stay," said Riley. "Most have played in high school."

Larry Klinsky, a university student, coaches the club while Riley and Douglass handle the administrative work. The team used to have a faculty coach but he quit because of time commitments.

The team plays other Big Ten schools that have clubs, along with Eastern Illinois University, Marquette, Loyola, Illinois State and Bradley. The team doesn’t have enough money to play a schedule in the spring, although they do play in a few indoor tournaments.
Andre Dawson offers the Chicago Cubs a blank check to play for them and ultimately wins the National League MVP on a team that finishes last in the league. In 1986, Dawson will make a reported $1.8 million.

Two prominent sports figures lose their jobs due to racial remarks. CBS analyst Jimmy "The Greek" Snyder said blacks are superior athletically because of slavery and Los Angeles Dodgers executive Al Campanis remarked that blacks don't have the skills to become top managers.

Ben Johnson of Canada runs the 100 meter dash in 9.83 seconds, breaking the previous world record by .1 seconds.

The St. Louis Cardinals football team pack their bags for Phoenix, AZ, after financial difficulties. The St. Louis Post-Dispatch offered a survey to discover which was worse for the city, the Cardinals leaving town or baseball first baseman Jack Clark signing with the New York Yankees.

The first black quarterback to play in the Super Bowl, Doug Williams, leads the Washington Redskins over the Denver Broncos. MVP Williams led the 42-10 rout that was the NFC's fourth straight lopsided championship victory and the Broncos' second straight Super Bowl defeat.

Illinois football coach Mike White resigns after seven years, amidst allegations of NCAA recruiting violations. John Mackovic, former Wake Forest University and Kansas City Chiefs coach, replaces him five days before national letter of intent day for high school seniors who have been recruited to play college football.
Walter Payton retires from the Chicago Bears and his No. 34 jersey was immediately retired. Payton became a member of the board of the Chicago Bears and even hinted at playing another year if he was really needed. Safety Gary Fencik, the all-time Bears interception leader, also retires.

Bo Jackson defies human odds by playing left field for the Kansas City Royals and then returning punts for the Los Angeles Raiders as a "hobby." He gains special attention after sprinting past the quick Brian Bosworth on his way to a kickoff return for a touchdown.

The Illini women's volleyball team advances to the Final Four in Indianapolis. Coach Hebert broke Bobby Knight's record for most consecutive Big Ten victories.

The underdog Minnesota Twins, amidst a cloud of "homer hankies," defeat the St. Louis Cardinals to win the 1987 World Series. The power of Gary Gaetti, Kirby Puckett, and Kent Hrbek outlasted the injury-plagued Jack Clark and pitching staff.

The Winter Olympics in Calgary, Canada, and the Summer Olympics in Seoul, South Korea, mark the four-year tradition. Champaign native Bonnie Blair wins a gold medal in the 500-meter race and sets a new speed skating world record of 39.10 seconds.

The story was written by John Hanley and the layout was designed by Debbie DiMaggio.
The Windy City vs. The

The slogan should have read, "The '80s Belong To Chicago." From the acrobatic Michael Jordan to the graceful Walter Payton and from Wrigley Field to Comiskey Park, the Windy City boasts the greatest place to be a sports fan.

With four consecutive NFC Central Division championships and a 1986 Super Bowl victory, the Chicago Bears have become "America's Team." Just watching the team on the field is entertaining. "Iron" Mike Ditka, William "The Refrigerator" Perry, Walter "Sweetness" Payton, and Jim "Outrageousness" McMahon. Walter Payton is the NFL's all-time leading rusher and a member of a club that has, for the past four years, been in the top five in victories in the league. If nothing else, the Bears will never be accused of leaving town for warmer weather like the St. Louis Cardinals.

The Chicago Bulls, meanwhile, warmed up cold nights with sizzling fast-break basketball. By midseason, after the All-Star break, the Bulls were 30-22, with three games behind first place. The NBA's leading scorer, Michael Jordan with 33 pts.; and leading rebounder, Charles Oakley, with 13 rebounds; were dazzling in front of sold-out games at Chicago Stadium with high-flying tomahawk slam dunks and muscling under the boards. Michael Jordan is reason enough to watch a Bulls game. Newcomers Scottie Pippen and Horace Grant made respectable efforts for Rookie Of The Year honors and will no doubt be in a Chicago Bulls uniform for many years to come. Head coach Doug Collins is beginning to build a ball club that is fun to watch but also has the opportunity to challenge the teams in the upper echelon.

When the weather warms up, Comiskey Park and Wrigley Field are the best American ballparks in which to see a baseball game. During weekday afternoons, shirtless fans bask in the sun coming from over the bleachers at Wrigley Field, beyond the ivy-covered centerfield walls. Although the Cubs did not make it to the World Series, we can boast such superstars as Gold Glove winner Ryne Sandberg, ace pitcher Rick Sutcliffe, and National League MVP Andre Dawson. At night, the exploding scoreboard at Comiskey Park provides a treat for all fans. Both ballparks are the oldest in the nation and bring an aura of tradition to Chicago baseball.

There is, however, more to Chicago sports than previously mentioned. The Black Hawks, "Cold Steel on Ice," almost always skate to sold-out crowds and there is often more action in the stands than on the ice. The Chicago Sting has a championship in this decade.

Chicago ranks among a few U.S. cities, not including St. Louis, that has provided winners in sports for 1988. It is not only a fun place to watch but to also participate in almost any sporting event. So, if you want to go watch a great football game at Soldier Field or relax in the sun at lovely Wrigley field to see a baseball game, the place is Chicago. If you go to St. Louis, there might not even be any teams that show up to play.

story by John Hanley
The St. Louis baseball Cardinals go to the World Series for the third time in six years, breaking attendance records along the way. Meanwhile their football counterparts head for Arizona, complaining about lack of support and the need for a bigger stadium. For those living outside of St. Louis, it probably sounds a bit strange, but there are some reasons behind it.

Most important perhaps is the ownership of the two teams. Anheuser-Busch owns the baseball team and has dedicated itself to building a winning team. Fortunately, the team hired Whitey Herzog, who is without question the best manager in the game. Herzog has put together an exciting team that is perfectly suited to play in spacious Busch Stadium. The Redbirds play "Whiteyball" combines speed, clutch hitting, effective pitching and great defense. Three million fans, more than New York, Los Angeles or Chicago, cities with 3 or 4 times the population of St. Louis, showed up to watch them last year.

On the other hand, the football Cardinals, sometimes referred to as the Gridbirds or simply the Flock, are owned by Bill Bidwill, a man who does not know much about football. The team has never been to the Super Bowl, and probably never will under Bidwill’s ownership. They have never had a home playoff game. After barely missing the playoffs in 1984, some thought the Flock might even make the Super Bowl in 1985. But the team collapsed and finished in last place. Drugs were rumored to be a factor. 1986 wasn’t any better for the team. Since the team does so poorly, they should get some good picks in the NFL draft right? Wrong. Enter George Boone, the team’s head scouting director. Some of his past No. 1 picks have included quarterback Steve Pisarkewicz, a complete washout; wide receiver Clyde "The Glide" Duncan, who was cut from the team after catching four passes in his career; Anthony Bell, still a mystery at linebacker; and last year’s pick Kelly Stouffer, (many probably thought they had picked a girl) who never even signed a contract. Boone always seems to come up with a surprise, making a first round pick out of a marginal player. For some unknown reason, Bidwill won’t fire him.

The picture should be clear by now. Why would anyone want to waste a Sunday afternoon giving Bidwill their $15 to watch the Flock lose another game? St. Louis is a great sports town. The fans have not been spoiled by the success of the baseball team. The Blues hockey team, which has never won anything, continues to get strong support. They play exciting hockey, and they play to win, not just to make money. The city can support a football team. It’s a shame the Flock is heading south, but at least they’re taking Bidwill with them.

story by Jim Eade
Is constant studying bringing you down? Are you tired of dull lectures and long homework assignments? Are you tired of spending your all-night marathons with your books instead of your boyfriend or girlfriend?

Many U of I students who have been in a similar predicament have found a simple solution: take a semester of physical education courses. You will find a wide variety of individual and team-oriented classes to help develop a more active, and more exciting you.

Developmental activities offered include weight control, personal defense, and weight training courses. Students who are interested meditation can take courses in hatha yoga, and for those who like to "live on the edge," there are outdoor adventures, including a field trip. Gymnastics courses are also offered for those who are interested in developing their flexibility and coordination skills.

Some of the more popular classes are found in P.E. 102. Individual and Dual activities. These include tennis and golf, which are held at the par-3 course; and bowling and billiards, which are both taught at the Illini Union. "The reason I liked my class was because I had a hot TA," said Greg Fasana, senior in LAS, who took bowling for two semesters. "And it was an easy A."

Courses are also offered in equitation and horsemanship, held at Prairie Wind Farm, along with marksmanship, foil fencing, and archery, which are held at IMPE.

Are you tired of dull lectures and long homework assignments?

For those who enjoy dancing, don't hesitate to sign up for one of the many dance activity sections. There's ballroom, square, folk, modern, and Afro-American dancing. Aerobic dancing is a constant favorite with the women on campus. Indoor court activities, held at IMPE, include racquetball, badminton, handball, and squash.

There are several aquatic activities such as swimming and canoeing, both taught at Crystal Lake, as well as springboard diving, synchronized swimming, and scuba diving.

Team sport activities include volleyball, basketball, baseball, soccer, rugby, field hockey, and lacrosse.

All physical education activity classes are co-educational and are taught by graduate students. Grades are based on skill, attendance, participation, and a final exam. "To get an A, I had to attend class, put forth a decent effort and score reasonably well on the final," said John Willis, sophomore in LAS, who took tennis. "Anyone already familiar with the activity would have no problem."

Below Some students live life behind the eight ball. Upper right Students can learn to bowl downstairs in the Union. Lower right Lessons are available at Prairie Wind Farm to learn proper horsemanship.

What’s a Big Brother

What are we going to do tonight?” Michelle asked expectantly.
“I don’t know. We could go to the bars,” Keri suggested.
“No, I’m tired of memorizing ID’s,” Michelle said.
“I heard there’s going to be a movie down in the lounge,” Keri said.
“You’ve got to be kidding. You expect me to go to a movie in the dorm lounge? Let’s check the DI, maybe there’s something going on,” Michelle said. She grabbed the DI and turned to the personals. Her face lit up. “Keri, you’re not going to believe this, there are 13 little sister rush parties tonight!”
“Michelle, we can’t be little sisters at thirteen houses.”

The night wore on, the houses blended together with each beer they had.

“Who said we had to be little sisters? We can still go to the parties. C’mon, we’ll meet some guys. And, who knows, maybe we’ll really like some of the guys and we’ll become little sisters,” said Michelle.
“Don’t you have to be in a sorority to be a little sister?” Keri asked.
“No, but I’m sure it helps,” Michelle said. She went over to her closet to find something appropriate to wear.
That night, they left the dorm with hopes of fun and adventure. They had memorized the names of the houses with parties and hoped they could find them. At the first house, they walked in and were greeted by some of the guys in the house. They signed their names and addresses on a sheet of paper and then were introduced around a little. After a couple beers, Keri and Michelle left to move on to the next party.
“So, what’d you think?” Keri asked.
“I think they were squids,” Michelle said.

At the next house, the girls had to push their way through the crowd to get in. “Now this must be a good house,” Michelle said. They walked over to the keg to get a beer and were ogled by each guy on the way. “This is like a meat house,” said Keri. They found a place with a great vantage point to stand to drink their beer. Soon, they were asked to dance. They danced a little, signed their names and went on to the next house.

The night wore on, the houses blended together with each beer they had. At about 3 a.m. they decided to call it a night and went home.

A couple days later, there was a knock on their door. Michelle opened the door to find three men in suits. They delivered invitations for them to come back to second stage of little sister rush the next weekend. A couple hours later, they received another invitation.
“This was the house where we met that really cool guy, the tall one with blond hair,” Keri said.
“No, he was at that other one, the house with the weird stairway. Which house was that?” Michelle asked.
“Or was he at the house where we danced for so long?” Keri asked.

Keri and Michelle visited the houses in second stage and, after initiation, became little sisters. Becoming a little sister gave them many benefits. Besides personal invitations to all the parties and monogrammed sweatshirts proclaiming their loyalty, they had new brothers. These brothers were always available for lunch, studying, and sometimes dating.

Now, Keri and Michelle had places to watch TV. Somehow, watching movies at the fraternities was more impressive than watching them in the dorms. They had people to play pranks on, people to buy things for, people who wouldn’t mind lending out their cars on a Saturday afternoon so Michelle and Keri could avoid the bus, but still get to the mall.

Keri and Michelle are like hundreds of women on campus, trying to find some fun, exciting ways to spend their weekends, and that one really cool guy—you know, the tall one with the blonde hair.

layout by Debbie DiMaggio
for Anyway?
What does it mean when a girl wears a fraternity's letters on a chain around her neck? Has she been branded? No, don't be silly, she's been lavaliered. Lavaliering is what happens when Greek people "go steady".

For the guys, it often takes guts to profess his love for his girl in this manner. It may mean being stripped naked and paraded in front of his girlfriend's house. It may mean a fun-filled night at the bar, where his brothers get him so drunk, he can't see straight. For the lucky ones, it simply means enduring the endless teasing from his brothers.

For the girl, though, becoming lavaliered is a celebration. Occasionally, the girl doesn't find out until a candlelight ceremony. After passing the candle around the circle a couple times, she is told to blow out the candle. Blowing out the candle, she becomes lavaliered.

The next stage, assuming the couple stays together, is pinning. Pinning is when the girl wears her beloved's active pin. (It's kinda like wearing a high school ring all the time).

Finally, the couple becomes engaged. Well, you know what happens after that! 😁

The basement cafeteria in the Illini Union has a new look and a new name. Now called Down Under, an allusion to its location rather than a similarity to Australia, the cafeteria is decorated in dark green and maroon. It sports new marble-look tables, new maroon and green seats, and new carpeting.

The brass-look has also been incorporated in the new decor. Brass lanterns and a brass turntable add a touch of class.

Ports of call on a trip Down Under may include the Down Under Deli, where deli sandwiches and other deli items can be found, Port of Entree, for the main dishes of your meal, and the Hot Spot, for soup, chili, and other hot side dishes.

Other stops could include Greenland, for salad lovers, That Pastry Place, where croissants, eclairs, and other baked goods are found, and the Cold Coast, for ice cream and frozen yogurt treats. The Orient Espresso caters to your beverage needs and offers exotic coffees, espresso and cappuccino.

Down Under offers both smoking and nonsmoking areas. A new study restriction has also been added. No studying is allowed in the cafeteria between 11 a.m. and 1 p.m. on weekdays to open up seating for the lunch crowd.
In the 1987-88 school year, the U of I administration saw a familiar face in a new role.

When Chancellor Thomas Everhart left to take over as president of California Institute of Technology in Pasadena, Mort Weir, vice-president for academic affairs at the time, stepped in to take over the job. Weir served as interim chancellor for the 1987-88 school year while also providing oversight in the office of the vice-president for academic affairs.

Weir was unanimously appointed interim chancellor on July 9, 1987 and took over the job on Aug. 21. Weir's appointment coincided with the $18 million reduction in the U of I fiscal year 1988 budget and Governor James Thompson's $47 million cut from state higher-education budgets. In his career with the University, Weir had worked extensively with the University budgets.

"In this very crucial period, Mort (Weir) will bring quality and wisdom to this campus," President Stanley Ikenberry said at the time of Weir's appointment.

Weir first joined the University's psychology department in 1960 and served as its head from 1968 to 1971. He was appointed to his first administration position in 1971 as vice-chancellor for academic affairs. In 1979, he left the University to become director of the Boys Town Center for the Study of Youth Development in Omaha, Nebraska.

In 1981, he returned to serve again in the faculty of the psychology department and a year later was appointed to his vice-president position.

The 1987-88 school year was the second time Weir served as interim chancellor, he also held the position for 1977 fall semester.

Students Pay the Price

New Fee

For anyone pondering what $20 dollars can buy at a major state university, the answer is: new computer sites for many of the academic departments.

This year's tuition bill contained yet another addition - a $20 computer fee. According to a statement issued by the Board of Trustees, "The $20 computer fee will be used to develop and expand a series of computer sites across the campus. One site currently under construction is located in the lower level of the Illini Union."

According to Rachel Brooks, assistant to the vice-chancellor, the $20 fee was extracted from the service fee, formerly $138, now $116.

"The basic idea behind the fee was to stress the needs of student computing," said Howard Diamond, special assistant to the chancellor. According to Diamond, the fee, which is supposed to generate $1.4 million, was divided among the various departments that had submitted requests. Of the $860,000 already allocated, the projects receiving the most funding were the Microcomputer site in the Illini Union, the Networked Graphics Workstation Labs and the Undergraduate Library Computer Laboratory.

Budget Cuts: Effect on Tuition

A $60 million reduction in the University's 1988 fiscal year budget has resulted in a tuition increase for students and low compensation for faculty members.

The budget cuts follow Gov. Thompson's 4 percent reduction in appropriations to state universities. Thompson maintains that the cuts are necessary since the Illinois General Assembly failed to approve his proposed tax hike before adjourning in July.

Due to the cut, the University will fall to last place in overall compensation for its faculty in comparison to other Big Ten schools. Some members of the University Board of Trustees feel the University of Illinois will lose some of it's professors to schools that offer higher salaries and benefits.

A $150 tuition increase went into effect this spring to offset the loss of money due to the budget cuts. The increase was approved by the Board of Trustees on September 10. It applies to all undergraduates at the Urbana-Champaign campus. Out-of-state and part-time students and those attending the Chicago campus also experienced a similar increase this spring.

Members of the Student Government Association expressed disapproval of the tuition hike. In a Daily Illini article, SGA Community Affairs Chairman Lynda McCann said that the Board was wrong in looking to the students to balance the budget. Also, some felt that the 20 percent increase would be financially difficult for some students to meet.

University retirees will also be affected by the cuts. The pension system will now be funded at only 46 percent, as opposed to 60 percent funding before the cuts. This means University employees can either deposit more money into their pensions now or receive less money than expected when they retire.

The tuition increase was approved by the Board of Trustees as a temporary one, but is expected to become permanent if the General Assembly fails to approve Thompson's tax proposal when it meets in October.

Life and Times 401
The University of Illinois Library was established in 1868 with a collection of 644 books and government pamphlets, and state funds totaling $1000.

Today, the University Library contains over 11 million items, including nearly 7 million volumes and over 4 million serial titles, microfiche, and periodicals. Its budget exceeds $13 million.

The U of I Library is the third largest academic library in the nation--only Harvard and Yale have larger collections. Most of the collections are housed in the Main Library, but many of the items are located in the Undergraduate Library and in the 38 departmental libraries.

The library boasts the largest music collection at a public university. Its map and geography collection is the largest in the nation with over 355,000 maps, 150,000 aerial photographs, and a sizable collection of geographic books and journals.

The Newspaper Library, located in the basement of the main library, has over 75 million pages of newspapers dating from 1632, including over 500 United States and foreign newspapers. Also housed in the Main Library are the University Archives, the largest collection of historical manuscripts in the state of Illinois. The Rare Book Room and Special Collections Library contains rare, authentic publications.

The University Library is an excellent place for research. The Slavic library, for example, is used by Soviet scholars all over the nation.

The Undergrad, next to the Main Library, is located underground so as not to disturb the famous Morrow Plots. The Undergrad was first established in 1949 as a 25,000 volume collection on the first floor of the Main Library, but was moved to its present location in 1960. Today the Undergrad houses more than 250,000 volumes.

Some features of the Undergrad include a media center, self-management lab, browsing area, college and career center, index tables, periodicals, and reserves.

The University Library circulates over two million items each year and is the first library in the world to replace its card catalog with the Online Catalog computer system as the primary access system. Students can check out books from any library location using any terminal in the system. Materials may also be checked out or renewed by calling the Library Telephone Center. Any materials not available in one of the campus libraries may be borrowed from libraries across the country through the University's Interlibrary Loan Service.

*above* As the research paper deadline draws near, students comb the card catalogs for needed information. *upper right* An overview of the Undergrad. *right* What do the Undergrad and the airports have in common? *lower right* The Graduate Library, alias "the Overgrad."
**Political Activities**

"Politics is everywhere and in everything," says one political science professor to his class almost daily. Nowhere is that statement more true than at the University of Illinois, where anyone and everyone can pull up a soapbox in front of the Union and preach his cause.

These causes may range from improving the quality of life on campus to improving the quality of life in the world. But whatever the reason, U of I students have shown themselves capable of standing their political ground—whether it means building a shanty town on the Quad or holding a "Day of Action" rally in Springfield.

Politics on campus takes on several forms. The Student Government Association is the group with which most students are familiar. SGA works with students and administration to keep the University aware of student interests and concerns. SGA appoints different committees to deal with issues in areas such as finance, academics, minority issues, as well as campus and community affairs. SGA members are elected by the student body, and are generally elected in slates of candidates, all with common political platforms.

According to SGA trustee Matthew Byer, SGA is the one political group on campus with the most impact on how campus is run because the administration has a formal obligation to acknowledge SGA recommendations.

"Other groups can stage rallies after rally, and write letter after letter, but the University doesn't have an obligation to respond," Byer said.

Other groups on campus range from the College of Republicans to the Alliance on Central America. Interests in these groups vary, but mostly, people join an organization because it reflects their personal viewpoints or concerns.

Steve McClure, junior in LAS, is co-president of Students for Mutual Arms Reduction. His organization has helped arrange speakers, rallies and debates concerning the nuclear arms race. This year, he said, the group has plans to focus on Reagan's STAR WARS plan and his summit talks with Gorbachev, a topic in McClure's personal interest.

"I've always been concerned about Reagan," he said, "his assurances don't assuage me."

William Kelly is a senior in LAS and president of the College of Democrats, an organization that deals on a more national level, sponsoring debates with the College of Republicans and opening the campus door for candidates to speak on issues. He said his organization tries to keep people informed and improve voter turnout.

Some political groups come and go depending on causes and people's interests while others, like SGA, have a permanent place on the U of I campus. One thing is for sure though, politics in some form will always be around.

It's a familiar setting... You're sitting in a large lecture hall taking the fourth test you've had this week, the one you barely had time to study for. You're upset, you're panicked. Images of a plunging grade point average flash through your head. Suddenly, you feel an urge, an impulse, to maybe just glance around and...

CHEAT!

Cheating is a word that no one likes and everyone avoids. Excuses range from "It's not exactly cheating" to "Everyone does it." Unfortunately, the consequences of getting caught are more serious than most students realize.

According to John Scouffas, assistant vice chancellor for student affairs, the minimum consequence of getting caught cheating is receiving a failing grade for the course. The maximum penalty is suspension or dismissal from the university. Most cheating cases are resolved between the student and the instructor before it comes before the discipline system, Scouffas said.

If an instructor suspects a student of cheating, he may give the student an "E" for the course or he might also report the student to the head of the department and recommend suspension or dismissal. After the instructor's recommendation, a hearing is held before a subcommittee. If the student is found guilty, the discipline committee decides what further action should be taken.

"In my mind there is a very serious lack of principle and ethic (on this campus)," Scouffas said. Students are more concerned with good grades than with getting an education, he said.

According to Marne Helgesen of the Office of Instructional and Management Services, students have a variety of ways to cheat: Two students share an eraser,
write answers on it and pass it back and forth. "Ghost" persons with knowledge of the subject take the exam by impersonating the real student. Students wear a walkman with recordings of pertinent information. The subject of cheating was addressed at an all-day conference between faculty, administration, and student leaders.

Of the student leaders present, 75% felt that between 15-25% of the student body cheated, Helgesen said. She added many of the students felt there was an "aura that cheating is okay as long as you don't get caught." The student leaders said faculty and administration are as much to blame as students.

"Cheating is a bad habit," Helgesen said. "It's the university's and faculty's responsibility, as well as the students, to prevent cheating."

Helgesen is involved with a program educating instructors on how to prevent cheating and what to do when they catch someone cheating.

"It's more pleasant to prevent cheating than to deal with cheaters once you catch them," she said.

According to Rule 64 of the Code on Campus and Regulations Applying to All Students, students must refrain from academic dishonesty, conduct which may appear suspicious of dishonesty, and conduct which aids others in academic dishonesty.

Helgesen said her program is trying to help instructors provide an atmosphere that doesn't allow cheating to occur.
Religion is a highly visible institution at the University of Illinois. Whether or not you hold any beliefs about a particular faith, some contact with religion is inevitable. You may be handed an invitation to a Bible study or catch part of Max's noon-time sermon, but somehow religion is part of every students daily life on campus.

Many denominations are represented on campus. Among them are the American Baptist Church and the Southern Baptist Convention, Baha'i, Church of Christ/Christian Church and United Church of Christ, Disciples of Christ, the Jewish faith, Lutheran (ALC, LCA, and AELC and Missouri Synod), the Mennonite faith, Quakers, Roman Catholics, Episcopalians, United Methodists and United Presbyterians. The Inter-varsity Christian Fellowship invites students to attend their Bible studies, and prayer and fellowship meetings.

Obviously, not everyone finds his or her place in categorized religion. Athiests don't believe in a "supreme being", while agnostics believe in the possibility of a higher unknowable power, but can't attach a denomination to that belief. At the other end of the spectrum, there are those who are fanatic about the rightness of their religious beliefs. Such fanaticism is often loudly vocalized in outdoor sermons on the U of I campus.

To attend or visit a church on campus, check its schedule of services. Because of the possibility of vandalism, most of the churches, synagogues, and chapels in the area lock their main doors at night. Should a student anticipate needing to go to his or her place of worship after hours, they should contact the office and inquire about other entrances. Many keep a side door open expressly for those who may need the security of their faith in the middle of the night.
Campus Security

The uniform of the student patrol is an orange shirt, a white jacket with the words "University of Illinois Student Patrol" on the back, and a blue cap.

Three teams, 20 patrollers each, work every third night. The shifts are from 9 p.m. to 2 a.m. Sunday through Thursday, and 9 p.m. to 3 a.m. on Fridays and Saturdays.

The student patrol operation began in 1983. Since then, the number of patrollers has climbed from 36 and 45 in previous years to this year's total of 60 members.

As crime on University property has increased in the past year, patrolling has also increased. The campus area north of Green Street has been an area of special concern, said University Police Sgt. Summers.

"The responsibility of the patrollers is to be seen, be visible, be out," said Summers.

The patrollers walk through University buildings to check activity. They let female students who may be studying alone, especially during midterms and finals, know that someone is around to check on their well-being, he added.

Vandalism is the patrollers' number one problem. Patrollers often find students, usually intoxicated, trying to vandalize the greenhouses near Pennsylvania Avenue, pulling parking meters out of the ground, and tearing up the emergency phones. Most of this activity occurs between Thursday night and Sunday morning, said Summers.

The student patrol offers two escort services. Women's Wheels is available to unescorted female students who need rides. The patrollers also offer to escort students and University employees from buildings on the north end of campus to their cars, to ensure their safety in dark parking lots.

below Student patrols routinely walk through buildings to make sure everything is safe. upper right University Police, such as Gene Gladney, are also part of the campus security system. lower right The Chief of Police's office is used by the Women's Wheels program to take incoming calls, log them, and then dispatch the van.

story by Hannelore Weir layout by Patty Gotter
The Homeless

One of the growing concerns among the student and resident population is the increasing number of homeless people on the Champaign-Urbana streets. Regardless of the time of day, these people can be seen walking the streets or sitting in doorways. During the day, many can be found in the merchant area on Green Street either wandering or standing on a corner. At night these campus street people usually group together in the alley behind Sixth Street adjacent to R & R Sports grill.

The students and residents of the community have varying reactions to their presence. Some are afraid that the street people might be dangerous and so they try to avoid them. Some people pity them and are willing to give them some money if asked.

John Tash, a resident of Champaign, said he had mixed emotions about the street people. He said he is irritated when some of them panhandle and annoy people walking by. "They ask you for money for a cup of coffee but you know that's not what they're going to buy," he said. Tash also expressed concern for their welfare, especially the fact that most of them have nowhere to sleep in the winter. "It's a sorrowful thing that (the problem) has to be here in our town. The community needs to find a place for these people to go."

Kathy Gritters, a junior in Food Marketing, had a different reaction. "I feel sorry for them, but I think that these people need to help themselves."

Tina Arronis, a junior in business, said that she was afraid they might be dangerous. "I cross the street to avoid them."

There is very little that the police departments of Champaign or Urbana can do about the problem short of keeping these people off private property or emptying their alcohol bottles. "They're not breaking any laws," said Officer Mark Medlyn.

The Champaign-Urbana communities do have some temporary shelters where people of the street can go during the winter. Steve Schumacher is a minister at the McKinley Church and Foundation at 809 S. Fifth St., which provides a shelter for homeless men during the winter months. The shelter is in operation from November 1 until April 15. The shelter opens at 10 p.m. and provides two meals and a place to sleep for anyone who needs it. Three volunteers operate the shelter each night. The shelter is funded by donations from various churches and organizations.

According to Schumacher, the people who come to the shelter all have different problems. "About one third of them are mentally ill, another third are alcoholics, and the last third are unemployed and down on their luck."

Although the McKinley shelter and others like it do help the problem a little, people of the street will still continue to wander during the day until a more permanent solution can be found.

layout by Debbie DiMaggio
Rape is a frightening concept for women, and at a campus where over 15,000 women are housed, the fears are not unfounded.

According to University Police Sgt. Summers, 12 to 15 rapes are reported every year in the campus area. This statistic held true in the 1986-87 school year with three of the rapes occurring on University of Illinois property. Unfortunately, the FBI indicates that for every rape reported, there are 10 that remain unreported.

The boundaries for the campus area are University Avenue on the north, St. Mary’s Road on the south, the ICG railroad tracks on the west, and Race Street in Urbana on the east.

Practicing common sense is often the first step in preventing a rape. Services on campus are offered to aid women University students in prevention.

Women’s Wheels is a volunteer organization sponsored by A Woman’s Fund, Student Services, and the University Police. The service, which provides free rides for women, is designed to transport women who anticipate having to walk to and from campus alone during the nighttime hours. Women’s Wheels runs from 9 p.m. to 2 a.m. every night. The service is operated by volunteers Sunday through Thursday nights, and by the University’s student patrol on Fridays and Saturdays.

Another service provided, although more oriented toward crime prevention in general, is WhistleSTOP. University employees, such as food service workers and janitors, are given a whistle along with the instructions to blow it in the event of trouble, either witnessed or experienced. “Whistle-pacs” are available in 328 Illini Union for anyone who would like them. WhistleSTOP is sponsored by Volunteer Illini Projects.

Seventeen emergency phones are located throughout the campus area. These phones are free of charge and connect the caller directly with the University Police switchboard. The location of the caller is indicated by a light on the police panel in the event that the caller is unable to speak.

Women can also obtain maps which recommend safe walking routes for the nighttime hours. These maps are available at the Information Desk of the Illini Union. These recommended routes are more well lit than others a student may take, but Summers is quick to point out that a woman does not exempt herself from attack merely by taking these routes. The best protection lies in thinking before walking alone at night and by avoiding deserted areas, those with several hiding places for would-be attackers. Peak hours for sexual assault are between 8 p.m. and 12 p.m., although an attack may occur at any time.

Sixty percent of all rapes are classified as “date/acquaintance rapes”, according to Summers. In these cases the victim either knows or is acquainted with her attacker. These circumstances contribute a great deal to many victims’ refusals to cooperate with the police, Summers says.

The chances of police apprehending a rapist are slim unless the rapist has a previous record or operates in a serial fashion. The chances dwindle to zero when the victim will not file a report. Summers emphasizes the importance of filing a rape report. That way, even if the victim doesn’t press the case further, the police will still have an accurate account of the circumstances and number of the rapes that have occurred.

A university campus is especially conducive to date/acquaintance rape. A woman can quickly find herself in a one-on-one situation with a man she doesn’t know very well, if at all. A good thing to do, says Summers, is to somehow find out the man’s first and last name. Summers advises, when in a man’s room, a woman should look around the desk to see if any identification is available. Then, whether the man’s name is found or not, the woman should give a friend or roommate a call, mentioning his name, if known, so that the man can hear. Summers suspects that the woman tell her friend her location. This way, if even the man had no malicious intentions, he is aware that a third party knows where she is and who he is, says Summers.

If a woman is raped, a 24-hour, daily rape hotline is sponsored by A Woman’s Fund. The hotline number is 384-4444.

Left: Women walking alone at night should be careful of dark areas.

Above: The Women’s Wheels van is available for rides from 9 p.m. to 2 a.m. every night to prevent women from walking across campus alone.

Fly Willard

Unless you're a student of aviation or a frequent flyer, chances are you weren't even aware of the renovation project happening out at University of Illinois-Willard Airport. In fact, chances are you weren't even aware that U of I had an airport.

U of I-Willard Airport is located off U.S. Route 45 in Savoy, a few miles outside of Champaign city limits. Over the years, its use has been divided between educational and commercial needs. The U of I's Institute of Aviation owns and operates the airport. Some of its facilities are used for the pilots and mechanics training schools. The airport also serves the county's commercial needs. According to Nicholas Merrill, airport manager, it processes about 26 arrivals and departures each day.

The current renovation project includes a twenty year expansion plan that will allow the airport to better meet its educational and commercial needs, Merrill said.

"The best part is that it will all be done at virtually no disruption to the public," he said.

According to Merrill, the airport will remain open during the renovation. He also said the land acquired by the airport for the expansion was purchased at a fair price determined by the courts.

According to the 1986 Master Plan Update Summary Report, the current plan calls for the construction of a new terminal building and a new runway parallel to the existing one. These are to be completed in the first five-year stage. Further construction, including additional taxiways and a third runway, is planned for the next five year stage. The next ten years will be devoted to updating the rest of the airport's features.

According to Merrill, the new terminal building will be 60,000 square feet as opposed to the 15,000 square foot existing terminal. Upon completion the new terminal will be used to meet the needs of the commercial public. The old terminal will be renovated into classrooms and training areas for students.

The addition of two new runways promises to bring more commercial business to the airport and the county. For that reason, Champaign County agreed to help the university finance the expansion.
The stars are out all day long in Parkland College's new cultural center.

Parkland, a two-year community college with 7,855 students, is located in western Champaign. The college was founded in 1967 and the cultural center has been a dream of Parkland officials since 1969.

Dedicated on Oct. 1 to former Parkland president William Staerkel, the new planetarium, which seats 144 people, is one of the largest in the Midwest, second only to Chicago's Adler Planetarium. The planetarium opened to the public on Oct. 22.

The planetarium projects 5,000 stars, 25 star clusters, and five planets with a Zeiss M1015 projector, the first projector of its kind.

Clouds, constellations, rainbows, solar and lunar eclipses, and daily sky motions are simulated by a 35mm big-screen film system.

The cultural center's new theater has some clouds of its own kind. Acoustical clouds on the ceiling and acoustical curtains promote better sound and clarity in the theater.

The theater, which seats 321 people, uses a sophisticated lighting system. It opened to the public Oct. 2 with a parody of Shakespeare's "Hamlet".

The cultural center cost $4.2 million and was started in November of 1985. Director of the new theater is Randi Hard and the planetarium director is James Manning.

layout by Patty Gotter
Question: What are the three things one can never find on the U of I campus?

Answer: An empty table at R & R's during Happy Hour, a full classroom at 8:00 on Friday morning, and a parking space anywhere between the Quad and the cornfields. The last, of course, is the hardest to find of the three.

Parking your car within two blocks of your intended destination on a football weekend is a major accomplishment on this campus. It's almost as praise-worthy as standing in the right line in the Financial Aid office on your first try or passing by Cookie's Etc. on the way home from class and not making a purchase.

"It seems like they're trying to punish you for having a car on this campus." said Angie Nierman, junior in accounting. "Pretty soon they're going to make it a prerequisite for admissions—that you can't have a car."

This statement is a popular sentiment among students who own cars. Most seem to feel that the university does not provide adequate parking for students. In order to park in any of the university lots one must register his car with the university at a cost of five dollars. Separate stickers are given to faculty/staff members, employees of the university, and students. According to Charlie Halpin, the assistant coordinator of parking, the lots closest to campus are reserved for faculty/staff members and employees.

"The University doesn't want students to drive to class," Halpin said. However, on weekends and after 5 p.m. on weekdays most of those lots are available for student use.

The difficulty of parking on the street is another problem that students face. Many of the parking meters along Wright Street and in the municipal lot on Green Street have 30 minute time limits. As any student can attest, it's virtually impossible to do anything on campus in less than 30 minutes.

Although most students have learned to keep their cars clear of campus town, a parking space close to home is not always easy to find. Dormitories and apartment buildings have limited parking facilities.

"We (people who live in dorms) have it worse than anyone else because our only resource for parking is through the university," said Jennifer Quade, sophomore in LAS.

According to Goldie Hubbart, a secretary at Illinois Street Residence Halls, parking spaces are assigned by a seniority basis. Seniority is given to upperclassmen who have lived in the dorms for a few years and to students in the rehabilitation program. If a student cannot get a spot in the dorm lot, his next choices are the overflow lots at Assembly Hall and on Florida Avenue.

Students in apartment buildings are not always fortunate either. Some buildings do not have lots and the ones that do do not always have enough spaces. In order to correct this problem, the City of Champaign passed an ordinance forbidding the construction of new apartment buildings without providing adequate parking for them. Hopefully this will ease some of the pressure on the already overcrowded Champaign streets.

University of Illinois students have a way with parties; so does the Champaign Police Department. In the 1985 school year, there were 503 party disturbances reported to the Champaign Police Department. In 1986, the police department took 709 reports on parties and the number is expected to rise to about 750 this school year, according to crime analyst Gary B. Spears. There have been 500 reports for 1987 so far.

When the police get a call to check on a party, they call the people giving the party or go to the house or apartment and warn the residents about the complaint. If the party continues on as before or another call is received, the officers will give a second warning. On the third offense, a notice to appear in court will be issued to whoever is in charge of the party, or in the case of a fraternity or sorority, the house president. This court appearance usually results in a fine and a warning. The amount of the fine is decided upon by the judge. On-the-scene arrests are made only when violence against the police officers or other significant violence occurs.

In the 1985 school year, there were 503 party disturbances reported.

According to Spears, the majority of disturbances on campus require at least a second warning. The police attempts to continually quiet campus disturbances produce considerable drain on forces that should be concentrating on crime prevention.

In response to accusations by some fraternities that the Champaign police are harassing them, Spears said it is never the intention of the Champaign Police Department to harass anyone. If repeated calls come in on any address, it is the duty of the police to check out the complaint each time.

The Champaign and Urbana police are not trying to ruin anyone's fun; they're only trying to make campus life better for the entire student population.
One of the most common complaints about a large university such as ours is its impersonality. Many times our classes are taught by teaching assistants (TA's), and we never even know who the professors of our classes are, let alone ever see them. If we are lucky enough to have the professor teaching the class, it is usually in a huge lecture room with 200 or more students. But even so, do we ever really make the effort to get to know our professors? For the most part, we know only what little they tell us about themselves on the first day of class. However, our professors do much more than just teach classes. They are involved in everything from consulting businesses to participating in national and global conferences, to bringing about international understanding and expanding scientific research beyond its present boundaries.

"Increasing mutual understanding between the people of the United States and the people of other countries" is not only the goal of the Fulbright program, but also of our professors. Fulbright grants are awarded to Americans for lecturing and conducting research abroad, and to foreign nationals for engaging in similar activities in the United States. The University of Illinois has this year, as it has twice in the past, led the entire nation in its number of American Fulbright Scholars.

The U of I is ranked third nationally in its number of Presidential Young Investigator award recipients. The National Science Foundation grants these funds to faculty members at the beginning of their careers, those having received their doctoral degrees within the past four years.

Other U of I professors are distinguished members of organizations such as the National Academy of Sciences, the National Academy of Engineering, the American Academy of Arts and Sciences (AAAS), and have received honors such as the John Simon Guggenheim Fellowship, the Sloan Fellowship, and even Pulitzer and Nobel prizes.

These awards and fellowships, however, are not the end of years of hard work, but are only the beginning. Money from grants and fellowships enable our professors to continue their research and continue to progress as Norman Packard, professor of physics, has. Packard was part of a group at the U of I that formed the Center for Complex Systems Research (CCSR), one of the few of its kind in the country. The center combines math, biology, physics, and computer science in one community so as to provide the proper environment for studying various areas within those fields or combinations thereof.

The National Medal of Science is the highest award the United States government grants in the field of science, and is presented to its recipient by the president. This past June, President Reagan handed this award to Dr. Paul C. Lauterbur, a professor of Medical Information Science at the University of Illinois. His years of research have brought about Magnetic Resonance Imaging, which is used in medical research and clinical diagnosis. It sometimes replaces x-ray machines due to the relative ease of interpreting its results and due to the fact that it uses no radiation.

At a university as large as the U of I, where impersonalization is so common, students are urged to get to know their professors. Because whether or not they are officially acclaimed for their achievements, all professors deserve our respect and recognition, and they are well worth knowing.

below Norman Packard, professor of physics, helped form the Center for Complex Systems Research.

Though graduate students may appear relatively anonymous to their undergraduate counterparts, they compose over 25 percent of the student body at the University of Illinois. They are an interesting and diverse group of people furthering their education for a variety of reasons. Some think it will help advance their careers, others wish to achieve professional status, and still others are simply dedicated to their fields and want to learn all there is to know about them.

Graduate students, who range from 19 to 64 years of age, are studying for one of thirteen advanced degrees conferred in different fields. "Studying" for a graduate student, however, isn't too different than "studying" for an undergraduate student. In other words, there are plenty of things to do other than studying. You'll find them at places like Gully's, Murphy's, or Bradley's, where the atmosphere is a little less "college" and a little more relaxed.

Graduate students work at pizza places and bars just like the rest of the students, or they are employed as teaching assistants for professors. This is an added responsibility for a graduate student involved in advanced classes and/or research in his or her field.

Dorms such as Sherman and Daniels Halls provide graduate students with places to live if they prefer not to live in apartments. These dorms are filled with students who have several things in common: age, seriousness about their fields of study, and goals of advancement. They also provide excellent opportunities to meet people, especially for those students who completed their undergraduate education elsewhere and are new to the University of Illinois.

Graduate students are a rare sort. Their dedication sets them apart from other students, because anyone who will stay in school longer than he or she absolutely has to is a true credit to his field. For any undergraduate students considering three or four extra years of school, graduate students agree the results are worth the extra time.

Life and Times 421
Are you the child of a war veteran? Are you a member of a minority group? Do you demonstrate financial need? Do you have a remarkable grade point average? If so, you are probably one of many students who receive some form of financial aid. Without the help of scholarships, grants, loans, or work-study programs, many students would find it impossible to continue their education.

Scholarships and grants are awards that do not have to be repaid. The main criterion for a grant is financial need. While this is true in many cases for a scholarship as well, grade point average is also considered. Grants and scholarships come from a variety of sources including federal, state, private, school, and industrial institutions. The Illinois State Scholarship Commission is the major state assistance program. This award may pay as much as full tuition and fees (with a limit for private schools) for Illinois residents attending in-state schools. The largest nationwide award is the Pell Grant. If a student demonstrates need according to federal standards, he or she will receive a Pell Grant of $200 to $2,100. Tuition scholarships include the Children of Veterans award, the General Assembly award, and special academic scholarships given through college departments, along with various others. Each scholarship has its own set of eligibility requirements.

Three loan programs are available to students who do not qualify for scholarships or grants or who wish to supplement their award income. These loans allow students and their parents to borrow directly from lending institutions. The first is the Guaranteed Student Loan program, which recently initiated two major changes resulting from the passage of the Reauthorization of Higher Education Act. The GSL program is now based entirely on need. Students must answer specific questions on the Family Financial Statement if they plan to apply for a loan. Loan limits have been increased as well. At the freshman and sophomore levels, the maximum loan was increased to $2,625. At junior and senior levels, the limit was increased to $4,000. Graduate students can borrow up to $7,500. (Figures are from the 1987-88 academic year.) The interest on a GSL is 8 percent until the fifth year, when it increases to 10 percent on the unpaid balance. Interest does not accrue while the student is in school.

Supplementary Loans for Students allow undergraduate students to borrow up to $2,500 per academic year to a total of $15,000, including any GSL’s. Interest on this loan begins to accrue as soon as the loan is issued, and the student is expected to begin making payments on the loan thirty days after leaving school permanently. Supplemental Loans for Parents allow loans up to $4,000 per year for a dependent undergraduate student. Interest begins to accrue immediately and payments begin 60 days after the loan is issued.

Work-study programs give students chances to earn money for their education by working for the university while they are in school. The Urbana-Champaign campus employs 10,000 undergraduates who earn $7.5 million each year. Part-time, on-campus employment is available to all students who are enrolled at least half-time. Job lists are posted at the Financial Aid Office. The College Work-Study program provides employment for students who demonstrate financial need. The total amount a student earns during the year is limited by the work-study program.

The Reauthorization of Higher Education Act made changes regarding student applications for financial aid. All veterans, orphans, students 24 years and older, as well as graduate students and married students not claimed on their parents tax returns, are considered independent. Undergraduate students under age 24 are considered dependent unless their parents have not claimed them on their tax returns for the past two years, or if the student earned at least $4,000 (not including financial aid) in each of the two previous calendar years. This means some students who consider themselves independent are now technically dependent, and must submit their parent’s financial information as well as their own.

Financial aid programs are many and diverse. Students should not hesitate to complete the forms necessary for financial consideration. The forms are available at the Financial Aid Office. The office offers many options to students who would like some help paying for their education.

left Filling out all the forms can be quite strenuous.

Students planning to go to graduate school often turn to Kaplan courses for help. The courses are administered by Stanley H. Kaplan Educational Centers, Ltd., the largest test preparatory organization in the nation.

Programs offered to help students prepare for graduate school admissions tests include those for the Law School Admissions Test (LSAT), the Medical College Admissions Test (MCAT), the Graduate Management Admissions Test (GMAT), and the Graduate Records Exam, including the GRE-Psychology and GRE-Biology. Also offered are a speed-reading course and preparatory courses for the Dental Admissions Test (DAT), and the Optometry College Admissions Test (OCAT). The Kaplan centers offer preparation for professional licensing examinations, such as the CPA exam, and college entrance exams, such as the SAT and ACT exams.

The courses consist of live class sessions, audio tape programs, and home study materials, and run anywhere from 4 to 6 weeks for grad school prep courses to nine months for the National Medical Board exam course.

The centers guarantee a higher score than students would receive without the benefit of their courses, but students must pay a price for this benefit. Course prices range from $100 for speed-reading to $1000 for the National Medical Board exam. The LSAT and GMAT cost $495, and the MCAT, DAT, and GRE cost $450.

The Stanley H. Kaplan Educational Center in Champaign is located at 616 E. Green.
Ban "Mother Goose"?

"Banned Books Week—Celebrating the Freedom to Read" was held September 19-26, 1987.

This week was set aside to celebrate the freedom to read whatever we want, and to contrast that freedom with the time when censorship was frequently used to ban many books from school and public libraries.

Books were banned for containing or advocating what censorship committees thought to be immoral or questionable themes.

Some of these themes included sex, drug addiction, suicide, menstruation, mental retardation, racial stereotypes, and demonic possession.

Books that have been banned include: The Best Short Stories of Negro Writers
American Heritage Dictionary
The Bible
Are You There, God? It’s Me, Margaret
Our Bodies, Ourselves
Tarzan

Alice’s Adventures in Wonderland
The Exorcist
The Chocolate War
Catch 22
Lord of the Flies
Ordinary People
Soul on Ice
Raisin in the Sun
Oliver Twist
A Farewell to Arms
Flowers for Algernon
Ulysses
To Kill A Mockingbird
Rosemary’s Baby
The Fixer
Death of a Salesman
Mother Goose
Catcher in the Rye
The Merchant of Venice
One Day in the Life of Ivan Deniso-vich
Grapes of Wrath
The Adventures of Huckleberry Finn
Slaughterhouse-Five
Go Ask Alice
Banned Books Week was held in accordance with the bicentennial anniversary of the Constitution and particularly the First Amendment.

It was sponsored by the American Library Association, American Booksellers Association, American Society of Journalists and Authors, Association of American Publishers, National Association of College Stores, and the American Association of UN Press.

Equal Opportunity Education

The University of Illinois is a learning institution aimed at providing quality education to all of its students regardless of race, nationality, religion, age, sex, or physical disabilities. Education, however, is not restricted to academics. It also includes social and cultural issues.

To assist minority students in obtaining this education, there are a variety of support services on campus, the Educational Opportunities Program (EOP); the Central Black Student Union (CBSU); the Afro-American Cultural Program; La Casa Cultural Latina; and the National Association for the Advancement of Colored People (NAACP).

The EOP was established in 1968 as a support program for "students from groups which, because of educational or economic circumstances, have been underrepresented at the University." This program helps students in the areas of academics, personal adjustment, career planning, and financial aid and includes counseling, tutoring, and summer orientation programs for new students. According to Dean Michael Jeffries, about 2,000 minority students are currently involved with the EOP, 600 of which are freshmen. The EOP is a very strong and successful support system, as can be seen by the program's retention rate for freshmen classes, which, for the past several years, has been at least 95 percent.

The CBSU is the central coordinating body for the seven black student unions located in the University residence halls. The CBSU holds special seminars and workshops designed to help educate all students on various black issues. The CBSU is also in cooperation with University policy in the recruitment and retention of minority students. At the beginning of each academic year, the CBSU and the Office of Residential Living sponsor orientations for new minority students on residence hall and campus life.

The Afro-American Cultural Program was established in 1969 to help support the needs and lifestyles of black students by offering academic and social programs to "develop Black awareness and to foster unity among and between both minority and non-minority students on campus." The program sponsors WBML, the black student-run radio station; a student-run minority newspaper, GRIOT; the Black Chorus; and OMNI MOV, a black dance workshop.

Since its establishment in 1974, La Casa Cultural Latina has served Latino students and has reinforced the concept "Si se puede." (Yes, you can achieve.) La Casa Cultural Latina works with several organizations including La Colectiva Latina, La Casa Student Organization, the Latin American Student Organization, the Puerto Rican Student Association, and the IUB Latino Programs Committee. These groups work together to support, assist, and encourage Latino students while helping them develop an understanding and deeper awareness of their cultural heritage. Included in the program are special workshops, lecture series, and tutoring; as well as the production of an annual literary magazine featuring art work, poems, and short stories created mostly by students; and the annual Latino Festival, Copacabana.

In 1985, the Peer Retention program was established and is a voluntary student support program in which Hispanic upperclassmen are matched up with Hispanic freshmen to "serve as peer counselors and friends, with the purpose of helping freshmen adjust to University life and thereby increasing the likelihood of (their) graduation." According to director Judith Martinez, La Casa Cultural Latina is "a home away from home" for the Latino students.

The U of I chapter of the NAACP was reinstated in the fall semester of 1987 after having been disbanded in 1965. Darrell Doss, president, feels the NAACP will fill student needs which are currently not being met by other organizations. For example, since the CBSU is only designed for students living in residence halls, it inadvertently excludes those living in apartments. Cami Treadwell, vice president of the NAACP, added their function is "to inform students of the issues relating to the social and political issues of Blacks and to improve all racial relations on campus." Although the organization is still in its beginning stages, it has formed several committees including cultural, membership, financial, political actions, historical, and public relations committees. The organization also planned to sponsor guest speakers, such as Martin Luther King III, who came to Champaign-Urbana on Nov. 17, 1987. The organization has received strong support from both students and faculty, and shows great potential for the future.

These are just a few of the many resources available to minority students on campus which are intended to assist, support, develop, and enhance their education; an education not bound by academic, racial, or cultural barriers.

Do you need some help choosing classes? Do you wish you knew what previous students thought about the professor and the course load of a certain class? Well, the Student Government Association has the answer in its magazine, "Outlook".

"Outlook", free to students and published for the first time for Spring 1988 classes, contains a Course Information Guide and PLATO Course Descriptions.

The Course Information Guide gives student ratings on a scale of 1 to 5 on the overall effectiveness of the instructor, the course workload, the instructor's responsiveness to questions, how well exams and papers reflected the material that was covered, the fairness of grading procedures and the enthusiasm of the instructor.

The lowest rating is 1.0 and the highest rating is 5.0 except in the course workload category in which a rating of 3.0 is considered best. SGA gathered the ratings information from student answers on the semester instructor and course evaluation questionnaires.

The Course Information Guide lists a course's title and number, the instructor's name, the number of students who responded to the survey and the type of class (lecture, discussion, or lab). Included in the descriptions are professors' goals for their courses. The course goals were submitted by the professors, themselves, and are in their own words.

Also included in this semester's "Outlook" are articles on the improvement of instruction, the struggles of minority students, student government, the Medical Scholars Program and an interview with Professor Richard Scanlan of the classics department.

The University of Illinois has too many publications by students and staff—ranging from general reading to the very technical—to even begin to name them all. Many of the publications don’t catch the attention of the majority, and a few of the ones named here may surprise you.

The most familiar to us is the Daily Illini, a daily publication which probably has the highest circulation, being read by students and staff of every department. It’s a student publication which is edited this year by Robin Gareiss. The D.I. covers campus, local, national and international news, runs advertisements for the campus, and has a personals section that is popular.

The Illini Review is less well known, though it claims to have a circulation of 12,000. It’s a journal of conservative opinion at the U of I, comes out once a month, and is edited by Mark Pietrzyk.

Another monthly publication is the Orange and Blue Sports Review and is edited by Joseph Miller. It’s published by the Athletic Association of the University of Illinois, and covers all U of I sports teams.

The Illinois Technograph is published five times per academic year for the engineering community. Edited by Scott Brun, it provides information on engineering topics in a manner that is meant to be comprehensible to those without a substantial technical background.

Several publications come from the English department, some more technical than others. Two of the less technical journals are Ascent and Little America. Ascent, published three times a year, is edited by Daniel Curley and is a collection of prose and poetry by various contributors who are chosen from a number who submit to the magazine. It has a national distribution. Little America is published twice a year by U of I students, and is co-edited by Kathleen Greenan and Patty Jones.

It presents artwork, photographs, prose and poetry by student contributors, also chosen from a number of submitters.

Last, but not least, is the Illio yearbook, a yearly publication edited by Leslie Cole which recounts major events of the year to give students something to look back on.

There are many more publications by U of I students and staff that provide useful information for all fields. It is certainly worth the effort to find out about the less noticeable journals, enabling you to gain a greater insight into what goes on at the U of I campus.

below The Daily Illini newsroom is always working to get out the next days issue.

story by Sarita Suter
layout by Leslie Cole
When a student decides to make the big move out of the dorms and into an apartment, the last thing on his mind is whether or not he will find a place to park his car. In fact, the two seem quite unrelated.

However, the link between apartments and parking has recently become quite a political issue on campus. This year, the city passed an ordinance requiring each new apartment building to provide parking for its tenants. This accounts for the sudden increase in construction of new apartment buildings on campus last fall, the result of many apartment builders hurrying to "beat the parking deadline".

The word that new apartments were to be built was welcome gossip to those students who left their apartment searches until the last day of spring semester. These adventurous students found themselves signed up for new, yet-to-be-built places to live with one major drawback: They had no place to park their cars.

Along with the existence or absence of parking at an apartment are numerous other considerations. Is the apartment equipped with a dishwasher? A microwave? Can appliances be rented from the landlord at a fixed monthly fee? In short, apartment-hunters should take nothing for granted and should be ready to compromise.

Rookie apartment-hunters are advised to get the help of more experienced apartment-hunters. First, they should start early with the Daily Illini classified ads. The classified pages show a variety of choices for students with various needs. Second, apartment-hunters should visit the Tenant Union, located in the Illini Union.

The Tenant Union is a service provided by the University for students with questions about apartments and other living facilities. People at the Tenant Union are ready to answer questions and review leases and landlords. The Tenant Union also provides renters with lists of questions they should ask the landlords prior to signing their leases. The organization reminds students nothing should be taken for granted and everything should be completely clear before signing a lease.

On such a large campus, students should be able to find apartments to satisfy their housing needs. Apartment life can be a great experience. Careful planning and the help of those who know the ropes will let all students experience it right.

Suining Up

Senior year is a time for savoring the present and reflecting on the past. The freshman who went to happy hours at the T-Bird matured into the senior who knows every night's drink special at every campus bar. No more running across the Quad with backpack, two No. 2 pencils, and ID in hand. Now it's more of a slow stroll to class stopping along the way to talk with friends. Partying only on weekends has turned into partying all night, any night. But there is more to senior year than parties. For many, it is the time when the job search begins.

During the last two months of any semester, there are countless numbers of people milling about in business suits. Some are seniors participating in on-campus interviews. Others are recruiters from some of the nation's most prestigious businesses. For 8 or 9 weeks each semester, seniors get the chance to meet with these recruiters in hopes of landing their first "real" jobs.

Where does one go to sign up? Different colleges on campus, including engineering, commerce, communications, and chemistry, offer their own placement services. The Student Services Building houses a campuswide service, the Career Development and Placement Center. Each placement office has its own specific requirements, but generally they all operate in the same fashion.

Students register for on-campus interviews by filling out cards with their basic information: name, address, and major. They are later given their own interview number to be used for sign-ups.

Next, prospective interviewees fill out data sheets, standardized forms that present information in an easy-to-read format for recruiters. The data sheets include not only name, address, and major, but also a description of the kind of work that is desired, geographical preferences, prior work experience, honors and activities. Most students dread having to fill out a data sheet. However, since the data sheet is the only document used for pre-screening and interviewing in many placement offices, it is a vital link in the job search process.

Each week (every two weeks for the Career Development and Placement Center) the Bulletin, a list of upcoming interview schedulers including the names of the companies, job descriptions, and requirements, is made available. If the student meets the job requirements, he or she can bid for a position on an interview schedule, usually through the Computer Assisted Priority System. Priority is determined by a number of factors including graduation date and number of previous interviews.

Every week a printout is posted listing those students who received interview slots and those who were put on waiting lists. The only step left is the actual interview.

There are many books giving tips on the interviewing process; what to ask; what to wear; and how to prepare. In addition, the Career Development and Placement Center holds a week workshop on interviewing skills.

On-campus interviewing is a once in-a-lifetime opportunity to meet with many recruiters in one place. According to Betty Becker of the Engineering Placement Office, they had 254 companies come to campus this fall and had 1,054 students registered with their office. The Commerce Placement Office's 1987 undergraduate survey show that of those students who accepted jobs before graduation, an average of 93 percent had made initial contact through on-campus interviewing.

While senior year can be a year of carefree fun, it is also a year of planning for the future.
Interviewing. Is it simply navy suits, white shirts and resumes or is it a complex process composed of set standards, perceptions, interactions and reactions, and a lot of gaming? You be the judge.

Did you know that...

According to many recent reports by recruiters across the nation, 50 percent of the decision of whether to hire someone is made within the first 30 to 60 seconds of the interview, and about 25 percent of the decision is made during the following 15 minutes. In other words, half a minute determines half of a decision that may affect your entire life.

There is a list of topics that are illegal for an interviewer to ask. These topics include age; height; weight; nationality; financial, marital, or family status; and religion. Did you know some recruiters will still ask these questions?

---There are ways of disguising illegal topics in legal questions. Without directly asking if a person is married or has a family, the recruiter could ask, “Are you free to relocate anywhere in the country?”

---Even the simplest questions can have double meanings. “Tell me about yourself,” could actually mean “Tell me what you can do for this company and how you will fit in here if we hire you.”

---Some recruiters ask questions or take certain actions just for the sake of evoking reactions from the interviewees. For example, a recruiter might never make eye contact with the interviewee and constantly look down at his papers, writing the entire time. Recruiters also frequently use “the silent treatment”. After the student answers a question, the recruiter might be silent for a long period of time knowing this will make the student uncomfortable. This discomfort is due to the student not knowing whether the recruiter is simply thinking about what was just said, totalement disagreeing, or waiting for more.

Interviewing is not to be taken lightly. One must prepare himself or herself for the expected, but especially for the unexpected. Besides numerous articles and books available today on the topic of interviewing, there are also various workshops on campus that prepare students for interviews. The interviewing skills workshop of the Career Development and Placement Center in the Student Services Building is an excellent one.

The purpose of this article is not to attack the interviewing process, nor to frighten students. It is only to help open students’ eyes as to what really goes on in some interviews. The key is simply to be prepared, and beware.
A Helping Hand

We all need help from time to time, whether that help is for personal problems or school. Whatever the case, the Counseling Center in the Student Services Building offers a glimmer of hope.

Students encounter an entire range of problems including career indecision, academic difficulty, problems with family and friends, depression, anxiety, procrastination, low self-esteem, and dating and sexual problems. The Counseling Center can help with all of these problems as well as the problems facing minority, disabled, and gay and lesbian students.

The center sponsors a workshop series entitled “Tuesdays at Seven”. The series covers topics including long distance relationships, time and stress management, commitment and love, AIDS and safe sex, and overcoming anxiety.

The Counseling Center’s film series, “House Calls”, is shown every week on cable channel B-6. The center also offers a self-management lab, located in the Undergraduate Library. Set up as a self-help center, the lab uses the SIGI-Plus career guidance and information system.

For individual counseling, a staff of clinical and counseling psychologists and pre-doctoral interns are available to help students with personal crises. Students can make appointments with these professionals between 8 a.m. and 5 p.m. Monday through Friday for any kind of problem, big or small.

Students have been counseled for alcohol and drug problems; unwanted or, perhaps, wanted pregnancy; depression; suicide prevention; eating disorders such as anorexia nervosa and bulimia; loneliness; rape and sexual harassment; and violent relationships. The counselors at the center guarantee complete confidentiality.

Another service offered through the Counseling Center is the Emergency Dean. In the event of a personal emergency that will keep the student from attending classes for an extended period of time, the Emergency Dean can excuse the student from classes. The Emergency Dean can also arrange for emergency loans. The Emergency Dean phone number is 333-0500.

The Counseling Center phone number is 333-3704. Students are encouraged to take advantage of the help that is offered.

The increasing awareness of AIDS or acquired immune deficiency syndrome, and other sexually transmitted diseases (STDs) has prompted the installation of condom dispensers in both men’s and women’s bathrooms on the first and ground floors of the Illini Union.

The Illini Union Board approved the installation of the condom dispensers at its November 11 meeting. Installation was scheduled for sometime during the Spring 1988 semester.

The Illini Union planned to purchase between eight and twelve condom dispensers at a cost of less than $2,000. However, it was not yet decided if the condoms would be dispensed individually or in packages of three. The Illini Union also planned to post messages along with the machines explaining the role of condoms in the prevention of the spread of AIDS and other STDs.

McKinley Health Center already offers free condoms to University students, but the Illini Union Board believes the machines will be more discreet and less intimidating than the McKinley condom service.

Twenty-four universities across the country already have approved condom dispensers, including Big Ten school Northwestern University.

story by Hannelore Weir
An Education Beyond Books

The word education has come to mean learning book basics like math, science and English. But there are some important qualities that cannot be learned by studying books, qualities that can only be learned by experience. A few of these unique qualities are leadership, strength, self-discipline, determination, and the ability to take pride in serving our country. The Reserve Officer Training Corps (ROTC) is one of the many ways of achieving that extra education with the chance of receiving possible tuition, fees, and book waivers plus $100 per month.

Although the ROTC offers many benefits, it is meant only for those students who are seriously committed to fulfilling their potential in the services. It takes time, dedication, and hard work to become an officer. But for those who have what it takes, becoming a commissioned officer is a great honor that is well worth the effort.

Each of the three divisions of the ROTC, Naval (Navy and Marines), Air Force, and Army, operates independently and has its own curriculum and training.

According to Army ROTC Captain William Dunlop, the Army ROTC curriculum includes leadership and management training and courses in ethics and land navigation. It has requirements regarding GPAs, physical fitness, and special military courses. Freshmen and sophomores are required to take a one hour military course and one lab each semester, including drill time in the Armory. Juniors and seniors take 2-3 hours of military courses and one lab per semester.

After graduating, students are commissioned as officers and begin serving their contracted 8 years, 4 years minimum of active duty locally, defined as an area within a 100-mile radius of campus. Air Force ROTC students are trained in leadership, flying, and operations duty including air weapon control and air traffic control, and includes 4-6 weeks of field training. Also, during the summer an intense two-and-a-half to three week flight training program is held in San Antonio, Texas which involves a 14-hour flying course.

Commissioning in the Air Force requires a college degree, something not every service requires. Once the students are graduated and commissioned, they have one year of pilot’s training and 8 years of active duty. According to Colonel Carl Pond, there is nothing like flying in the Air Force.

Although the Naval ROTC can not provide Kelly McGillises for all their midshipmen, according to Commander Donald Curran, it does prepare them "mentally, morally, and physically to become professional officers in the naval service."

The NROTC offers several programs including one for the recipients of the 4-year scholarships. These students’ training involves a “cruise” every summer. During the first summer, 4-6 weeks are spent aboard ship as enlisted personnel. In the second summer, students visit various naval bases at which they observe and learn about flying, submarines, Marine Corps amphibious operations, and surface warfare. The third summer, students in all the NROTC programs work aboard surface ships as junior officers. Upon graduation and commission, the new officers begin their 4-year minimum active duty.

Each division of ROTC is open to both men and women. In fact, there are 7 women in NROTC, while in the Air Force ROTC, 24 of the 135 students are women, and in the Army ROTC, 26 of the 130 members are women.

To join the ROTC, one doesn’t need to have any certain major. However, dedication, strength, and will are needed to become an officer in the U.S. armed forces.

Incoming freshman students and new transfer students have been targeted for an $11 summer orientation fee. The fee will be imposed the summer of 1988 only on those freshman and transfer students who advance enroll and then participate in the orientation program.

The fee was proposed in February of 1987 and was backed by the Student Government Association in March. The fee will be implemented for the first time this summer for those attending school in the fall of 1988.

The money will go toward funding and improving the orientation program, which is designed to familiarize new students with the University and its workings. The program currently costs about $62,000. The fee would bring in $72,000 in funding.
MTD’s "I" Plan

In the campus elections on Dec. 2 and 3, 1987, University students voted down the "I" plan for proposed campus bus service by the Champaign-Urbana Mass Transit District. The proposal included a "Quad Circulator" on weekdays from 7:30 a.m. to 5:30 p.m. and an "East-West Circulator" on weekdays from 7:30 a.m. to 2 p.m. and weekends 10 a.m. to 2 a.m.

The proposal also included extended late-night service until 2 a.m. on the Green, Brown, and Orchard Downs bus lines.

The MTD’s "I" plan was to be funded by a mandatory fee of $15 per semester. Advocates of the plan cited safe late-night transportation, total community access, and off-campus job and housing opportunities as advantages.

Opponents felt that people who did not use the proposed bus service should not be made to pay the mandatory fee and that the plan really did not improve access to campus. Each student would have to ride the bus 30 times a semester to get their $15 worth of bus rides.

The MTD "I" plan proposal was defeated by a narrow 8 percent margin, with 4,594 students voting against the plan (54%), and 3,912 students voting for it (46%).

The $150 tuition hike, general fees and new mandatory computer fee may have contributed to the defeat of the "I" plan, with students balking at the prospect of yet another fee.

The "I" plan proposal was defeated by a narrow 8 percent margin, with 4,594 students voting against the plan (54%), and 3,912 students voting for it (46%).

Imagine lying on the beaches of Rio, skiing the Swiss Alps, or watching a bullfight in Madrid. Most of us only dream of ever traveling to such places. But surprisingly enough, these dreams can become reality while we are still students at the University of Illinois.

The Study Abroad Office offers U of I students the opportunity to experience the excitement of visiting a foreign country while also enhancing their education. Often times, we as Americans allow our thinking and views to become limited and myopic. In this day and age we simply cannot afford to ignore what is going on outside America because it invariably affects what is going on inside America. By studying in another country, students can gain an understanding of other cultures, peoples, ideals, and ways of life while also opening their minds to the world.

In addition to having its own programs with universities in many countries, the Study Abroad Office also serves as a resource center for various departmental study abroad programs and also other universities’ programs. This networking makes it possible for U of I students to study in practically any country they wish.

One of the best parts about studying abroad is that it doesn’t cost much more than studying here. Students are registered at U of I, pay normal tuition, housing, and fees, even though they are studying at a foreign university. Thus the only additional costs are for travel and personal expenses. Plus, the students retain their university status and receive credit for the classes they take abroad. Education, however, doesn’t stop at the universities but in fact only starts there. The universities also serve as a meeting place for students, not only with those students from that particular country, but from other countries as well.

In between studies, students often take time out to travel around the country to get to know both it and its people better. Some travel to neighboring countries, thus further enriching themselves. And some students even fall in love with the country so much that they decide to return in the near future or even stay there permanently.

Emily David is graduating from UI this May and is returning to Barcelona, Spain in June with plans of finding a job teaching English. She and 60 other American students spent last year studying at the University of Barcelona through a joint university program between UI and University of California. Although this particular program’s classes were separate from other University of Barcelona classes and were structured much like UI classes, they were however, taught in Spanish by the university’s professors and lecturers. While it was comforting at times to be with other American students, David says there were many opportunities to take the initiative to meet new people. For example, an American student could participate in an “intercombi” where he/she would get together with a Spanish student and teach him/her English while being taught Spanish in return.

David found that life in Barcelona is much more slow-paced than life in America. The city “shuts down” daily, she said, from 1:30 to about 5 p.m. for “sesta.” Their time schedules are also different in that dinner is often eaten around 11 p.m.

“In Barcelona, every day was a learning experience,” said David, “simply because you were more aware of everything around you, where in America
we tend to take things for granted."

Another student who studied abroad last year is Bobby Riggs. Now a senior in biology, Riggs spent his junior year studying at the University of Manchester, located east of Liverpool, England. Even though England and America share many similarities, there are several distinct differences. The entire English schooling system, which is completely paid for by the government, is set up in such a way that by the time students reach college, of which only 14 percent ever do, they are already concentrating in a certain major or field, and spend their three years of college taking classes strictly in that field.

According to Riggs, the grading system is also very different because there is usually only one exam at the end of the course, as opposed to our many quizzes, hourlies, practicals, midterms, and finals. Their final exam consists of two broad essay questions, of which they pick one. The majority of their class grade is dependant upon this exam, however, the English place more emphasis on actual learning than on grade points.

Some other differences Riggs noticed are that English students are more politically oriented, shaking hands is very rare, and they seem to have a better knowledge of America than we do of England. Since the American television shows they get are the Dallas and Dynasty type, misconceptions exist about Americans being wealthy oil tycoons who drive big fancy cars and live on ranches. (What would they think of us if they ever saw All My Children or All?)

Some college customs tend to remain the same over cultures. At U of I the custom after going to the bars is to go out for food or order a pizza. In England, after going to the pubs, the students usually go to "the chippys for fish and chips, chips and gravy, curry, or cheese and onion pie."

David and Riggs are only two of the hundreds of students who study abroad every year. Each went to a different country and had different experiences, yet both now have memories that will last a lifetime.

If you think you might be interested in studying abroad, call the Study Abroad Office at 333-6322 and make an appointment to talk to other students who have studied abroad or to get information on a specific university or country. This is definitely one opportunity you and your education can't afford to miss. And even though sandy beaches or snow-covered mountains are not a good reason to choose to study abroad, they are certainly a terrific added bonus!

upper left The Study Abroad Office has all the information you would need to help you find the country that's right for you. above This map of Britain shows the locations of U of I students studying abroad.

story by Michelle Andrich layout by Heidi Martisius
There aren't many tests on most campuses today that students can't study for. But if U.S. Surgeon General C. Everett Koop's proposal is approved, soon there might be a test at one university no one can study for, the Aids test.

Koop announced his proposal Thursday, January 28, at the world's first global Aids summit in London, England. Consisting of delegates from nearly 150 countries, it was the largest gathering ever of health ministers discussing a single health problem.

1988 was proclaimed the "Year of Communication and Cooperation About Aids", as the summit delegates discussed the launching of a massive global assault on Aids to slow the spread of the disease. Their strategy on combating Aids is to "attack its modes of transmission through educational and scientific means."

Koop would like to screen every student of a major American university this spring to help determine the incidence of Aids among young adults. Although a specific university has not yet been chosen, it will most likely be one in a large city with a student body of around 25,000.

A similar proposal was also made for screening at various high schools throughout the U.S. However, the government has not yet made a decision on either proposal.

The Surgeon General would like to screen every student of a major American university.

One important factor behind the urgency of the matter is the World Health Organization's forecast that in 1988, Aids cases will double to 300,000 worldwide, with one million victims by 1991.

Aids testing is not only restricted to college students, however, because as of January 1, 1988, it is now a requirement for couples wishing to get married in Illinois. On September 21, 1987, Governor James Thompson signed a package of bills directed at fighting Aids, one of which is the marriage license bill.

Under the new law, couples applying for an Illinois marriage license must furnish proof from a private doctor that they have been tested for both the Aids antibody and syphilis within the past 30 days, and have told each other the results. The results need not, however, be revealed to anyone else. Thus, those testing positive will not be prohibited from marrying; the law is only to protect an
Can't Study For

"unwitting partner."

Illinois is only the second state to have such a law on marriage license testing, with Louisiana being the first. In Louisiana, though, the law does require disclosure of the results. People infected with the virus are not prevented from marrying, but must agree to counseling.

Texas has passed a similar bill regarding marriage license testing, but it will not be put into effect until "the percentage of Aids victims in that state reaches a certain percentage far higher than its present level."

Although the law was put into effect in Illinois so as to "protect the public", it may pose many problems for couples.

1) Wedding plans may be delayed for those who procrastinate getting the tests, because the Aids test can take anywhere from a few days to a month to complete, health authorities say.

2) There may be not enough labs to handle the increased volume of tests needed. Currently only 27 Illinois labs have been approved by the Illinois Public Health Department for the test.

3) The test is not 100 percent accurate. According to Linda Haase, spokeswoman for the state's public health department, the two-step screening process could produce as many as five out of 100 inaccurate results. This could cause needless fear and suffering for those couples mistakenly diagnosed as being positive.

Couples applying for an Illinois marriage license must furnish proof that they've been tested for Aids.

4) Lab personnel who interpret the tests sometimes cannot find a clear result. In the 11,000 tests conducted during the last two and a half years, there were 37 cases in which neither a positive nor a negative result could be determined. People with "indeterminate results" are not excused from the marriage license testing requirement, but rather must retake the test until a result is determined.

5) The cost is another major problem facing couples. Each Aids test could cost up to $100 and each sphyllis test about $5. That's $210 most people about to be married can't spare, in addition to the $15 cost of the actual marriage license.

What is the solution as most couples see it? Get married in a neighboring state. Wisconsin, Iowa, Missouri, and Kentucky require no blood tests and their marriage license prices are $40, $15, $15, and $22 respectively. Indiana charges $18 but does require prospective brides to be tested for rubella if they can not furnish proof of immunization.

This "solution" is not one that will be favored by the Illinois state government or by Illinois retailers. Neighboring states, however, have immediately noticed the increase of Illinois residents applying for marriage licenses in their states and welcome the additional revenue as well. It was even predicted that numerous chapels will soon be built near the Illinois state line. Eventually the entire state will probably be bordered by these chapels, making it seem like Las Vegas in our own backyard.

The irony of it all is that the state feels this moral obligation to protect "unwitting partners", yet in this day and age most couples discuss Aids long before ever reaching the step of actually applying for a marriage license.

It's frightening how in a democratic country such as ours, the state can still impose its will on topics such as Aids testing while attending a university or before receiving a marriage license. The question only remains, "What's next?"
Following a presidential election is a lot like scheduling classes; there are so many adds and drops, it's hard to keep the whole thing straight. Just be sure you have the schedule straight before the election in November.

This year's election, like all presidential elections, has had its share of surprises, disappointments, and scandals. The race has suffered, or benefited from, drop-outs and reentrances, tears and accusations, leaving it up to the American intelligence and conscience to decide who will govern our nation for the next four years.

The Iowa caucus favored Dole and Gephardt, with a surprising second-place showing on the Republican side for Pat Robertson, ahead of third-place Vice President Bush. In the New Hampshire primary, Bush and Dukakis, the governor of Massachusetts, placed first in their respective party races, each with a sizeable margin of victory.

With several primaries yet to take place, it is difficult to make a substantial prediction. Suffice it to say that the election has probably not seen its best or its worst, and, as the saying goes, it's not over 'til it's over.

The Last Year Underground

This is the last year the Daily Illini will be an underground newspaper. Next year, instead of being located in the basement of Illini Hall where it has been since 1937, the DI will move into a newly renovated building at 57 E. Green. The offices of the Illio and Technograph will also be moved.

The Illini Media Company has been looking for new space for a couple of years. The University, because of a shortage of office space, has been wanting to reclaim its space in Illini Hall. With the DI also needing more efficient space, the decision to move was inevitable.

The Apple Tree Stereo building was purchased and the architectural firm Architectural Spectrum began space analysis. They consulted employees in each office, determining which equipment was necessary and what space was wasted. The new building will have slightly less square footage but the space used will be more efficient.

E. Mayer Malony, Publisher and General Manager of the Illini Media Company, doesn’t believe that the location near First Street on Green will be a problem, although it might take some getting used to. Students who work for the DI will have to adjust to not being able to come in and work between classes as they presently can because of the office’s proximity to campus.

The IMC hopes to move WPGU from its location in Weston Hall to the new building in about three to five years. This will mean another renovation to accomodate the station.

Most people don't know much about the Amish community of east central Illinois, if they're aware of it at all. The Amish people are quiet and apolitical, and very little is said about them in the news.

There are approximately 2,500 Amish or 'Plain People' living around the communities of Arcola and Arthur, Illinois. They believe in and live simple, agricultural lives, without electricity, running water, or power driven machines. They travel by horse and buggy, and plow their fields with horse-drawn plows. Their children are educated until the eighth grade, at which time they become involved in farming activities. They don't sing, dance or listen to music. Their dress also reflects their desire to be plain in order to have a better life in the next world.

Despite their custom of noninvolvement in worldly activities, an incident in September, 1987, stirred a community of Pennsylvania Amish into action. The state was considering proposals for 6 possible new highway routes, 3 of which crossed through Amish farmland. After receiving pamphlets urging them into action, approximately 1,500 Amish turned out for the case hearing, showing their concern through their silent presence. It was one of the largest public gatherings of Amish ever seen, outside of weddings and barn buildings. Some Amish even acted as spokesmen for the group, contrary to their beliefs and traditions.

Rockome Gardens, located 5 miles west of Arcola, Illinois, is a good place to learn a little about the Amish way of life, and the drive through the Amish community is, in itself, a good start.

The park is owned by other people in the area, but Amish arts and crafts including woodworking, quilting and Amish foods are displayed and sold there. Rockome Gardens also employs some people from the Amish community.

Research on Campus

Research at the University of Illinois is an important part of the university because of its function as an institute of higher learning. The laboratory or library is quite often the graduate student's classroom. The research that professors and graduate students do is used locally and nationally by firms, government and other universities.

The importance of research in the sciences at the U of I is evidenced by the Coordinated Science Laboratory (CSL), an interdisciplinary research laboratory in the College of Engineering. Research program topics range from electrical, computer and aeronautical/astronautical engineering to economics and library sciences. Present laboratory activities range from research programs in semiconductor physics to applied computation theory to information retrieval to climate and crop analysis. To do research at CSL, a professor must have a grant from an outside institution such as the National Science Foundation (NSF), and must hold a joint appointment with one of several specified departments. The Beckman Center, currently under construction, is going to be an even larger laboratory similar to CSL, though it has not yet been decided which specific areas of research will be conducted there.

Research goes on in every department, of course, including sciences such as the humanities. Research in these fields, though, is generally supported by the university, and not outside institutions. One exception is Patrick Maher of the philosophy department, who is presently working at the University of Michigan under an NSF grant, doing research in probability theory. Other research in the philosophy department includes questions on virtue, individuality, or the definition of objects. Research in the history department covers all continents, ancient to recent. Charles Stewart and Donald Crumme are involved in a large African studies research project in history.

Without constant research, the University of Illinois wouldn't be what it is today. A growing quantity and quality of facilities and equipment at the university, not to mention its excellent library which is used by researchers all over the world, will certainly insure its growing importance.

Smoking is out.
The image of the sophisticated gla-
mour queen coolly smoking a long,
thin cigarette has been replaced by the
pictures on the posters in doctors’
ofices warning against almost-certain
lung cancer for smokers.
The image now is one of a hacking
40-year-old woman, she looks sixty,
who has yellow teeth and fingertips.
She is constantly reassuring others
and herself that she can quit anytime
she wants (cough, cough).
Today, 32 percent of the adult
population smokes. That’s down ten
percent from the figure for 1967. Over
30 percent of the nation’s corporations
have imposed restrictions on em-
ployee smoking in the workplace, and
the figure is expected to jump to 80
percent in the next two years.
The majority of the 53 million smok-
ers remaining in the country are the
nation’s blue-collar workers and the
poor. With the new limitations in the
corporate workplace, middle and up-
per-class smokers are being forced to
change their ways.
The anti-smoking movement has
evolved into a $100 million industry.
Ten of our 50 states already have laws
restricting smoking in public places.
The United States Army has banned
the use of tobacco on all its installa-
tions, allowing smoking only in design-
nated areas. The Marine Corps is ex-
pected to follow suit.
Recently the Senate Appropria-
tions Committee approved a bill ban-
ing smoking on all commercial air
flights of two hours or less. Those
smokers who must take a short flight
will have to learn to abstain for those
120 minutes.
The University of Illinois at Chicago
recently took all cigarette machines
out of its buildings and plans to halt
retail sales on campus, a loss of
$50,000 in annual revenues.
Here at UIUC, smoking is already
prohibited in campus auditoriums and
classrooms. A recent resolution to ban
all smoking was defeated by the U-C
Senate in October 1987, but is ex-
pected to come up for a second vote.
Smoking is currently allowed in
offices, seminar rooms, lounges, res-
toops and halls. The main reason for
the failure of the resolution was that it
could by construed as an infringement
of individual rights.

Assembly Hall Turns 25

The flying saucer is 25 years old. The Assembly Hall was finished in 1963 after four years of construction. March 2 marked its 25th birthday, and rather than celebrate only one day, the festivities will be a year-long event.

Events throughout the year include a series of big name Broadway shows that will perform at the Hall. "CATS" included. Also on the agenda are half hour shows on both WCIA and WICD commemorating the anniversary.

Media coverage included ads in the Champaign-Urbana News-Gazette and the Daily Illini. One entire Weekend section of the News-Gazette will spotlight the Assembly Hall.

The Assembly Hall with its huge dome-like structure and its parking lots, situated on Florida Avenue between First and Fourth Streets, cover a nine block area. It is the world's second largest free-standing, edge-support dome.

The Hall has a seating capacity of about 17,000, depending on seating arrangements, and is host to Big Ten basketball games, concerts, plays, musicals, and other entertainment events. The Illinois High School Association State Championships for wrestling and basketball are held in the hall every February and March.

In Memory

Thanksgiving this year was a day of great sadness for Chicagoans. On Wednesday, November 25, Mayor Harold Washington, 65, died after suffering a heart attack. Washington was the first black mayor of Chicago and the first mayor to serve more than one term since the late Richard J. Daley.

According to Alton Miller, Washington's press secretary, he and Washington were in the mayor's office at City Hall discussing the ground-breaking ceremony of the Kenwood Oakland Community Organization earlier that morning when Washington "suddenly slumped to one side (as if) he was trying to pick something up off the floor he might have dropped like a pencil." That was shortly after 11 a.m.

Washington was immediately rushed to Northwestern Memorial Hospital where three teams of cardiac specialists worked unsuccessfully for more than two hours to revive him. At 1:36 p.m., Mayor Washington was pronounced dead by Dr. John Sanders, the hospital's chief of staff.

Though word of Washington's death was immediately sent to the offices of Mayor Tom Bradley of Los Angeles and Mayor Ed Koch of New York, the official press conference announcing his death wasn't held in Chicago until after 2:15 p.m.

The Rev. Jesse Jackson received the news on the first day of his six-day trip through the Middle East and immediately returned to Chicago in part "to prevent the unravelling of the precious and somewhat fragile (political) coalition that needs to be sustained."

Thousands of Chicagoans gathered Friday in Daley Center Plaza during a memorial service. From 4 p.m. Friday until midnight Saturday, City Hall was open so people could pay their respects to Washington, who lay in state in the center rotunda. White chrysanthemums, the city flower, flanked his casket. The lines to City Hall were blocks long as people waited, some for over three hours in the cold and drizzle, to say goodbye to their mayor.

Washington's death caused great commotion not only among the citizens of Chicago, but especially among the city's politicians because it began a sudden race for the position of mayor, with the likely candidates being aldermen Timothy Evans and Eugene Sawyer. Alderman David Orr assumed the role of interim mayor until the city council could meet and elect an acting mayor.

On Dec. 1, the night of the city council elections, 2,500 to 5,000 people staged a rally in City Hall for Evans and against Sawyer. This was only the beginning of the squabbling and fiascoes of the evening. Finally, at 3:59 a.m., Sawyer was elected as acting successor to the late Washington, with 29 votes to Evans' 19; and at 4:04 a.m., he was sworn into office.

This Thanksgiving was one that will go down in history s the passing of not only Chicago's first black mayor, but also of a great man.
PTL Scandal

Teleevangelist Jim Bakker stepped down as chairman of the PTL Club in March after revelations of a 1980 tryst with a New York church secretary named Jessica Hahn.

Bakker also admitted paying $265,000 in "hush money" to Hahn and her advisors.

Bakker, who was also president of PTL (People That Love, or Praise The Lord), co-hosted a daily inspirational hour with his wife, Tammy Faye, from his church, the Assemblies of God.

The PTL ministry was turned over to conservative televangelist Jerry Falwell, leader of the Moral Majority.

Airline Safety

Within the past year, the skies have become dangerous. In a one week period in August, six near-collisions were reported regarding several of the nation's airlines.

One problem results from the fact that passenger jetliners, operating under radar control from the ground, are routed through the same airspace used by small noncommercial planes not under radar control.

Another problem plaguing the aviation industry is the recent increase in commercial flight delays. Because of the large volume of air traffic, planes have to wait in line on the runway prior to take off. Result: long waits for commuters and missed connecting flights.

Highway Shootings

Beginning in mid-June, over 20 highway shootings occurred in the Los Angeles area. Motorists took out their frustrations about California's jam-packed highways on fellow commuters, causing three deaths between June and September. Four others were wounded.

The highway violence led to a sudden increase in sales of bulletproof windows, and people began carrying guns in their cars.

Experts gave reasons for the shootings including environmental conditions such as crowded freeways and intense heat, a tendency to mimic crimes glamorized on television, and society's increased tolerance of violence.
September 10, 1987 marked the beginning of the 10-day, nine-city, and 48-speech tour of the United States by Pope John Paul II, his 31-member entourage and his two bulletproof “pope-mobiles” (in which he has travelled since he was shot by a gunman in St. Peter's Square on May 13, 1981).

His mission was to defend church doctrine currently under attack within his U.S. flock, applaud the vibrancy of the Roman Catholic Church in America, and cement relationships with other faiths.

Each stop of the tour had a theme including the priesthood, Jewish-Catholic relations, and social and economic justice, with the abortion issue being raised in his final speech.

Although this was only the second time Pope John Paul II has visited the U.S., the crowds which came to see the leader of the world’s 850 million Roman Catholics were far below the estimates and were much smaller in number than those of his previous tour.

Protests were fewer than expected, but they did exist. Trans World Airlines (TWA) flight attendants, who were on strike, were upset that the Pope flew on a TWA airplane. Orthodox Jewish organizations were dismayed by a Vatican audience with Austrian President Kurt Waldheim back in June, and therefore boycotted the Pope's masses.

Despite the protests and conflicts, most agreed that Pope John Paul II is a man who can touch hearts even when he cannot change minds.

Happy 200th Birthday!

Celebrations were held across the country on Thursday, September 17, 1987, to honor the 200th birthday of the signing of the Constitution of the United States, the oldest Constitution in the world.

The "preamble" to the celebration began on Wednesday with President Reagan leading the nation's sixty-eight million schoolchildren in a televised Pledge of Allegiance. The spirit of the celebration even reached the New York Stock Exchange as trading stopped briefly while traders cheered and waved flags.

President Reagan made a speech at Philadelphia's Independence Hall on Thursday, stating that the Constitution's continuing goal is "the preservation and extension of the sacred fire of human liberty. That is America's solemn duty." Ceremonies included a $3.5 million, six-hour parade featuring 30 floats, over 20,000 marchers, 1,500 white doves, and approximately 750,000 spectators.

Throughout the nation, there were picnics, fireworks, and waving flags. The 200th anniversary of the Constitution was also important for many people who took their oaths of citizenship that day.

At 4:00 p.m. eastern standard time, the exact hour the Constitution was signed 200 years ago, as white doves were released into the sky, the Centennial Bell was rung atop Independence Hall and began 200 seconds of bell-ringing around the country.

The bells were heard here at the University of Illinois (at 3:00 pm central time) as the chimes of Altgeld Tower played a 200 second tribute consisting of a fanfare of bells, followed by "The Star Spangled Banner" and "America the Beautiful". At the same time, at the top of the tower, 200 red, white, and blue balloons were released, one each second for 200 seconds.

**Bork's nomination**

Seldom in United States history have the executive, legislative, and the judicial branches of government come to such a clash of wills as they have over the nomination of a new Supreme Court chief justice. The job holds the potential power to shape history and government, and the powers that be recognize this as a potential to do great damage or good to our country.

President Reagan's nomination of Robert Bork sparked much controversy on the Senate floor. Bork, who is known for his extreme conservatism, was not the choice of many Democrats nor some Republicans. The Senate Judiciary Committee confirmation hearings soon became a media event.

Feminists, gay rights activists and various minority groups stormed Capitol Hill to protest the nomination. Bork defended himself by renouncing his conservative ways, focusing more on procedures than issues, and speaking liberally about many of the issues he did discuss. However, his supporters were few and far between.

**Gary Hart**

The 1988 presidential race provided the National Enquirer with enough material to last for at least the next three or four campaigns. By October 1987, before the first primary, three candidates had already withdrawn from the race.

The first to go was the Democratic frontrunner, Gary Hart. Early in the campaign, the Miami Herald published a story stating that Hart had spent the night with a woman other than his wife. This woman was revealed to be a beautiful young model named Donna Rice. Although the Herald's evidence was sketchy and Hart claimed that Rice left his house shortly after she arrived, the controversy raised questions about Hart's fitness for the presidency due to a lack of good judgement.

Shortly after his withdrawal from the race, the National Enquirer printed a front page picture of Rice sitting on Hart's lap while on a vacation yacht in the Bahamas. Gary Hart's political career was left in a shambles and Rice's modeling career took off with a bang.

The whole affair brought many questions to the minds of the American public: Should a candidate's personal life be made an issue in his candidacy? Does the press have the right to print a story without concrete evidence? Is it in the public's interest to know?
Xiaoping Retires

On Nov. 2, 1987, Premier Zhao Ziyang, 68, replaced Deng Xiaoping as chief of the Communist party in China.

Deng, 83, stepped down as leader of the 46 million member Communist party so younger officials could replace aging ones and continue Deng's plan of market-oriented reforms and open door policies. Though Deng retired from two of his top party posts at the conclusion of the 13th Communist Party Congress on Nov. 1, he retains his position as chairman of the powerful Central Military Committee.

Zhao Ziyang plans to continue economic reform toward modernization in China by relying on the basic workings of capitalist economies.

He stated that the goal of the Chinese Communist party is to accelerate and deepen economic and political changes. Zhao succeeds Hu Yaobang, who was Deng's first pick as successor. Hu was ousted for not being able to put down a student uprising in which the students called for freedom and democracy.

Zhao advocates the separation of government and party functions, and plans to sort out inefficient and overlapping bureaucracies. He also plans to introduce a civil service system with entrance examinations and job appraisals which will reinforce government independence.

By leaving his post as premier, Zhao ceased his concentration in the field of economics to concentrate on politics. Even Zhao admits that his talents lie in economics rather than in politics.

With the appointment of Zhao, Deng has done his best to ensure that his reforms and ideals will continue after his death. However, one Western diplomat said Deng has only set the stage for a coup once he is dead.

below Newly elected Politburo member Hu Qili (left) confers with fellow reformer and Politburo member Premier Zhao Ziyang during the close of the 13th Communist Party Congress.

The people of the Soviet Union have seen big changes recently under their new, relatively liberal leader Mikhail Sergeyevich Gorbachev. These changes may even affect the direction of U.S.-Soviet relations. During the past year Gorbachev has been implementing policies that stem from his call for glasnost (openness), perestroika (restructuring), and demokratizatsiya (democratization).

When Gorbachev first introduced his "new thinking", the U.S. response was skeptical. Many thought the proposed changes had no substance; and they amounted to only a new superficial face put on to improve foreign relations. Some critics feared that the reforms might meet the same fate of many much less radical reforms in the Soviet Union—a conservative backlash and entrenched in the Communist Party.

Gorbachev's reforms do seem to have substance. The press and the arts have received unprecedented freedom to express negative aspects of Soviet life. Immigration, especially of Jews, has been allowed to increase. Even the economic system is being fundamentally revamped. Small private business is being encouraged, the profit system for large businesses is being introduced, and plant managers are being given more responsibility. Gorbachev's aim is to reduce inefficiency in the economy and increase the quality of produced goods. It's too early yet to see what the effects of his economic reforms will be.

Despite his good intentions, Gorbachev has already met resistance to these reforms on almost every level. Within the government, conservative "foot draggers", as he calls them, do not like such rapid change, especially because many of the reforms call for decentralization, drawing power away from the central government. Consumers also have objections to some of the reforms. They don't want the government to eliminate food subsidies that put a huge drain on the government budget. Consumers also do not want the government to allow food prices to rise to a level that would cover the cost of production. Workers like the idea of earning higher wages for doing a good job, but not at the risk of being docked or fired for doing poor work. Also, many of Gorbachev's reforms will inevitably lead to a percentage of unemployment, which is an unheard-of concept in the Soviet Union.

Gorbachev's reforms even seem to be changing the flavor of U.S.-Soviet relations. The Soviet government has been pressing for successful arms negotiations in the hope that peaceful foreign relations will help keep domestic peace. Reagan, one of the most anti-Soviet U.S. presidents, is moving with caution, forcing the Soviets to show their hand. Outwardly, however, he welcomes Soviet openness, stating that "the advancement to human liberty can only strengthen the cause of world peace." There is a dilemma here: the Soviet changes bring them closer to our own ideals which eliminates the natural relation we have towards human oppression. But, as Richard Perle, a former Secretary of Defense, points out, we may simply end up with an equally malicious enemy with a better economic system. In Henry Kissinger's words, "there are two dangers for the U.S. in this program: first, that it may fail; second, that it may succeed."

At any rate, Gorbachev's sudden radical reforms have thrown the world for a loop. If he can improve the lives of the citizens of the Soviet Union, more power to him.

The Iran-Contra Scandal

Instead of the usual boredom of reruns and gameshows, American television in the summer of 1987 saw sparks of drama, suspense, and at times, comedy. Those sparks flew from the Iran-Contra Hearings. As soap opera fans lamented, concerned Americans tuned in to watch the country’s leaders tell tales of deceit, dishonesty and shredded documents. As the story unfolded it revealed a plot as complicated and convoluted as a network mini-series.

The story had a variety of characters. The hero was the brash young lieutenant colonel who, for reasons of patriotism or greed, was the principle character behind the sale of arms to Iran and the diversion of funds to the Nicaraguan Contras. During his five days of testimony, Lt. Colonel Oliver “Ollie” North became the folk hero of millions of Americans. He portrayed himself as the little guy caught in a trap set by the men at the top, and claimed he had acted out of patriotism and loyalty.

His dramatic and emotion-filled testimony captured the hearts of many Americans and members of the congressional investigating committee. His convincing words conveyed the emotions he felt as he told the congressional committee his story. He could be indignant: “You (Congress) are both the player and the umpire...And in the end you declare yourselves the winner.” He could be contrite: “Lying doesn’t come easy to me...I came here to tell you the truth - the good, the bad and the ugly.” And he could also be flippant: “My memory has been shredded.” With all the controversy and drama surrounding his testimony, Ollie North stands out as the character people will remember most.

Other characters played their part in the drama as well. Fawn Hall, the beautiful young secretary who helped North shred most of the pertinent documents, testified about the nature of those documents. CIA Director William Casey was the mystery man about whom little could be substantiated. He claimed to know nothing about the whole affair but testimony after his death indicated otherwise. Former National Security Advisor Robert McFarlane was one of the fall guys, and tried to end his life after the affair was exposed. Rear Admiral John Poindexter was, in the end, the villain who took the blame for the whole affair. “The Buck stops here” he told Congress.

In addition to all these characters there was a shadowy figure who stood in the background: The President. As tales of the profits made and the funds diverted slowly became public knowledge, Reagan stood irresolute in his claims that he knew nothing about it. In 1984, Ronald Reagan was re-elected to the presidency by the largest margin in history. In May of 1987, a poll performed by U.S. News and World Report revealed that 59% of the people thought he was lying and 26% thought he should be impeached. Throughout the hearings the foremost question in the minds of Congress and the people was: “What does the President know?” The hearings were closed before that answer was satisfactorily answered - a typical ending for a network mini-series.
The Persian Gulf

A little watery corner of the world flared up in mid-October, 1987, and startled the nation into fears of a possible war.

On October 19, 1987, U.S. warships destroyed two Iranian oil platforms, and Navy commandos raided a third. The incident, according to President Reagan, came as a response to the missile strike on a U.S. flagged tanker located off the coast of Kuwait.

Officials in Iran responded to the incident by saying Americans had begun a “full-fledged war” and they promised a “crushing response.”

Tension began in the Persian Gulf when the United States began flagging Kuwaiti oil tankers as a means of protecting them from hostile action from Iran. The incident brought forth the question of the United States’ position in the drawn out war between Iran and Iraq.

L.A. Earthquakes

The people of Los Angeles, who have grown accustomed to the shakes and tremors that accompany everyday life in southern California, were shocked early in October, 1987, by a quake that registered 6.1 on the Richter scale.

The earthquake and its 16 strong aftershocks destroyed buildings, closed several freeways and started many fires throughout the southern California area. At least six people were killed and more than 100 were injured.

The quake hit at 9:42 a.m. on October 2, and lasted 15 to 30 seconds in different areas of the city. Power outages caused buildings to be evacuated as people tried to recover from the quake. A state of emergency was declared by the mayor of Whittier, a suburb of Los Angeles hit hard by the quake.

The quake was the strongest to hit the Los Angeles area since the 6.4 Sylmar quake of 1971, the U.S. Geological Survey reported.

left Estimates of those left homeless from the Oct 1st earthquake were as high as 10,000 people.

story by Colleen Diskin
On Monday, Nov. 23, Cuban inmates of the Atlanta Federal Penitentiary rioted and took over the prison, holding as many as 75 people hostage. This was the second violent uprising in the nation by imprisoned Cubans in three days. The other riot occurred in Oakland, Louisiana. The inmates in both Atlanta and Oakland rioted in reaction to a State Department announcement on Friday, stating that Cuba had agreed to accept the return of over 2,500 refugees from the 1980 Mariel boat lift. The inmates feared deportation and claimed they would rather die than be returned to communist Cuba.

Beginning about 9:20 a.m. Central Standard Time, inmates were reportedly armed with homemade knives and captured guns. Shots were heard from within the prison on several occasions during the day. At least three fires were set to large sections of the facility.

Authorities waited outside the prison, helpless against the captors' threat to kill all hostages if the prison were stormed. Also waiting were relatives of both prisoners and hostages, hoping to get some word on the state of the situation.

On Sunday, all 26 hostages of the Oakland prison were released. Unfortunately, the news of the release had no effect upon the Atlanta prisoners. Meetings with prisoner representatives were at a standoff.

Wednesday showed more hope of reaching a resolution. First, a taped message from auxiliary Bishop Agustin Roman of the Archdiocese of Miami, who had helped in the release of the Oakland hostages, was played over the prison's loudspeaker. Also, a meeting between six inmate leaders and Gary Lesbaw, an Atlanta attorney, brought about the release of one hostage Tuesday night.

Finally on Thursday, Dec. 3, inmates voted to accept an agreement with the federal government that would free the captives and end the 11-day siege, one of the longest prison sieges in U.S. history.

below Cuban inmates request to talk with the Bishop San Roman. bottom SWAT team members patrol the outer perimeter of the Atlanta Federal Penitentiary.
History in the Making

"May December 8th, 1987 become a date that will be inscribed in the history books," said Soviet leader Mikhail Gorbachev at the signing of the INF (intermediate-range nuclear firearms) Treaty in the White House. The signing of the treaty was the beginning of a three-day summit meeting with President Reagan to discuss issues such as curbing long-range strategic weapons, the withdrawal of Soviet troops from Afghanistan, human rights, and the Iran-Iraq war.

This was Gorbachev's and his wife Raisa's first trip to the United States. But during their 76-hour visit, they made lasting impressions, as many opinion polls indicated. Although both Reagan and Gorbachev claimed the summit had been a success and a definite sign of progress, no specific agreements were reached on any of the topics they discussed. The two sides did, however, commit themselves to another summit, their fourth, in Moscow sometime in the first half of 1988, at which time an arms control agreement is planned to be ready for signing.

If this summit accomplished nothing else but the singing of the INF Treaty, it was a success in that it was the first real sign of hope that someday East and West might be able to resolve their differences and eventually remove the threat of nuclear war.

Stock Market Crash

On Monday, Oct. 19, 1987, the New York Stock Exchange recorded the worst stock market crash in history, a fall of over 500 points. The Dow Jones industrial average plunged over 22 percent, 10 percent more than in the crash of 1929, which heralded the beginning of the Great Depression.

The stock market had been experiencing record highs in trading during a 5-year "bull market" that pushed the Dow Jones industrial average higher and higher.

Some experts said the crash was merely a market correction of the record gains that have occurred since 1982. Others blamed the crash on pessimism over the weak American dollar, concern about U.S. military action against Iranian offshore oil platforms in the Persian Gulf, and the blind panic of stockholders. Finally, some people said computer trading programs that automatically sell when stock prices reach a certain point were to blame for runaway sales and increased panic.

The New York Stock Exchange crash set a worldwide pattern, causing record drops in the exchanges in London, Tokyo, Hong Kong, Frankfurt, Amsterdam, Sydney, and other major financial centers.

Twins Win World Series

America loves the underdog. At 150-1 odds, the Minnesota Twins captured the American League West title and beat the St. Louis Cardinals, four games to three, to win the 1987 World Series.

The Twins, who won less than ten games on the road after the All-Star break, won the Series in the friendly confines of the Hubert H. Humphrey Metrodome, and became the first team in World Series history to win every home game. On the season, Minnesota was 29-52 on the road and 56-25 at home, the best in the majors.

Home sweet home--a deafening crowd, white bath towels called "Homer Hankies", and a home run hitting trio of Brunansky, Puckett, and Gaetti. This, contrasted with the soft-spoken manager Tom Kelly, made an interesting ball club. Kelly, at 37, is the youngest manager in baseball.

Pitcher Frank Viola was the World Series MVP, and the addition of veterans Joe Neikro, Steve Carlton, and Don Baylor brought experience to this young Minnesota team.

St. Louis fans all over campustown pointed out that the Cardinals were without their star player, Jack Clark. The Cardinals have also been in the World Series three times in this decade. Whatever the reason for Minnesota's win, they probably won't be called "Twinkies" again next year.

layout by Debbie DiMaggio
Economics has been a subject of great interest and discussion this year. Since the crash of the stock market on Oct. 19, 1987, the state and future of the economy has been questioned. The Great Depression of 1929 was preceded by a crash less severe than the one that took place in October. A depression was sure to follow the crash in 1987. But no such thing has happened and none is expected to. Not only has there been no depression, but there hasn't been any recession either. A steady economic growth trend is now in its sixth year.

On the nine occasions that the stock market has crashed by 25 percent or more, in only one instance has a depression followed—1929. Four were followed by strong economic advances and the remaining four were followed by short, slight recessions.

Experts in the national arena and authorities here at the University seem to agree that the growth trend will probably end. All trends do; but it does not have to be now, or even soon. According to rational expectations economists, the economy will take a downturn when unfavorable supply shocks occur.

Most economists expect the current economic expansion to continue throughout 1988 and probably through the end of the decade. The stock market has not been a reliable forecaster and any upcoming recession is not expected to be in the immediate future.

After a decade of constant ups and downs—the unemployment rate hovered around 10 percent in 1982 but is now down to around 6 percent. Continued growth could be nice for a change.

Volume 95 of the University of Illinois’ Illio was published by the Illini Media Company, E. Mayer Maloney, publisher. It was printed by Josten’s Printing and Publishing Division in Topeka, Kansas. Publication date for the yearbook was April 16, 1988. Paper stock throughout the book is one-hundred pound gloss. Camera-ready production was executed by the Illio ‘88 staff.

The cover is a true life laminated lithograph with custom art by Josten’s. The foil is red foil number 384. Endsheet stock is dark blue 291.

The majority of the body copy is 10 point Helvetica. Headlines, in general, are 42 point. Captions are in 8 point, bylines are 8 point and 6 point.

Graduate portraits were taken by Yearbook Associates of Turner Falls, MA. Student Organizations photos were taken by Harry Zannoti of Creative Images, Urbana, IL. Color printing was done by Rich Becker or Film Processing, Ltd. and Frank Key of Key Labs, both of Champaign, IL.

The Illio staff has tried to capture what it's like to be a student at the U of I between the pages of this book. Hopefully, in the years to come, you'll take this off the shelf and remember your time spent here. We give you this book and hope you enjoy it. For it's dedicated to you, the students of the University of Illinois.

A Note From the Editor

Boy am I glad its over! Even though I've enjoyed putting this yearbook together, I'm glad it's finally finished. I'm not going to ramble on about how much work goes into a yearbook, only staff members realize the full extent. Believe me, it doesn't just happen.

Now that the book is finished, I don't quite know what to say or who to thank. Let me tell you—it's not very often that I'm at a loss for words. Well, I guess that I'll just begin my thank yous. I'll try not to make it sound like a long winded Academy Award acceptance speech. (If I'm not making any promises, I said I'll try.)

First I'd like to thank my bosses, The Illini Media Company, for giving me the opportunity to put together this book. I'll miss the board meetings (really!). Thank you, Mayer, for all your help and your wise-cracks. Ellie, thanks for showing me the administrative ropes. I'd also like to thank Mike Hackleman and Pam Ortega, at Josten's, for all their help.

I'd like to briefly thank Geoff, Kit and Mary for their patience when I screwed up on the typesetter.

I owe my greatest thanks to my staff. With few staff members returning from last year, we all kind of figured out what to do as the year went on. I hope they had as much fun as I did. Prahba, you did a terrific job and are a good friend, thanks for always coming through (yes, we can mail the Index). To the Section Editors, you did a great job coming up with story ideas. To the Writers, you did a great job coming up with stories for some pretty strange ideas. Photographers, well, let's just say you kept me guessing. To the Production Staff, thanks for keeping me sane. We had some pretty interesting conversations ("Let me tell you about my dog's tapeworm...") and a lot of laughs (What are the lyrics to that song anyway? Denise, it's FAB not FAT.) Everyone keep in touch, okay?

I'd like to thank my friends for all their understanding (No, I can't go out tonight, I have to work). I'd especially like to thank my roommates, Jean and Debbie, simply for being there.

Ed, thank you for all your support. You told me I could do it and you were right. I appreciated all your help, taking pictures and getting scores. I hope that someday we'll get our schedules straightened out so we can spend some time together.

Finally (I know this is getting long), I'd like to thank my family. Cathy, thanks for all your hilarious cards and your encouraging phone calls. Brenda and Bob, thanks for giving me a home away from home whenever I need to get away. Most of all I'd like to thank my parents for always being here when I need them. Thank you Mom and Dad, I love you.

Leslie
